## Denison Site Storm Damage Report

On July 26<sup>th</sup>, 2022 there was a report of a broken dish cover at the ISICS Denison Site. There had been wind storms in the area that week.

### Denison Tower Damage

1 of the dishes on the tower sustained damage from the storm. This is the primary 6ft dish facing the Monona site.

### *Facing Monona Site*

The primary dish facing the Monona site had to have the dish radome cover replaced.

The dish had to be removed from the tower and lowered to the ground. Then a new cover was installed on the dish. The dish then had to be raised back up the tower and re mounted. The dish was aligned back into specifications towards the Monona site.

Ref. AON 29C20 Allocation Request ref. 7-11-22 & 7-14-22 Denison ISICS Communication Tower Path Misalignment & Broken Radome due to high winds from storm.

State of Iowa Executive Council:

During the 7-26-22 Bi-weekly Motorola Warranty Update Conference Call, Dave Gordon, Motorola Customer Support Manager, advised that high winds produced from a 7-11-22 storm caused the Denison ISICS Communication Tower to become misaligned. This misalignment impacts the micro wave path's ability to communicate with surrounding towers. It was also reported on 7-14-22, due to a local storm, the Denison ISICS Tower radome cover was broken due to flying debris. It is suspected broken radome occurred during the 7-11-22 storm, but was not noticed until 7-14-22. On 7-26-22, an initial 29C20 notification was sent to the Executive Council this Act of Nature (AON) Damage to the Denison ISICS tower site (See attached email).

On 8-17-22, Motorola provided a repair estimate regarding the damage sustained. The estimated cost to repair this damage is \$8,722.00. Repairs will commence when tower crews become available.

The DPS Interoperability and Communications Bureau is respectfully submitting a 29C20 Allocation Request for \$8,722.00 regarding this AON damage.

Thank you for your consideration.

Sincerely,

Captain Richard Pierce
