**Re:** Rave Emergency Alert System

---

I would like to have the Cape Girardeau County Deputy Director of Emergency Management Sam Herndon share information of the Rave Emergency Mass notification system. This is another tool in the toolbox to notify our citizens of things such as: messages from the NWS, street closures, and boil water advisories. We can share a link with our citizens and they can set up their account and register as to the menu of alerts that they want to receive and if they want the info through text, voice, and/or email. We would be able to have an administrator for the City of Jackson alerts to send out as needed. This is a tool available to the city at no cost through the Cape County 911 system.

If you have any questions you can contact me anytime.

Sincerely,

Jason Mouser  
Fire Chief
