RE: Jackson Middle School Crosswalk & Sidewalk Project – Archaeological Survey for PER requirements

For the Middle School Crosswalk and Sidewalk Project, a TAP grant has been awarded. As part of this process, a Preliminary Engineering Report (PER) is required, and MoDOT is requiring this PER have an Archaeological Survey performed. This was not expected originally as the site has previously been disturbed. Smith and Company has provided quotes from two firms to perform this work. Lochmueller Group proposed performing the work for \$8,600.00. American Resources Group (ARG) proposed performing the work for \$6,988.00.

Staff recommends approval of Supplemental Agreement No. 1 with S. H. Smith and Company, Inc. for ARG to perform the Archaeological Survey of the site at \$6,988.00.
