**Re:** Worthington Engine Parts

---

Mayor and Board of Aldermen,

In November, 2022, the City of Jackson purchased the rights to harvest parts from a Worthington engine that was in service in Macon, Missouri. We have been searching for someone that could harvest the parts that we would like to have for spare parts for our two existing Worthington engines. We thought we had a person to do just that back in 2022 but that did not happen for reasons I will be glad to discuss at the upcoming meeting. After a long search for a competent large diesel repair service that specialize in this type of engine, we believe we have found such a company. I'd like to discuss their preliminary proposal for harvesting the list of parts that we would prefer to have for our existing engines.

Regards,

Don Schuette

Director Electric Utilities
