RE: Battle Ridge PHASE II

I'm writing to provide information regarding drainage at the proposed Battle Ridge Phase II as shown on my submitted site plan.

All of the runoff from Phase II enters the existing drainage system that was designed and installed as part of Battle Ridge Phase I.

Phase I drainage calculations apply to this part of the property for the proposed Phase II addition. Construction of the Phase I drainage facilities are complete and operational, so no new drainage facilities are proposed for Phase II.

Sincerely,

T. Clint Harrison, P.E.
