

Expanding Opportunities Together
Bring Archery to Your Community

REGIONAL FACILITY

Furthering Our Mission

ESDF Community Facilities Development

The Easton Foundations' mission to "Inspire Growth in Archery" drives our vision for a nationwide network of dedicated archery facilities. These facilities will collaborate to provide local recreation and education, state and national pathways, and space for club training and events.

By strengthening this network with both existing and new locations, we aim to create a seamless pathway for archers at all levels - from local participation to international competition. A more connected system will remove barriers to entry and elevate the talent pool across the U.S.

We invite state and local governments to express their interest in bringing an archery facility to their community.

Selection, Design & Purpose

Regional Archery Facility Overview

Selection Process

Locations will be chosen strategically to accommodate a network of facilities distributed across the US to ensure as many people as possible can participate in national opportunities.

Design

- 100' x 140' design to accommodate a minimum of 16 indoor targets at 18 meters(20yards) to 25 meters, additional spectator area, program storage, and restrooms.
- Space to be divided into two areas that allow multiple programs to be held simultaneously while also allowing for combined usage.
- Outdoor target archery field with safety zones secured to accommodate at least 20 70 meters targets with shooter canopy.

Purpose

- Host local recreation archery programs, leagues, local, state, and national sectional events.
- Provide space for local clubs such as 4H, JOAD, S3DA, Boy Scouts, NASP, OAS, etc. to hold team practices.
