

Our Commitment to Craftsmanship

In today's mass produced world, the commitment to craftsmanship can fall by the wayside. Dedication and an unyielding determination are essential to creating a superior product.

At Playcraft Systems, craftsmanship is the cornerstone of our company. Building on a foundation of sustainable materials, innovative design and our state-of-the-art manufacturing techniques, we create playground equipment and playscape experience unmatched in the industry.

Our products set the benchmark for quality within our industry. This includes our highly durable powder-coat process, which starts with a complete phosphate wash of the component and then an entire layer of epoxy primer. We finish the component with a poly TGIC powder to create a total thickness of 11 mils, an industry high.

In addition, our products meet or exceed the design and safety guidelines found in the ASTM F1487-17 and USCPSC publications for playground equipment designed for public use. Playcraft Systems is also a member of the International Play Equipment Manufacturers Association (IPEMA).

Quality Overview

Resilient Coatings:

- All metal is chrome sealed to enhance wear protection, reduce friction, and improve corrosion resistance.
- Every inch of metal is coated in primer, not just the weld.
- Metal is finished with (2) coats of durable poly TGIC powder for better curing and a total finish coat of 12 mil, the best in the industry.
- All decks and Play-Tuff™ components receive more than 125 mil of slip-resistant coating, the thickest in the industry.

Exceptional Plastics:

- We utilize advanced technology and materials to create durable, tough, plastic components.
- We offer exceptional quality in both rotationally molded and high-density polyethylene.
- Plastic parts manufactured with extra thick walls and colorfast materials for lasting durability and brilliance.
- Each plastic component is hand inspected for excellence.

Quality Overview

Hand Finishing:

- Every part that leaves our factory is hand inspected by trained technicians. Our Custom Finishing Team inspects, hand-finishes, and mechanically files each connection before finish coating is applied.
- All post caps have a ring that wraps the post and self-seals to prevent moisture penetration and rust.
- All edges on plastic parts are rounded and inspected for comfort and safety.

Impeccable Shipping and Installation:

- Each new playground arrives in our custom packaging and shipping materials.
- Every playground features a detailed playground Owner's Manual custom crafted for your unique playground system.
- Our proprietary King Clamp System is specifically engineered to ensure a smooth, stress-free, and compliant installation.
- Each playground includes stainless steel, tamper-resistant hardware.
- Playcraft's highly trained installers will flawlessly craft you play system to ensure years of community play.

Shade/Shelter Overview

Shades and shelters are important throughout your park setting to provide cool areas for children to relax. Whether the shade is over the playground equipment itself, or a picnic area for the family, these spots are a key element on any park design. This holds especially true in high sun/heat climates where equipment and surfacing materials may get hot after sitting in long duration of sunlight.

Your Playcraft Consultant will verify entry and peak heights to verify accurate clearance around the equipment and use zone boundaries if inside of a play area. They are built to last with one of the best warranties in the industry. Shades and shelters come in a wide range of styles, colors and shapes to fit your park's need.
