Is this Item Goal Related?
Yes.

Summary and Background
On September 16, 2024, the applicant received Conditional Use approval (24-CU-09B) for parcels 06032A B002 and 06032A B002Z to develop a multifamily development consisting of 196 units.

The site plan was later revised to include additional parcels, and on February 9, 2026, the applicant received updated Conditional Use approval (25-CUP-009) to incorporate parcels 06032A B003 and 06032A B006. The project has also received two variances: 25-VAR-001 for relief from exterior architectural design and porch/balcony requirements, and 25-VAR-003 for relief from sidewalk requirements.

In addition, a Stream Buffer variance has been approved. This approval permits construction of a culvert crossing to provide vehicular access and enable utility extensions to the portion of the site constrained by an existing north-south stream.
