# *ABOUT* **PROPOSAL**

White's Clock and Carillon will replace the existing collector rings on the clock tower. The existing rings have cracks where the set screws secure them to the timepiece. If the cracks allow the set screws to loosen, they will get wrapped around the timepiece. Replacing the collector rings will ensure that the lights on the clock hands continue working properly.

# *CUSTOMER* *RESPONSIBILITY*

The responsibility of the customer is as follows:

- Provide access inside the tower. White's Clock and Carillon has included the cost of the lift rental in this proposal. We will handle scheduling.

Equipment is covered under a 1 year warranty.

# PURCHASE AGREEMENT

The total cost for the complete project is \$4,658. All taxes and fees are the responsibility of the Purchaser. A 50% deposit is required with the order and final balance due upon completion of the installation. This Purchase agreement is valid for 60 days.
