Good morning Chairwoman Turner,

One additional thought I wanted to share regarding our outreach and advertising efforts is that while the program should remain open for anyone to sign up, I would really like for us to intentionally target residents who **live within our local community**, particularly those who may be **disenfranchised or facing greater economic challenges**, such as individuals in low-income housing.

My hope is that we can make a focused effort to reach those who may benefit the most from these opportunities. By doing so, we can help **empower residents with valuable skills and resources**, while also investing directly back into our beautiful community.

Thank you again for your leadership on this, and I look forward to working together to make sure our outreach is both meaningful and impactful.

Councilwoman Santa Fox
