

COURAGE

COMPASSION

PROFESSIONALISM

Dear Stakeholder,

It's hard to believe it's fall already, but the leaf color clearly says otherwise. 2022 has been a hectic year. Our call volume has been well above 2021 numbers, and of course, the growth and new buildings in our district have kept our staff busy with plan reviews and inspections. 2022 has also been a time of looking forward to the future as we look for property for our next firehouse and potentially a new site for a training site. While we are a couple of years from needing our next firehouse, the logistics of hiring firefighters, ordering a fire engine, and having enough lead time to obtain all the equipment required have changed the way that fire departments must do their planning. For example, a fire truck ordered today would not arrive until nearly 2025. You can imagine how difficult it can be to make all of our timing work as needed!

All of the above activities are made more difficult by the predictions on the economy, the labor pool, and the cost of everything we need to operate. While it may seem overwhelming, I will share that several times this year, your firefighters have made life-changing differences to the citizens we serve. Several lives have been saved, and the property protected has been notable. All the extra planning, strategizing and agonizing over the future fade when our members make such a huge impact. I'm lucky to be able to do this work and to do so with such a dedicated group. With bias and pride, I say that you can be proud of the great work that they all do for each of you.

Stay safe and well, and as always, please don't hesitate to let me know if we can serve you better

Michael West
Fire Chief

Front Range Fire Rescue (FRFR) has a new recruit that works for bones. Oliver won't be riding on engines, but he'll provide critical help for first responders returning from emergencies.

Therapy dogs provide comfort in the moments after a difficult call.

Oliver is FRFR's first-ever therapy dog and enjoys his role of love, comfort, and support for all personnel.

FRONT RANGE FIRE RESCUE

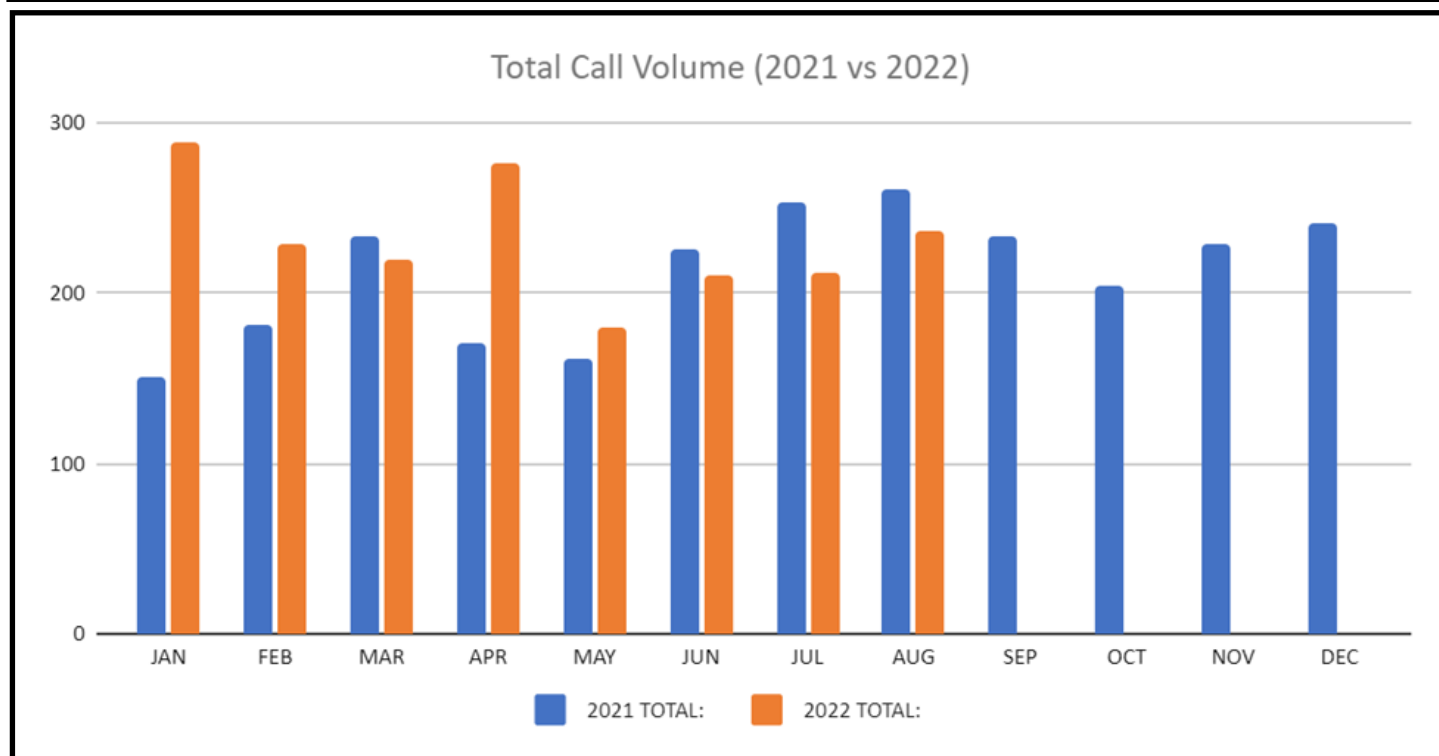

The ultimate goal of an emergency service delivery system is to provide sufficient resources (e.g., personnel, apparatus, and equipment) to an emergency scene within an appropriate time that allows for effective intervention and mitigation of the emergency. Front Range Fire Rescue (FRFR) works actively to establish realistic performance measures that are used to evaluate the services provided by FRFR.

Fire-related emergencies are arguably the most critical type of incident that occurs within the FRFR response area; however, the District also responds to a large number of critical medical emergencies and many other types of emergency incidents. A rapid response by highly trained and properly equipped professionals is the key to successful mitigation of any emergency.

CALL VOLUME BY RESPONSE ZONE

ZONE	Aug 2022	2022 YTD	Aug 2021	2021 YTD
Zone 1 - Johnstown	98	740	108	702
