Rates for In-House Services and Equipment

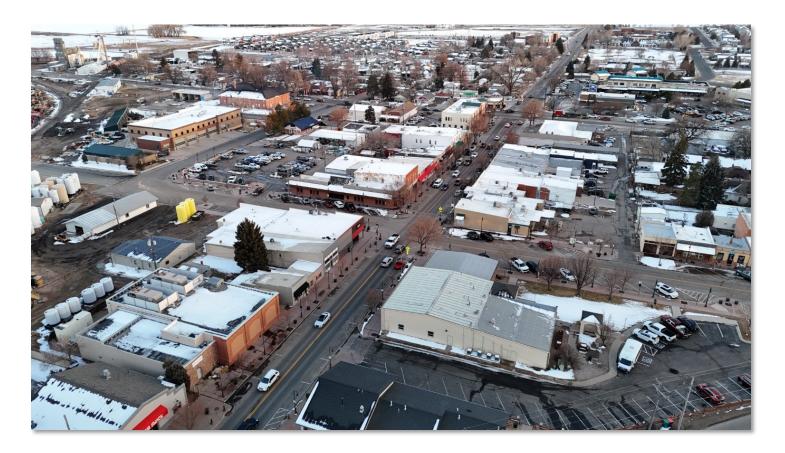

<u>Mileage</u>	Bulk Printing and Reproduct	tion_		<u>Equipment</u>	
Standard IRS Rates		<u>B&W</u>	<u>Color</u>	Valve Crew Vehicle (hour)	\$75
	Small Format (per copy)	\$0.10	\$0.25	Pressure Data Logger (each)	\$200
	Large Format (per sq. ft.)			Water Quality Meter (per day)	\$100
	Bond	\$0.25	\$0.75	Microscope (each)	\$150
	Glossy / Mylar	\$0.75	\$1.25	Pressure Recorder (per day)	\$100
	Vinyl / Adhesive	\$1.50	\$2.00	Ultrasonic Thickness Guage (per day)	\$275
				Coating Inspection Kit (per day)	\$275
	Mounting (per sq. ft.)	\$2.00		Flushing / Cfactor (each)	\$500
	Binding (per binding)	\$0.25		Backpack Electrofisher (each)	\$1,000
				Survey Grade	<u>Standard</u>
				Drone (per day) \$200	\$100
				GPS (per day) \$150	\$50

OTHER DIRECT EXPENSES:

Other direct expenses are reimbursed at actual cost times a multiplier of 1.05. They include outside printing and reproduction expense, communication expense, travel, transportation and subsistence away from the FNI office. For other miscellaneous expenses directly related to the work, including costs of laboratory analysis, test, and other work required to be done by independent persons other than staff members, these services will be billed at a cost times a multipler of 1.05. For Resident Representative services performed by non-FNI employees and CAD services performed Inhouse by non-FNI employees where FNI provides workspace and equipment to perform such services, these services will be billed at cost times a multiplier of 2.0. This markup approximates the cost to FNI if an FNI employee was performing the same or similar services.

.1 Progress Meetings: Plan review at 30, 60, 90% Milestones with the Town and stakeholders invited by the Town. ICON will prepare agendas, presentations, minutes		12	12		12					\$ 6,540.00						\$ -	\$ 6,54
Community Engagement Workshops:3 workshops assumed. Coordination with Town and stakeholders to present flooding concerns and master plan concepts		8			24	24				\$ 7,520.00	\$7,585	\$22,500				\$ 30,085.00	\$ 37,6
Community Engagement: Create and maintain project page to aid in communication. Project page will have a place for citizens to provide comments and inform team of					4		12			\$ 1,940.00						\$-	\$ 1,
known flooding issues Coordination with Stakeholders: ICON will reach out to adjacent communities early on in the process in order to incorporate their input into the Master Plan.	<u> </u>	12			12					\$ 4,140.00						\$-	\$ 4,
Coordination Meetings: Assumes twice a month between Town and ICON to keep project on schedule and on budget		36	12	12	54					\$ 19,380.00						\$ -	\$ 19,
Information Gathering: Research existing plans and reports, drainage reports, studies, as built data, review historic data. Information obtained will be incorporated into the GIS database.					40		24			\$ 8,360.00						\$-	\$ 8,3
Information Gathering: Obtain and review Town storm drainage GIS database and existing information on storm drainage system, meeting with maintenance crew to determine concerns with existing system and typical maintenance practices.		4			4		8			\$ 2,300.00						\$ -	\$2,
3 Information Gathering: Review existing master plan and hydrologic and hydraulic modeling into to utilize past information where possible.			2		8					\$ 1,520.00						\$-	\$1,
Information Gathering: Review Town's utility GIS database, obtain GIS Shapefiles for existing land use, future land use, parcels, jurisdictional boundary and include in the GIS Database							8			\$ 920.00						\$-	\$
Conditions Assessment: Additional CCTV inspections will be required to fill in any gaps in the system. The team will determine what pipes will need to be inspected and will provide CCTV inspection of those segments.						8	4			\$ 1,300.00				\$25,000		\$ 25,000.00	\$ 26
2 Conditions Assessment: Review and compile existing bridge inspections, These inspections will be added to the GIS data base.						8	4			\$ 1,300.00						\$ -	\$ 1
Conditions Assessment: Review and document existing system material type and condition per the GIS data and CCTV runs. This information will also be included in the GIS database.						8	4			\$ 1,300.00						\$-	\$ 1
.4 Conditions Assessment: Site visits to document existing land use, existing vegetation and verification of drainage areas .1 Field Verifications- additional survey data and existing site condition verification			4	8	8				\$400	\$ 2,880.00 \$ 2,880.00					\$38,000	\$- \$38,000.00	\$ 2 \$ 40
					12				 	\$ -					\$00,000	\$ -	\$
GIS Data Review and Dashboard Development GIS: Create a GIS compatible dashboard for the project to organize and document the										\$ 9,290.00						\$-	\$9,
1 Town's assets	4	2	2		2		20			\$ 4,250.00						\$-	\$ 4
3 GIS: Evaluate Existing GIS Data and Schema GIS: Update Existing GIS Data and Schema and fill in gaps per the direction of the Town			2		2		8			\$ 1,600.00						\$ -	\$ 1
.3 Staff, incorporate as-built plans and information into the GIS database			2		2		8			\$ 1,600.00						\$-	\$ 1
.1 GIS: Update GIS to include existing storm facilities and storm modeling parameters							8			\$ 920.00						\$-	\$
1 GIS: Proposed Project integration into the GIS dashboard							8			\$ 920.00 \$						\$ - \$ -	\$
3: Master Plan Development										\$ 128,590.00						\$ -	\$ 172,
.1 Hydrologic Model Development: Regional watershed delineation and basin parameters historic conditions needed to create a Historic Conditions CUHP model.	4		4		54		4			\$ 9,680.00						\$-	\$9
2 Hydrologic Model Development: Regional watershed delineation and basin parameters future conditions needed to create a Future Conditions CUHP model. 2 Independent Development Lease Uncertained and Inspire and page approach.			4		24		2			\$ 4,390.00						\$-	\$ 4
3 Hydrologic Model Development: Local watershed delineation and basin parameter historic conditions needed to create a Historic Conditions CUHP model.			4		40		2			\$ 6,630.00						\$-	\$6
 Hydrologic Model Development: Local watershed delineation and basin parameter future conditions needed to create a Future Conditions CUHP model Hydrologic Model Development: CUHP model creation (2-, 5-, 10-, 25-, 50-, 100-year, 			4		16		2			\$ 3,270.00						\$-	\$ 3
500-yr EX & FUT) 1 2D Model: Two-Dimensional Inundation modeling to verify flow conditions			1 2		8		2			\$ 1,320.00 \$ 1,750.00						\$- \$-	\$ 1 \$ 1
Ditch Analysis: 2D dynamic ditch model set up to verify flow spill locations and spill quantities. Surface will be obtained from lidar data and supplemented by field survey.			2	60			4			\$ 11,060.00						\$ -	\$ 11
Ditch Analysis: Ditch inflows and modeling (2-, 5-, 10-, 25-, 50-, 100-year, 500-yr EX & 2 FUT). Inflows from CUHP and SWMM will be input into the model as inflow hydrographs. Spills will be determined and outflow hydrographs will be exported.			2	4	8					\$ 2,200.00						\$ -	\$ 2
.3 Ditch Analysis: Ditch spill location exhibits SWMM Development: Existing storm conveyance system will be set up in EPA SWMM			2	2	4 40		8			\$ 1,820.00 \$ 6,000.00						\$	\$ 1 \$ 6
model to analyze the existing system and drainage facilities. SWMM Development: Existing detention ponds will be input into the EPA SWMM model			2		24					\$ 3,760.00						\$	\$ 3
per the drainage reports reviewed in above tasks SWMM Development: Field verification/survey will be required to obtain information that is needed to complete the model as well as to verify the GIS information received for the			2		16					\$ 2,640.00					\$12,000	\$ 12,000.00	\$ 14
^{1.3} project. As-built information will be used where possible and simple assumptions will be made to remain cost effective. NN OF JOHNSTOWN Comprehensive Stormwater Master Plan			2		10					φ <u>2,040.00</u>					φ12,000	φ <u>12,000.00</u>
