Re: EPA Office of Air and Radiation – Notice of Intent to Support Larimer County as a Participant if Awarded the Climate Pollution Reduction Grant (CPRG)

Dear EPA Office of Air and Radiation Representative,

It is with great excitement and a vision for a better future that the Town of Johnstown is pleased to offer its support of Larimer County's Notice of Intent to Participate (NOIP) for the Climate Pollution Reduction Grant Program. In addition to supporting the NOIP, the Town also intends to participate in the regional effort that would be led by the County.

The Town of Johnstown is currently working with Larimer County as an active participant in its "Climate Smart and Future Ready: Strategies for a Sustainable Larimer County" initiative. It is the first County-wide effort of its kind, geared toward environmental sustainability, and we are currently working to inventory Green House Gas emissions to establish a baseline for future action to reduce emissions. Financial assistance will be critical to helping the County and municipalities develop and implement climate action plans to begin the work necessary to address air quality issues in the region.

We look forward to working with Larimer County in our ongoing efforts, as well as in future efforts related to pollution reduction and environmental sustainability more generally. The Climate Pollution Reduction Grant would provide the support needed to take the next steps. To that end, we fully support and ask for your strong consideration for Larimer County's NOIP and hope for favorable consideration.

Sincerely,

Matt LeCerf
Town Manager
