RE: 2024 MMOF Call for Projects - On Demand Transit Program

Dear North Front Range MPO Chair,

It is with great excitement, that on behalf of the Town of Johnstown, we are providing this letter of support for Weld County's MMOF application to better serve our community and with the On Demand Transit Program. As part of this application and our collaborative spirit, the Town of Johnstown and Weld County will partner and contract with Via Mobility to deliver a much-needed mobility program to our respective service areas. This collaboration, focused on service, will help meet the needs of our 60+ community and also meet the needs of individuals with disabilities to a variety of regional destinations at no cost to the riders.

Johnstown and its residents have already experienced a significant benefit and improved quality of life from this program. Extending the program will continue to serve a need that is otherwise absent and not available. The Town of Johnstown is committed to supporting this project financially, as it makes the community and the region better, and more importantly meets the transportation needs of our 60+ generation.

I would ask for your strong consideration in our joint application for MMOF funding and we are happy to answer questions that you may have pertaining to the application.

Regards,

Matt LeCerf
Town Manager

cc: Johnstown Mayor and Town Councilmembers
Evan Pinkham, Transportation Planner, Weld County
