HIGH DENSITY MINERAL BOND

**The Town of Johnstown, CO
Partner in Pavement Preservation
Total Project size: 94,298 SY
Proposal for HDMB Project**

Summary:

The highest return on investment (ROI) is achieved by installing HA5 - High Density Mineral Bond.

Performance is calculated to be two to three times longer compared to using seal coats and premium seal coats.

Beyond the preservation benefits that HA5 provides, residents experience less community intrusion as road closures are needed much less frequently.

Performance History of Surface Treatments:

The biggest items to focus on for preservation treatment are:

- » What will provide the maximum extension of pavement life per every dollar spent?
- » Validating a product's performance goes beyond pictures of black roads. Initially, all tools for pavement preservation turn a road black, but HA5 has proven to stop the infiltration of water and slowed down the overall oxidation process compared to other premium seal coats.

Treatment Report HA5

Below are core samples taken from roadways comparing municipality specified, time-tested pavement preservation treatments. Look closely at each core. The HA5 core aesthetically looks to be the most desirable with the darkest surface. However, what the engineering community has identified is the darker color beneath the surface. This uncovers HA5's ability to retain the critical oils and resins that keep asphalt pavements flexible. **More flexibility results in pavements lasting longer with less cracking and other manifestations of deterioration.**

A report from the engineering firm Rosenberg & Associates, assessing a side by side of HA5 to a premium seal coat installation, found **9x less cracking** in the HA5 treated section compared to the premium seal coat treated section after a **4 year period**.

HIGH DENSITY MINERAL BOND

Proactive HOAs and Agencies have uncovered a strategy that saves them money while effectively preserving their pavement assets using HA5 High Density Mineral Bond.

- » *Smooth, Impermeable Surface*
- » *High Home Owner Acceptance*
- » *Unmatched Durability*

Prominent communities across the country who have transitioned to a longer lasting and more cost effective high density mineral bond installation include:

HOAs and Agencies in particular are trending away from the use of slurry and seal coats due to the much higher return on investment and longer lasting performance of HA5 (categorized as High Density Mineral Bond). HA5 enables communities to lower the life-cycle costs of pavement assets and reduce the amount of road closures.

- » *Lower & more predictable costs*
- » *Extends pavement life*
- » *Improved aesthetics and property values*
- » *No loose or grainy residue*
- » *Fewer premature failures*
