

**Animal Control Advisory Board Agenda
September 19, 2022**

Ordinance

Action Item

Agenda Description:

Discuss, consider, and possible action of modifying Article A3.000 Animal Control Fees.

Background Information:

The current Animal control fees have not been adjusted since April 2009. After referring to other city's fees, staff finds it necessary to make adjustments. One of the biggest impacts will be increasing the adoption fee for cats and dogs. This increase will include sterilizing the animals before they leave the shelter.

Financial Information:

Having the animals sterilized prior to adoption will increase the cost to the shelter, but the increase in the adoption fee should offset the increase.

City Contact and Recommendations:

Amber Bransom

Staff recommends accepting the proposed changes.
