

## July 2024

In the month of July, the Joshua Police Department had an officer on light-duty for a period of time and had two officer positions vacant. Despite these obstacles eight officers were able to attend specialized training. We took delivery of two new police vehicles which have been at the equipment outfitters for most of this year. They are currently being finalized for duty use and will then replace two older vehicles in the fleet. Also in July, we experienced difficulties on several occasions with the reporting software we utilize via contract with Burluson. For the days preceding this report, we have been unable to access these systems in order to create reports or assign them to detectives. Another result of this difficulty is that we will not be able to provide our normal statistical data. We are working to rectify this situation.
