

A photograph of the interior of a large industrial foundry. A large overhead crane with a black steel beam spans the width of the building. On the beam, a white label reads "WHITING FOUNDRY EQUIPMENT CO. WAREHOUSING DIV. CAP. 15,000 LBS.". Below the crane, a tall, multi-story furnace or boiler structure is visible, featuring several large, multi-paned windows. The building has a high ceiling with a complex network of steel trusses and a roof with reddish-brown panels. The walls are made of corrugated metal, and the floor is concrete. Various industrial equipment, including a large metal tank in the foreground and a small cart on the right, are scattered throughout the space.
