City & Borough of Juneau (CBJ) Property Assessor,

I am disputing my 2023 tax assessment for my residence at 9162 Skywood Lane. I believe my property has been overvalued by the CBJ. CBJ increased the value of my property by \$121,300 (a 24% increase) between the years 2022 and 2023. This increase is not consistent with not only my property value but the property values in my neighborhood. This increase is also far greater than the average increase property assessments for comparable homes in my area.

In 2019, CBJ increased the value of my home disproportionately with similar homes in my neighborhood. In 2019 I disputed the tax assessment and provided a market place analysis of several similar homes in my area, that resulted in a lowered adjustment to my property assessment.

In 2021, CBJ again increased the value of my home disproportionately with similar homes in my neighborhood. During the dispute CBJ admitted they discovered an error in my assessment and adjusted my property assessment accordingly.

I am concerned about the consistent pattern of unusually high property assessment errors that my home has had over the years when compared to similar homes in my area.

Between the years 2022-2023 CBJ increased the assessed value of comparable homes between 12% and 14%. My home value was increased by 24%, almost double when compared to the comparable homes.

I believe CBJ has again made an error in assessing my property and I would appreciate CBJ revaluate my assessment.

I assert that my 2023 property tax should be increased no greater than 12% to match the comparable homes in my area.

I believe the 2023 property tax valuation of my home is as follows:

Land Assessment: \$129,700 Building Assessment: \$445,756 Total Assessment: \$575,456

Thank you for your time,

Scott Carson 9162 Skywood Lane Juneau, AK 99801

Fannie Mae Form 1004 March 2005 Page 2 of 24

Uniform Residential Appraisal Report

Top of URAR Page 2: The comparable listing and comparable sale data shown on the top of page 2 is for properties considered comparable to the subject, located within the subject's neighborhood AND competing neighborhoods within the City and Borough of Juneau. Due to the Juneau-Douglas area being a small community with a population of about 32,000 people and a large land mass, Juneau has a limited market often resulting in comparable sales in excess of 1 mile distant, thus the use of comparable sales from competing neighborhoods is appropriate. Every effort was made to find comparable sales of properties similar in gross living area, age, quality, design and condition on similar sites/locations. (This data is primarily derived from the Southeast Alaska Multiple Listing Service and does not reflect for sale by owner properties). See 1004MC and related addendum for further information. The 1004MC also includes the data from the subject's neighborhood and competing neighborhoods shown on the top of page 2.

Inspection: I have examined the property herein exclusively for the purposes of identification and description of the real estate. The objective of my walk-through inspection is to develop an opinion of the highest and best use of the subject property and make meaningful comparisons in the valuation of the property. This physical inspection is for developing an understanding of the current use, general condition and functional utility of the improvements. This "walk-through" of the property is not the equivalent of inspection by a qualified engineer or other appropriately qualified property inspection professional. The lower level is a slab. Only a head and shoulders inspection of the attic was completed due to a very small access and to avoid disturbing the insulation in the attic. No apparent evidence of roof issues were found during the interior inspection of the dwelling.

Intended User and Use: The Intended User of this appraisal report is the Lender/Client and VA. Unless specifically stated within the report, there are no additional Intended Users. The Intended Use is to evaluate the property that is the subject of this appraisal for a mortgage finance transaction, subject to the stated Scope of Work, purpose of the appraisal, reporting requirements of this appraisal report form, and Definition of Value as defined in the report

Appraiser: Mark D. Kasberg: VA No. 0067

Timeliness

ENTS

ADDITIONAL COM

This appraisal report was not delivered within the 12 business days allowed for the Juneau-Douglas area, however, good communication was provided to the lender and veteran. The following notes were posted on the VA website:

03/31/2016 16:56:18 CDT My turn time is now near the end of April. Typically I have been able to deliver my VA appraisals within 12 business days set for the Juneau area, however, my current work load is well past that. I have been in communication with the Denver VA office regarding this as well. I have been instructed to be sure the lender and Veteran are made aware. Juneau is a small community. The market is picking up as it is spring time and I believe there are about 3 of our local appraisers currently are out of town, which causes the turn times of those in town to increase. I will post notes to the website once the inspection is set. I hope to deliver the report around the 25th of April.

04/08/2016 19:50:00 CDT I have been in contact with the borrower. Will schedule inspection closer to the estimated date of delivery. 04/08/2016 19:49:34 CDT I have been in contact with the borrower. Will schedule inspection closer to the estimated date of delivery. 04/14/2016 14:01:25 CDT The inspection is set for Friday, April 22.

Kasberg Appraisal Services

File No. 2885 Case No. 63-63-6-0369075

Borrower Norman Carson				
Property Address 9162 Skywood Lane				
City Juneau	State	AK	Zip Code	99801-9621
Lender/Client Quicken loans, Inc.	Address	1050 Woodward, Detroit, MI 48226 - 0000		

SUBJECT CONDITION

No major improvements have been done since the sale in 2014. The subject falls between a C3 and C4 rating.

Office Notes from the 2014 sale/transfer: Recent improvements include kitchen remodel and bathrooms updated about 4-7 years ago.

Office Notes from the 2013 sale/transfer: The appraiser at the time of this sale indicated the kitchen and was updated in 2004. Two baths had newer flooring and surrounds and some fixtures, the master bath ware remodeled in 2010, windows replaced in 2004, boiler was reported to be about 10-15 years old at this time (now estimated to be 13-18 years old), newer interior and exterior paint at the time. The appraiser indicated there was a fire in the home that caused the 2004 remodel. No apparent signs of the former fire were noted at the time of this sale. No outward or apparent signs of the former fire was noted during the 4/22/16 inspection.

Notes from a 2008 seller's disclosure posted in MLS indicated the metal roof surface was approximately 15 years old at that time; hence, the estimated age is now about 23 years old.

SUBJECT LISTING HISTORY

DOM 21;Subject property was offered for sale.;Original Price \$445,000;Original Date 03/08/2016;21 DOM is an estimate; the original list date is an estimate; advertised on Craigslist and open houses for about 3 weeks before entering under contract.

FINANCIAL ASSISTANCE / CONCESSIONS

\$2500;;The purchase agreement indicates the seller has agreed to pay for the survey, deed preparation, owner's title insurance, 1/2 recording, flood search, and 1/2 of the escrow closing fee. The total is estimated to be about \$2,500. This amount is not a sales concession as it is common for the seller to pay for a portion of the loan charges in the current Juneau-Douglas market. See the 1004MC Comment Addendum for more information.

Additional Sales Comparison Analysis Addendum:

(Also see the Addendum Titled "Adjustments on the Grid" following this addendum)

I have made an examination of publicly available information about the subject property and comparable sales by researching the City and Borough of Juneau Assessor records, on-line information provided by the Alaska Department of Natural Resources Recorder's Office; and information shared by local appraisers, my own files, other real estate professionals, and SEAMLS. Photos: All the photos of the subject and the comparable sales are originals from my own files.

Roadways and Natural Boundaries:

All of the comparables used on the grid for direct comparison are located in competing neighborhoods within the Juneau-Douglas market area. Buyers would likely consider all of the neighborhoods when in search for a property like the subject. If any location adjustments are warranted, they are made on the grid. The roadways and natural boundaries dividing the subject from the comparables do not pose a market division or regional barrier. The subject and all of the comparable sales are located in the City and Borough of Juneau.

Photos:

Although seasonal differences may occur, photos are from my own files.

The following is general information about each of the comparables used on the grid:

Comparable sale 1: This property is located on a corner site. There are vaulted ceilings in the kitchen and family room area. No significant updating has recently been completed in the bathrooms. The kitchen has newer appliances, otherwise dated. The furnace is two years old. The roof is believed to have been resurfaced in 2003. The exterior doors are newer. The garage was converted into a family room and den. Functional obsolescence: the converted garage is not finished to the same quality as the rest of the dwelling, and the room sizes are disproportional. The previous carport was enclosed, and is now a 472 square foot garage.

Comparable sale 2: This is a single family with an accessory unit; however, single unit properties compete with those that have accessory units in the Juneau/Douglas market. Although located on a cul-de-sac similar to the subject, a location adjustment is warranted because this property is in a subdivision that has a mixture of attached and detached properties (higher density). Updating includes: Some newer carpet, updated 1/2 bath, updated the upstairs bath and apartment bathrooms 2-3 years ago. Quality features include: cedar siding, some vaulted ceilings, enclosed porches, and upgraded kitchen and bathroom cabinets. The double car garage is 516 square feet.

Comparable sale 3: Since purchasing the property as an REO in 2009, most of the windows and flooring have been replaced, new appliances and new interior doors installed, fresh interior and exterior paint applied, some bathroom fixtures replaced and about half of the electrical fixtures replaced. The roof surface is about 2 years old. Some plumbing was replaced due to a freeze up while it was and REO. The double car garage is 559 sf.

Comparable sale 4 is pending: The pending sale price was verified, thus a listing adjustment is not warranted. The kitchen remodel includes new cabinets, solid surface counter tops and stainless steel appliances. Interior and exterior paint are in above average condition. The flooring looks newer. The interior has upgraded finish work such as solid core interior doors, custom remodeled bathrooms and kitchen. The roof surface is about 10 years old. The double car garage is reported to be 572 sf.

Adjustments on the Grid Derived from Market Reaction:

Location & Time: Due to the Juneau-Douglas market area being a small community with a population of about 32,000 people and a large land mass, Juneau has a limited market often resulting in comparable sales in excess of 1 mile distant and sales that have closed in excess of 90 days. If a location adjustment is warranted, comments are made within the Additional Sales Comparison Analysis Addendum.

Site: Site adjustments are based on estimated site value rather than size alone while taking into consideration differences in topography, soils, physical characteristics, shape, access, and zoning.

View: No adjustments are made for a residential view. Unless otherwise stated, mountain views are typically not adjusted for; this is because it is common in the Juneau-Douglas area to have some form of a mountain view. Many factors are taken into consideration when adjusting for a view amenity, such as: water (river, pond, lake or ocean), clarity, distance, elevation, filters (like trees and buildings), seasonally and tidally affected views.

Design (Style): Adjustments are not typically made for most variations in design (style). However, properties with excessive stairs (three flights or more) are adjusted. Custom designs (styles) are considered in the quality of construction adjustment.

Quality of Construction Features: Adjustments may be warranted for differences in properties that have similar UAD quality ratings but may not fit into the next level of ratings. This is due to variations in quality of construction features and craftsmanship. Driveway surface material is taken into consideration when determining the quality level.

Actual Age/Effective Age/Condition: Adjustments for actual age are not made on the grid. Both the estimated effective age and condition of improvements the subject and the comparable sales are taken into consideration when making condition adjustments. Both long-lived and short-lived components are taken into consideration in the condition of improvements. Adjustments may be warranted for differences in properties that have a similar UAD condition rating but falls between two ratings. This is due to variations in levels of updating, maintenance and remodeling.

Room Count: The real estate market indicates adjustments are warranted for properties with less than three bedrooms (two bedroom properties), otherwise, no adjustments are warranted for differences in the number of bedrooms. Adjustments are made for the total number of bedrooms including basement bedrooms. Adjustments are made for differences in bathroom count at \$5,000 per full bathroom and \$2,500 per ½ bathroom; and warranted bedroom count adjustments are made at \$10,000.

Gross Living Area: Adjustments are not made for differences in gross living area of 50 square feet or less. Gross living area adjustments are typically made at \$45 per square foot. However, condominiums and new construction are adjusted at \$60 per square foot.

Basement & Finished: Finished basement areas are adjusted at \$45 per square foot if finished similarly to the upper level and \$15 per square foot for unfinished areas (unless otherwise stated).

Rooms Below Grade: Typically, differences in the number of bathrooms are adjusted on this line.

Functional Utility: If a functional utility adjustment is warranted, comments are made within the Additional Sales Comparison Analysis Addendum.

Heating/Cooling: Electric baseboard heat is common in the Juneau-Douglas area; it is a permanent heat source that does not require ventilation. Oil stoves are common secondary heat sources and do require to be ventilated. The combination of electric baseboard heat and an oil stove is considered similar to oil hot water baseboard in value. In-floor radiant heat and heat pumps are considered upgraded heat sources.

Energy Efficient Items: The highest available energy rating is 6 stars. HRV systems are an upgrade and are adjusted for. Slight differences in energy ratings are not adjusted for.

Garage/Carport: Garage adjustments are made at \$3,000 per stall plus \$15 per square foot for differences of 50 square feet or more. A carport is typically adjusted at \$3,000 per stall.

Accessory Units: The accessory units are adjusted as a separate line item at \$45 per square foot plus \$10,000 for the second kitchen, \$5,000 for a full bath and \$2,500 per half bath.

Porch/Patio/Deck: The overall size, quality, quantity and condition of exterior amenities are taken into consideration when adjustments are made for a deck, patio, porch, balcony, shed, covered area, storage area, landscaping, etc.

Other items: Additional amenities may include a jet tub, built-in or hardwired hot tub, attic area, storage area, second kitchen, wet bar, and workshop. No value is given to non-realty items.

Inconsistent information of comparables used in prior appraisal reports is most likely because MLS or assessor data was used for active listings or pending sales; this information may be all that was available at that time and is not as reliable as data obtained from another appraiser once the subject of a sale has been inspected by an appraiser. Appraisers in the Juneau-Douglas area typically share data for sale transactions which includes the most recent measurement of gross living area, current information regarding the sale, recent updating, quality features, etc. Personal inspections and data from other appraisers is more reliable than MLS and assessor data.

Uniform Residential Appraisal Report

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

Uniform Residential Appraisal Report

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Kasberg Appraisal Services COMMENT ADDENDUM

File No. 2885 Case No. 63-63-6-0369075

Borrower Norman Carson

9162 Skywood Lane Proporty Addross

Property Addres	s 9162 Skywood Lan	ie					
City Juneau		County	City and Borough of Juneau	State	AK	Zip Code	99801-9621
Lender/Client	Quicken loans, Inc.		Address 1050	0 Woodward	, Detroit,MI 4	18226 - 0000	

1004MC Comment Addendum: Note: Information provided by SEAMLS does not typically include for sale by owner transactions.

Sale Price as % of List Price Ratio: The Sale Price as % of List Price Ratio provided on form 1004MC for each time period is estimated due to search limitations of the SEAMLS software program. SEAMLS calculates an average sales price to list price ratio. According to a Fannie Mae Announcement, it is acceptable to report the results for this field as an average. This is general information and includes properties that may or may not be directly comparable to the subject. This data does not include for sale by owner sales. The Sale Price as % of List Price Ratio is currently about 95-99% for most property types in the Juneau Borough.

Sales Concessions: Over the past 12 months, seller paid loan charges vary greatly up to 2% of the sale price. Anything over 2% is considered a sales concession. There has not been an apparent increase in seller contributions in the current market. If applicable, sales concessions and/or seller paid loan charges for the subject property are disclosed on page 1 of the appraisal report. Every effort has be made by the appraiser to determine sales or financing concessions for each comparable sale provided on the grid. Alaska is a non-disclosure State and lenders do not typically disclose the amount of closing costs or fees paid by the seller. Local appraisers will usually note whether closing costs paid by the seller were excessive, otherwise the actual amount is typically not provided when appraisal information is shared. If closing costs or fees paid by the seller are determined to have affected the sale price of the comparable sale, an adjustment is made.

Market Trend: The appraiser's review of market data reported through SEAMLS over the past 3 years showed stability and some increasing values in our real estate market. Continued low interest rates, a balanced supply/demand equation for most property types, and a low foreclosure rate currently favor the Juneau area real estate market

The following is information that was taken from the June, 2015 Alaska Economic Trends Publication regarding Juneau's Housing Market: "National single-family house prices were 21 percent lower in 2014 that at their 2006 peak, while Alaska's dipped just 6 percent, Juneau's 5 percent, and Anchorage's 4 percent. Overall, Alaska weathered the housing market downturn very well, which is generally attributed to fewer risky loans and less speculative building." "Single family house prices have gone up more in Juneau and statewide over the past two decades than they have nationwide, where adjusted housing prices were only 15 percent higher in 2014 than they were in 1994. In Juneau, the real increase was 45 percent, and for the whole state it was 37 percent."

However, Alaska receives the majority of it's state revenue from oil taxes. Within the past year, oil prices have declined significantly, and the state is now facing a multi billion dollar deficit. Although the State of Alaska has a sizeable budget reserve, if oil prices remain low, a potential risk to the Juneau-Douglas real estate property values exists. Like the rest of the State, the outlook is a concern, but the impact on real estate values is not yet evident as of the date of valuation. Market conditions are generally recognized as stable.

According to an article in the Juneau Empire on October 26, 2015: A recent study by Rain Coast Data revealed economic concerns for Southeast Alaska. The information was recently presented at the annual Southeast Conference and the Juneau Chamber of Commerce. The report indicates there were few areas of growth and many indicators of a slightly downward economic trend for Southeast Alaska. Although tourism has provided many jobs, low seafood prices, low growth and many indicators of a signify downward economic rend to southeast values. Autough tought this provided many jobs, low searbod prices, low mineral prices and the loss of government jobs are negative factors. Not only has there been government job losses, the health care industry has suffered losses as well. The report indicated Medicaid expansion should have a positive impact on health care employment. The U.S. Coast Guard, and the local tourism industry are continuing to add jobs to the area.

Unemployment Information: Alaska has typically experienced a lower unemployment rate than the national average, however, the state unemployment rate is currently higher than the national average, and the Juneau unemployment rate is lower than the national average. Recently reported unemployment data by the State of Alaska indicates Juneau has an approximate 4.7% unemployment rate for the month of November, 2015. The State of Alaska reported an approximate 6.4% unemployment rate for the month of November, 2015. According to the U.S. Bureau of Labor Statistics, the nation's unemployment rate for the month of November, 2015, was reported to be approximately 5%.

SEAMLS currently reports the following data for the Juneau-Douglas area (this does not include FSBO data): There have been 33 closed sales; 61 pending sales and 16 new listings over the past 30 days. The data includes various property types with a wide range of sale prices; view and non-view, waterfront and non-waterfront sites, etc. The average time on the market for most sold properties is generally less than 90 days; however, many properties are selling in 30 days or less. It is not uncommon for properties to receive more than one offer in the current market and many properties are selling by word of mouth. Note: Vacant Land often require significantly longer marketing periods than properties with improvements.

Single unit properties including large owner-occupied type properties with small accessory units have a wide range of sale prices; and include view, non-view, waterfront and non-waterfront sites, etc.: Approximately 201 sales closed 2015, 209 in 2014, 218 in 2013, and 193 in 2012.

Attached Properties: Approximately 81 sales closed in 2015, 61 in 2014, 56 in 2013, and 47 in 2012.

Condominium Properties: Approximately 86 sales closed in 2015, 65 in 2014, 73 in 2013, and 58 in 2012.

Duplex Properties: Approximately 10 sales closed in 2015, 7 in 2014, 13 in 2013, and 10 in 2012. Note: Inventory has been very limited. Multi-family Properties (triplex and fourplex properties): Approximately 2 sales closed in 2015, 1 2014; MLS reports just 3 fourplex sales in 2013 and 4 in 2012. Note: Inventory in MLS has been very limited and many multi-family sales have been FSBO transactions in 2015.

Vacant Land (Single Family and Multi Family Lots): Approximately 12 sales closed in 2015, 14 in 2014, 14 in 2013, and 7 in 2012.

Single family properties with saltwater sites: Approximately 16 sales closed in 2015, 10 in 2014. Note: Inventory has been low.

The 1004MC data search includes sales and listings of comparable properties in the subject's Mendenhall Valley neighborhood and properties in competing neighborhoods such as the Back Loop Road and Lemon Creek. Properties included in the subject shorted and vary in age, design, quality of construction, condition and location. I have made an examination of publicly available information about the subject property and comparable sales by researching the City and Borough of Juneau Assessor records, on-line information provided by the Alaska Department of Natural Resources Recorder's Office; and information shared by local appraisers, my own files, other real estate professionals, and SEAMLS. The listing and sales data for our small community is limited for properties like the subject. The appraiser's analysis of sale and listing data supports an overall stable market trend. Due to the Juneau-Douglas area being a small community with a population of about 32,000 people and a large land mass, Juneau has a limited market often resulting in comparable sales in excess of 1 mile distant and sales that have closed in excess of 90 days. The 1004MC form is not structured for accurate analysis of small communities with limited sales and listings. According to SEAMLS records (not including for sale by owner transactions): There were approximately 5 comparable sales during the prior 7-12 month time period (6 months) and approximately 21 comparable sales reported within the most recent 6 months. There are only about 2 comparable active listings located in the neighborhoods described above. The average time on the market for most comparable sold properties and active listings is near or less than 90 days. Low inventory and short marketing time periods are indicators of a strong market.

9162 SKWOOD LANE 2023 PROPERTY TAX APPEAL TO BOE

I purchased my home at 9162 Skywood Lane in June 2016. Since that time, I have noticed the City and Borough of Juneau's Assessor's office has a pattern of unusually high property value assessments for my house. I have appealed the assessment on my house four times since I purchased the home; previously, the home's assessment was reduced after the appeal. One of my conversations with the assessor revealed the assessor admitted the City had made an error in the calculation of my home's value. I believe this error has been made again in the 2023 tax assessment.

TAX ASSESSMENT HISTORY FOR 9162 SKYWOOD LANE

2016 CBJ tax assessment: \$449,200

Home purchased in June 2016: \$435,000 (\$14,200 below the assessed value)

2017 CBJ tax assessment: \$463,900

Since the 2017 tax assessment was \$28,900 over the purchase price from six months earlier, I appealed the 2017 CBJ tax assessment. I provided CBJ with the assessment I paid for when I purchased it, as well as sale documentation showing the sale price of the home in 2016.

The revised 2017 tax assessment was set at \$444,400

2018 CBJ tax assessment: \$451,200

2019 CBJ tax assessment: \$462,600

I appealed the 2019 tax assessment (2019 appeal attached). In a discussion with the CBJ tax assessor, I was informed there was a calculation error in determining my property's value. The tax assessment for my property was corrected and revised.

The revised 2019 tax assessment: \$448,400

2020 CBJ tax assessment: \$461,600 2021 CBJ tax assessment: \$469,800

2022 CBJ tax assessment: \$558,400

I appealed the 2022 tax assessment (2022 appeal attached). I again brought up the same issues and comparisons from 2019. The CBJ assessor Arthur Drown contacted me and admitted there was another calculation error on my property:

"I have reviewed your property and I did find an error in our assessment, as I am sure you are aware, building costs skyrocketed this past year. Our assessments are based in a building cost approach, as building costs increase and the base replacement cost of structures in the Borough increase we are supposed to adjust certain homes into a new market bracket as that cost growth reaches a certain threshold. Your home was one of the many that moved into this threshold Borough wide, but it appears we failed to move you in to the correct market comparison bracket. I have corrected this error. Overall, we canvassed your neighborhood this past summer and reviewed the exterior of your home and information on file."

The revised 2022 tax assessment: \$513,800

2023 tax assessment: \$635,100

HOME FACTS

-Home built in 1977
-3-bedroom, 3 bathroom
-House Size: 2,308 square feet
-Lot Size: 8,498 square feet
-2 story structure (no outbuildings)

COMPARABLE PROPERTIES

When finding properties to compare with my house located at 9162 Skywood Lane, I used homes built between 1976-1980. Homes built within this time frame were built similarly, with the same size bedrooms, home features, etc.

I also used homes that were of the same approximate size, within 250 square feet of living space, and two-story homes. Additionally, the homes had lot sizes of similar size.

Lastly, comparable homes were selected in the same area as my home; most homes are located within a few blocks of my house. This is important as home valuation can change based on location.

Below is the list of properties that have been used to compare my property with the CBJ assessor since 2019. Prior to submitting this list of properties to the CBJ as comparable, I had a local real estate professional review the properties to ensure they were a fair comparison. Both the real estate professional and, later, the CBJ tax assessor agreed the following list of properties was a fair and accurate list of comparable properties.

Since 2019, the same list of properties has been used to compare property valuation against my home value. Using these properties for the past five consecutive years to compare valuations has set a past practice precedent.

Address	Year Built	Living Space	Bedroom/Bath	Lot Size
9162 Skywood Lane	1977	2,308 sqft	3 bed/3bath	8,498 sqft
3101 Riverwood Drive	1978	2,347 sqft	4 bed/ 3 bath	10,255 sqft
9166 Skywood Lane	1978	2,596 sqft	5 bed/ 3 bath	8,498 sqft
9163 Parkwood Lane	1979	2,358 sqft	3 bed/ 3 bath	9,945 sqft
9171 Parkwood Lane	1978	2,244 sqft	4 bed/ 2 bath	9,934 sqft
9158 Parkwood Lane	1978	2,345 sqft	4 bed/ 3 bath	8,596 sqft
9166 Parkwood Lane	1978	2,394 sqft	5 bed/ 3 bath	11,315 sqft

COMPARABLE PROPERTY TABLE

Address	CBJ	Realtor.com	Difference	Percentage
9162 Skywood Lane	\$635,100	\$570,882	+\$64,218	+10%

9166 Parkwood Lane	\$578,900	\$602,238	-\$23,338	-4%

2023 PROPERTY VALUATION COMPARISIONS

Address	CBJ	Zillow	Difference	Percentage
9162 Skywood Lane	\$635,100	\$585,200	+\$49,900	+8%
3101 Riverwood	\$583,000	\$591,700	-\$8,700	-1%
Drive				
9166 Skywood	\$689,800	\$577,200	+\$112,600	+16%
Lane*				
9163 Parkwood Lane	\$588,500	\$629,900	-\$41,400	-7%
9171 Parkwood Lane	\$576,600	\$652,400	-\$75,800	-13%
9158 Parkwood Lane	\$540,900	\$564,300	-\$23,400	-4%
9166 Parkwood Lane	\$578,900	\$613,400	-\$34,500	-6%

*Note owner of 9166 Skywood Lane filed a late appeal to their property assessment. The owner stated the reason for the tardiness of their appeal was due to medical/hospitalization issues they experienced in early 2023. The owner added they plan on filing another appeal in 2024 as they believe their property was valued excessively high.

It is important to note that automated valuation model (AVM) estimates provided by Zillow, Realtor.com, Redfin, Trulia, etc., may not represent the true value of a home and instead use metadata compilations to determine property value. The AVM is used in my comparison only as a tool to show the difference in valuation between the comparable homes in my area. Automated estimates are generally quite accurate; in 2020, Forbes reported the AVM error rate was below 4%. 2023 Zillow reports their AVM error rate of onmarket homes at 1.9% and off-market homes at 6.9%.

By using the charts above, you can see that the CBJ tax assessment value of the homes in the chart is generally below the AVM estimated value. The difference in valuation between the AVM and CBJ values averages 5%; the difference in my home's valuation is almost twice as much at 9%.

The AVM charts above show the valuation between the CBJ tax-assessed values and the AVM values and indicate my home is valued twice as high as its peers.

Again, AVM valuations are only being used to show trends and not actual property valuations. Next, I will use the City's own data to show the difference in property valuation when compared to my home.

"A rising tide raises all boats."

This metaphor can be used to explain Juneau's housing market. Housing prices have increased over the years, and while this may be true, the tide should raise the boats equally and at the same rate, especially those in the same harbor. This is the principal part of my petition with the City of Juneau: my house valuation shall rise and fall at the same rate as the comparable homes in my immediate area. I assert that my home's tax assessment has not fallen in line with the comparable homes in my area. In 2019 the City of Juneau admitted a calculation error was to blame for the inequitable increase in my home's value. I believe this same error is the reason for the overvaluation of my property in 2023. The below chart demonstrates the unequal rise in property valuation:

Address	CBJ 2022 Value	CBJ 2023 Value	Difference	Percentage
9162 Skywood	\$513,800	\$635,100	\$121,300	+24%
Lane				
3101 Riverwood	\$513,300	\$583,000	\$69,700	+14%
Drive				
9166 Skywood	\$551,300	\$689,800	\$138,500	+25%
Lane*				

9163 Parkwood	\$516,800	\$588,500	\$71,700	+14%
Lane				
9171 Parkwood	\$508,200	\$576,600	\$68,400	+13%
Lane				
9158 Parkwood	\$475,000	\$540,900	\$65,900	+14%
Lane				
9166 Parkwood	\$512,100	\$578,900	\$66,800	+13%
Lane				

The above chart shows my property valuation rose by 24% while the rest of the comparable homes increased by an average of 14%.

I request the Board of Equalization honor my request to reduce the 2023 assessed value of my property to match the increase of the comparable homes in my immediate area.

PREVIOUS TESTIMONY BY CBJ ASSESSOR DURING PAST BOE MEETING

During the previous BOE meeting, the City Assessor referenced a chart showing a timeline of assessed values for my property dating from 2016 to the present. In his statement, the assessor indicated that my property assessments had fallen a few times, indicating an ebb and flow of market valuations. While I believe the assessor believed in what he was saying at the time, he was mistaken in his testimony: the decrease in valuations was due to corrections made by the assessor's office. My property was overvalued and corrected on three separate occasions in the past seven years.

Each of the corrections is detailed in the attached documents. Each of the corrections made to my property's value was due to an incorrect valuation made by the assessor's office. In 2019 the City Assessor stated this incorrect valuation was due to a calculation error on the city's part.

CONCLUSION

In 2023 the City of Juneau Assessor's office made an error by assessing the value of my property that was excessive and unequal to similar properties. Additionally,

due to previous conversations with the city assessor's office, I believe the incorrect value is based on an improper/incorrect calculation.

I humbly request my property be assessed at the fair and reasonable value as follows:

Site: \$129,700 Building: \$445,765 Total: \$575,456

) Ato Serth

Scott Carson 9162 Skywood Lane Juneau, AK 99801

2019 PROPERTY TAX APPEAL

City & Borough of Juneau (CBJ) Property Assessor,

I am disputing the 2019 tax assessment for my residence at 9162 Skywood Lane. I believe my property is has been overvalued by the City of Juneau for property tax purposes. I have come to this conclusion primarily based upon CBJ's assessment of my home compared to similar homes in the same area.

I researched homes in the same area as my home; I used a few factors to find similar homes:

-Year built (all homes compared were built within 2 years of my homes manufacture date)

-Square footage of the residence (homes must have no more difference +/- 200 square feet)

-Homes with a garage (my home has a garage)

-Lot size (homes must have similar lot size)

-Similar number of rooms (to include similar number of bedrooms)

-Similar features as my home.

Using this criteria I found 7 homes in my immediate area (most are located in my neighborhood) that I used for comparison. They are:

- 1) 9166 Glacierwood Drive
- 2) 3101 Riverwood Drive
- 3) 9166 Skywood Lane
- 4) 9163 Parkwood Drive
- 5) 9171 Parkwood Drive
- 6) 9158 Parkwood Drive
- 7) 9166 Parkwood Drive

I have included attachments of each home that I used for comparison.

The reason I chose homes that were in my immediate area as I felt this was the most honest way to compare homes. All of the homes selected will either appreciate in value for the same reasons (such as local improvements in the neighborhood, decrease in crime etc.) or they could depreciate in value for the same reasons (such as condemned properties, increase in crime rate, area eye sores etc.)

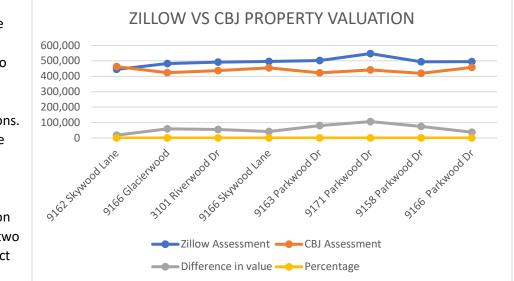

I also looked each of the properties up on Zillow and on Trulia to compare the values that Zillow and Trulia assigned for each of the properties in comparison to the valuation that CBJ assigned to each property. Zillow, Trulia and CBJ use different metrics when evaluating properties for value, however this is still valuable information since it can be used to compare each property. As long as Zillow, Trulia and CBJ are consistent in how they evaluate each property the differences in values should also be consistent. I found that Zillow and Trulia assigned a higher value to each property compared to the value that CBJ assigned, however the valuation was for the most part consistent except for my property (more on this later).

House	Zillow	CBJ Assessment	Difference in value	Percentage
	Assessment			
9162 Skywood	444,763	462600	17837	-3.85%
Lane				
9166 Glacierwood	482176	423300	58876	+13.90%
3101 Riverwood Dr	491934	437200	54734	+12.51%
9166 Skywood	495847	454500	41347	+9.09%
Lane				
9163 Parkwood Dr	502838	422700	80138	+18.95%
9171 Parkwood Dr	547229	441000	106229	+24.08%
9158 Parkwood Dr	494435	419300	75135	+17.91%
9166 Parkwood Dr	494695	457600	37095	+8.10%

Below is a list of the home values (including my home) as listed by Zillow and CBJ:

By comparing the homes I found that Zillow on average valued the homes 13.5% higher than CBJ. One home was even valued at \$106,229 over the CBJ assessment!

The point of comparing the Zillow vs CBJ valuations is to show the consistency in home valuations. As you can see there is a predictable difference in home valuation between the two sources. In fact you can

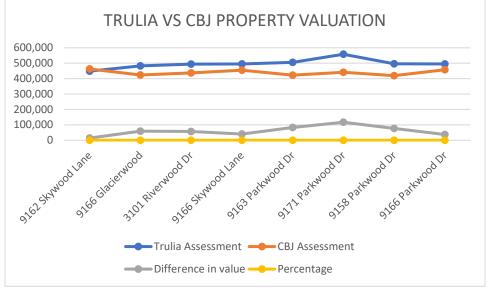

randomly select homes in the Juneau area on Zillow subtract 13.5% of the Zillow estimate and you will usually come close to finding the CBJ assessed value of the home. However, this predictable value does not apply to my home. In the chart above, my home is valued by CBJ 3.85% over the Zillow valuation. There is no obvious reason for this discrepancy other than a possible error by CBJ in how it calculated my homes value.

House	Trulia Assessment	CBJ Assessment	Difference in value	Percentage
9162 Skywood	448,341	462600	14259	-3.08%
Lane				
9166 Glacierwood	482,479	423300	59179	+13.98%
3101 Riverwood Dr	493979	437200	56779	+12.98%
9166 Skywood	495337	454500	40837	+8.98%
Lane				
9163 Parkwood Dr	505255	422700	82555	+19.53%
9171 Parkwood Dr	558007	441000	117007	+26.53%
9158 Parkwood Dr	496535	419300	77235	+18.41%
9166 Parkwood Dr	495337	457600	37737	+8.24%

Next, I looked each home up on Trulia to determine the value that Trulia gave for each property. The properties are:

Trulia valued the properties differently than CBJ and like Zillow, Trulia valued the properties on average higher than CBJ (except for my property). I also found there were differences in the valuation of the properties between Zillow and Trulia, but these differences were consistent and predictable.

Again, in the Trulia vs CBJ property comparison you can see there is a predictable and consistent valuation difference between the properties except for my home. Trulia on average valued the homes 13.96% higher than CBJ. Again, if

you search on Trulia's web page for Juneau home values you can take the Trulia valuation subtract 14% of the property's value and you will predictably come close to the CBJ assessment.

I am not suggesting that CBJ adopt Trulia or Zillow's property values, but I am suggesting that by using Trulia and Zillow you can predictably determine a home's value and while they are different than the CBJ property valuation they are predictably different.

Both Trulia and Zillow have valued my home at approximately 3.5% lower than the CBJ valuation despite all other homes valued by Trulia and Zillow are on average 14% higher than the CBJ valuation.

I am requesting that my home's property value be reassessed by CBJ to more closely match comparable properties in my surrounding neighborhood.

I have estimated the value of my property that I believe is more consistent with comparable properties in the surrounding area. My estimate is as follows:

Site value is **\$123,700**. I came to this value because this is the same value that CBJ assessed of my next door neighbor's site value (9166 Skywood). Both of our properties of the exact same size (8498 square feet) and both lots being identical and adjacent should share the same valuation. This equates to \$14.55 per square foot.

Building value is **\$292,989**. I came to this value because it is close to the value of my next door neighbor's building value (9166 Skywood). Both my home and my neighbor's home were built at the same time and by the same builder and are of similar design and quality.

9166 Skywood has 2596 square feet of livable area in the home and this equates to \$127 per square foot.

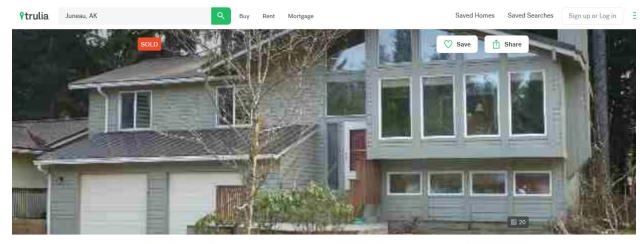

My home has 2307 square feet of livable area in the home and using \$127 per square foot to determine building value equates to \$292,989.

The sum of the building value and site value bring the total value for my property to **\$416,698**.

This is a decrease from the purchase price of \$435,000 that I paid on 6/3/16 but is what I feel a true reflection of the property value.

In conclusion, I believe CBJ has incorrectly determined the value of my home. I have shown that my home's value as determined by CBJ is vastly different than every single home sampled in the same area. Both Zillow and Trulia are commercially acceptable references in determining property values in the United States. Both Zillow and Trulia show a consistent valuation to both each other and CBJ. By using Zillow and Trulia you can see that my home has a valuation that is not consistent with other properties in my immediate area.

By amending the price of my property to the above recommended values this will bring my property more in line with the neighboring properties. This valuation is within 7.5% of Zillow and Trulia property assessments. Even at this new valuation the property is well below the 14% price difference average that I observed between Trulia and Zillow. I believe this to be fair and equitable.

2022 PROPERTY TAX APPEAL

City & Borough of Juneau (CBJ) Property Assessor,

I am disputing my 2022 tax assessment for my residence at 9162 Skywood Lane. I believe my property has been overvalued by the CBJ. CBJ increased the value of my property by \$89,600 between the years 2021 and 2022. This increase is not consistent with not only my property value but the property values in my neighborhood.

In 2019, CBJ increased the value of my home disproportionately with similar homes in my neighborhood. In 2019 I disputed the tax assessment and provided a market place analysis of several similar homes in my area, that resulted in a lowered adjustment to my property assessment. I can provide a copy of that market place analysis if needed.

I will use the same properties this year as in 2019 to compare to my home; they are all built within the same two-year period and have approximately the same square footage as my home.

I believe CBJ made an error in assessing my property and I would appreciate CBJ revaluate my assessment. I agree that property values tend to increase over time, but the properties should increase in a consistent manner.

There are six properties that are similar to mine:

- 3101 Riverwood Drive (\$163 square foot)
- 9166 Skywood Lane (\$164 square foot)
- 9163 Parkwood Drive (\$171 square foot)
- 9171 Parkwood Drive (\$168 square foot)
- 9158 Parkwood Drive (\$165 square foot)
- 9166 Parkwood Drive (\$158 square foot)

In 2022 the above listed homes have an average building value of \$164 per square foot. This is the value that CBJ assessed those home at for 2022, it is only appropriate that my home is assessed at the same valuation. If CBJ assesses my property at a different valuation, I request the CBJ to provide the methodology of how my home was valued.

I believe the 2022 property tax valuation of my home is as follows:

Land Assessment: \$123,700 Building Assessment: \$378,348 Total Assessment: \$502,048

This adjusted assessment reflects an increase of \$32,248 from 2021. This assessment is a fair and consistent property value for 2022.

Hi Scott,

Can you please clarify if you are saying you accept the original valuation thus withdrawing your appeal, or if you want to accept the revised valuation of:

Period	S/V	MISC	MISC I/V	
2017 Asmt	\$133,100	\$3,000	\$327,800	\$463,900
2017 Proposed	\$133,100	\$3,000	\$308,300	\$444,400

Please let me know and I can initiate the adjustment if needed.

Gmail - APL 2017-0027 5B2101090050 Carson

Sorry for the confusion, what I mean to say is I do not object to the revised (lesser amount) appraisal.

I do not agree to the original appraisal and that is why I submitted documentation showing the purchase price and recent appraisal.

Thank you for your time on this.

1 message

Arthur Drown <Arthur.Drown@juneau.org> To: "scott.carson54@gmail.com" <scott.carson54@gmail.com> Tue, Apr 12, 2022 at 12:02 PM

Good morning Scott,

I have reviewed your property and I did find an error in our assessment, as I am sure you are aware, building costs skyrocketed this past year. Our assessments are based in a building cost approach, as building costs increase and the base replacement cost of structures in the Borough increase we are supposed to adjust certain homes into a new market bracket as that cost growth reaches a certain threshold. Your home was one of the many that moved into this threshold Borough wide, but it appears we failed to move you in to the correct market comparison bracket. I have corrected this error. Overall, we canvassed your neighborhood this past summer and reviewed the exterior of your home and information on file. We can see that you are keeping your home maintained since your purchase in 2016. Some new windows back in 2017 and a new boiler in 2020, so I think it is safe to say that the exterior of your home is a decent reflection of the overall condition and upkeep. After my thorough review of all recent information available to our office, the market adjustment error appears to be the only error made. As such, I recommend the following change to your 2022 Assessment:

2022 Assessment: Site: \$123,700 Improvements: \$434,700 Total: \$558,400

2022 Proposed: Site: \$123,700 Improvements: \$390,100 Total: \$513,800

If you would like to accept this proposed change, please respond by email stating so. Upon receipt of your acceptance I will take this to the Assessor for approval, at which point a letter of correction will be issued. If you reject these proposed changes, I will schedule the case for the next available Board of Equalization and you will be notified of the date.

Thank you for your time,

Arthur Drown

Comparable Properties

Arthur Drown <Arthur.Drown@juneau.org> To: "scott.carson54@gmail.com" <scott.carson54@gmail.com> Tue, Apr 12, 2022 at 4:17 PM

Scott Carson <scott.carson54@gmail.com>

Scott,

I am going to have you focus on the "Building value Summary Effective Rate" box in these per unit cost breakdowns of your structure and your comps below. I have marked a couple of them as GOOD COMP because they are, in your system, being considered the same quality of construction as yours, which is a big factor in per square foot discrepancy and one of the details of our model that can skew the generalized assessed value/square footage you have conducted. Of these other two above average quality comparable properties, I would also encourage you to notice that 1) you have the highest percent depreciation applied 2) you have the lowest effective rate at \$111.24 vs \$132.12 and \$116.86 respectively and 3) with my correction of the market adjustment, you have the lowest "Neighborhood" adjustment applied of these 2 comps by far. This indicates to me that we are accounting for the needs your home has, like the deck replacements you mentioned, older roof and siding issues.

Also notice that, after my adjustment, the increase in your assessed value 2021 to 2022 is one of the lowest, especially so when compared to the other comps that are of the same quality rating.

I hope this provides some clarity and understanding of generalized mass appraisal as an approach to estimating full market value.

Scott,

I am going to have you focus on the "Building value Summary Effective Rate" box in these per unit cost breakdowns of your structure and your comps below. I have marked a couple of them as GOOD COMP because they are, in your system, being considered the same quality of construction as yours, which is a big factor in per square foot discrepancy and one of the details of our model that can skew the generalized assessed value/square footage you have conducted. Of these other two above average quality comparable properties, I would also encourage you to notice that 1) you have the highest percent depreciation applied 2) you have the lowest effective rate at \$111.24 vs \$132.12 and \$116.86 respectively and 3) with my correction of the market adjustment, you have the lowest "Neighborhood" adjustment applied of these 2 comps by far. This indicates to me that we are accounting for the needs your home has, like the deck replacements you mentioned, older roof and siding issues.

2023 Property Assessment Petition

14 messages

Scott Carson <scott.carson54@gmail.com> To: Assessor.Office@juneau.gov Wed, Mar 15, 2023 at 9:10 AM

Wed, Mar 15, 2023 at 9:33 AM

City Property Assessor,

I am petitioning my 2023 property assessment. I believe the estimate CBJ conducted on my property (9162 Skywood Lane) contained errors and is incorrect. Please find the attached letter detailing my petition.

Respectfully,

Scott Carson 9162 Skywood Ln, Juneau, AK 99801

Aaron Landvik <Aaron.Landvik@juneau.gov> To: Scott Carson <scott.carson54@gmail.com>

Good morning,

This e-mail is to serve as confirmation that we have received your petition for review for the 2023 Assessment year. Your petition has been assigned to an appraiser who will contact you regarding the process.

We are currently working through a significant backlog primarily within the residential segment and will process the petitions in the order in which they were received.

All supporting evidence must be provided to the Assessor Office no later than April 18th per CBJ ordinance.

https://library.municode.com/ak/juneau/codes/code_of_ordinances?nodeId=PTIICOOR_TIT15AS

State statute requires that the burden of proof rests with the appellant. Appellants are expected to provide specific evidence which indicates that their property valuation is one of the following:

EXCESSIVE – To show that an assessment is excessive, an appellant must show that the assessment is more than just overvalued. It must be shown that the assessment is grossly disproportionate when compared to other assessments (or, it can be shown that there is an intentional or fraudulent purpose to place an excessive valuation on the property.)

UNEQUAL – To show that an assessment is unequal, the appellant must show that there are other properties in the same class as the property being appealed and that there is no basis that would justify different valuations of the property.

Wed, Mar 15, 2023 at 10:07 AM

Wed, Mar 15, 2023 at 10:35 AM

Tue, Mar 28, 2023 at 11:55 AM

Wed, Mar 15, 2023 at 10:39 AM

IMPROPER – To show that an assessment is improper, it must be shown that the assessor used an improper method of valuation, which amounts to fraud or a clear adoption of a wrong principle of valuation.

UNDERVALUED - Rare, but yes it does happen from time to time.

Only the reasons above are considered valid reasons for an appeal.

I have included the evidence that you provided when submitting the petition for review. If possible, can you try to track down a copy of your purchase appraisal from 2016? When the property was re-financed in 2021 and 2022, was an appraisal performed? How was a value determined to secure the loan?

This link provides information from the State of Alaska regarding the appeal process. Property Assessments in Alaska, Local Government Online, Division of Community and Regional Affairs

These handouts explain the assessment process. https://juneau.org/wp-content/uploads/2020/12/Understanding-Assessment.pdf https://juneau.org/wp-content/uploads/2020/12/For-the-Property-Owner-Who-Wants-to-Know.pdf

Good morning,

I am the appraiser assigned to process your petition for review.

In looking the record over, it appears that the property was refinanced in 2021 and in 2022. Was an appraisal performed at that time? If so, can you please provide me with the appraisal?

Can you please provide me with recent interior photos of the common areas within the house (kitchen/bathrooms/living rooms/etc)? This will allow me review the condition of the property and consider the depreciation we have applied to the property.

Kind regards,

Aaron

Good morning,

I am the appraiser assigned to process your petition for review.

In looking the record over, it appears that the property was refinanced in 2021 and in 2022. Was an appraisal performed at that time? If so, can you please provide me with the appraisal?

Can you please provide me with recent interior photos of the common areas within the house (kitchen/bathrooms/living rooms/etc)? This will allow me review the condition of the property and consider the depreciation we have applied to the property.

Kind regards,

Aaron

Aaron Landvik

Deputy Assessor

Assessor's Office

City and Borough of Juneau, AK

Scott Carson <scott.carson54@gmail.com> To: Aaron Landvik <Aaron.Landvik@juneau.gov>

Hi Aaron.

I did not refinance my home in 2021 or in 2022. I refinanced my home in 2020 and there was not an appraisal for the refinance.

I have not made any recent improvements to my home.

I have a question about your requests for additional information: The Assessor's Office has already assessed my property and as I indicated in my original email that I noticed my assessment increased at twice the amount of my comparable homes. What data was used to determine that assessment?

Additionally, has everyone in Juneau provided the city with pictures of the inside of their homes?

Just so I understand what is being asked: Am I being directed to provide the City of Juneau photos of the interior of my home to the city in order to receive an assessment?

I think I need some more information from you before I can understand how the City has come to the assessed value of my home.

Respectfully, Scott Carson

Good Morning,

Attached is my supporting document for my property assessment dispute. Since I have not heard back from you, I assume the city is not interested in answering any of my questions from my last email. Please feel free to contact me with any questions.

Respectfully, Scott Carson

Aaron Landvik <Aaron.Landvik@juneau.gov> To: Scott Carson <scott.carson54@gmail.com>

Hi Scott,

Sorry about the delay in getting back you.

Our job is to appropriately assess all taxable property within the borough. As part of that process, a consideration of the condition and quality of the interior can be very helpful. We are requesting either interior photos or a site visit for all appellants.

Previous valuation methodology had segmented SFRs into a normal bucket and a high value bucket. The threshold for inclusion was a base building value >\$350,000. The rationale behind this was that more expensive homes faced a different market than is typical. In reviewing the data, we made the decision to remove the high value designation as it was no longer supported by market evidence. This is the reason why your % change was greater than other properties.

Within the State of Alaska, the appellant bears the burden of proof. My job is to review the information that you have provided, if you choose to not provide the information then I will work with what you have provided.

The last 3 years have seen unprecedented growth in the residential market.

For years 2016-2020 I estimated growth at 3%/annum. For years 2020-2022 we estimated change at about 10%/annum.

	%Chg	Value
4/22/2016		435,000
1/1/2017	2%	443,700
1/1/2018	3%	457,011
1/1/2019	3%	470,721
1/1/2020	3%	484,843
1/1/2021	10%	533,327
1/1/2022	10%	586,660
1/1/2023	10%	645,326

Our market analysis indicates a time trend of about 9.8%/annum. This is supported by recent purchase appraisals which are utilizing a time adjustment factor of 0.75%/mo, approx. 9.5%/year (attached). This is supported by recent appraisals which utilized a 0.75%/mo factor (approx.

9.5%/annum).

Additional anecdotal evidence from the FRED Median US Housing price indicates a roughly 42% increase since 2020 which calculates out to about 12%/annum.
