Proposal for Memorial Bench for Steve Wolf

Location: The approved location by the Board and desired by the family is at the Lower Nordic Loop Meadow. Slightly in from the pull out parking by the rock-there is flat meadow ground there. This will be accessible from the parking area to accommodate individuals with limited mobility.

Design:

Two Design proposals are included. The approved bench will include a roof to provide protection and seating for nordic skiers and hikers all year round.

Design 1:

7ft x 7xft footprint open timber frame structure using 4" x 4" cedar timber for framing.
Gravel pad (graded for accessibility) with concrete footings for the structure
Free standing wooden bench - Reference images provided for preliminary bench design
Metal roof with a 4/12 pitch for all weather protection

Design 2:

10ft x 8ft footprint timber frame construction using 6" x 6" timbers (hemlock or spruce)
Gravel pad (graded for accessibility) with concrete footings for the structure
Metal roof with a 4/12 pitch for all weather protection
3 walls provide wind and weather protection
Potential for a design element utilizing recycled skis on two side walls
Horseshoe bench seating built into the structure

Design and construction by **Travis Clark Morris**

Consult with **Dave Hanna** regarding gravel and concrete footer recommendations for location

Timelines:

To be completed by October, 2024

Coordinate with other eaglecrest improvement projects to lay the gravel pad in late August/early Sept.

Costs:

Costs will be covered by the Steve Wolf memorial funds held with the Juneau Community Foundation and family.
