Re: Extraterritorial Review – Wolfinger Subdivision – Phase 1

Mach IV has submitted a preliminary plat of Wolfinger Subdivision, on behalf of the developer. The preliminary plat shows a draft for the entire subdivision with 207 single family lots. The review being looked at today, by the Plan Commission, will only be for Phase 1 of the development (shown on the attached plat map).

Phase 1 has 61 single family homes and a 1.5 acre stormwater pond (outlot 3). The lots are all roughly a third of an acre and have street frontages from 84' to 137.6'. Phase 1's lot size and use fits into the larger residential region south of County Highway CE, with residential neighborhoods to the east, west and south. The road configurations allows for proper traffic circulation and provides three intersections to enter or exit the subdivision.

Recommendation:

Approval of Phase 1 Extraterritorial Review, Wolfinger Subdivision and recommend the same to the Common Council with the following conditions:

- Additional phases of the subdivision submit a plat for extraterritorial review by the City of Kaukauna.
