Re: Hold Harmless Agreement – Fox Valley Technical College

The Kaukauna Fire Department has had a long-standing agreement with the Fox Valley Technical College to utilize their state-of-the-art training facility. This training ground provides our firefighters with invaluable hands-on training opportunities that we do not have access to at our own facility.

Each year, we renew the attached hold harmless agreement to continue utilizing their burn building, training props, and other resources. These hands-on training opportunities are vital for our firefighters to maintain their skills and readiness to serve our community.

I'm asking for authorization to enter into this agreement for 2024.

Chief Jake Carrel

Left: Our firefighters practicing fast deployment of water using an elevated stream with limited manpower.

Right: We often conduct joint training with other departments at the college to ensure seamless teamwork if/when mutual aid is needed. Here we are working with Grand Chute and Fox Crossing.
