Agenda Item 2d

RFP – Park Development at Inside the Park Place

Background

The Inside the Park Place development was laid out as to accommodate a large recreational facility for the City of Kaukauna. Staff has been meeting internally and starting discussions with other groups to identify the needs we would like to address with this facility. Engineering Department would work with the Community Enrichment Service Director and Street/Park Departments to seek proposals for the design of this parkland. We anticipate meeting with youth sports groups and engaging the public as part of the design process.

Recommended Action

Authorize Director of Public Works to seek proposals for the Park Development at Inside the Park Place.
