Re: Kaukauna Utilities' Request to Install Flashing Pedestrian Crossing Signs

Background information:

Kaukauna Utilities has requested to purchase, install, and maintain a set of flashing pedestrian crossing signs for the mid-block crossing on Island Street (See map and image attached) The KU safety committee has recommended enhancements to the crossing which mainly serves KU employees accessing the employee parking area. Prior to this recommendation, standard crossing signs, a centerline pedestrian sign, and enhanced lighting have been implemented. Other options have been considered.

Strategic Plan: The addition of the flashing signs can be a safety enhancement at a crossing with current safety concerns. The main benefit will be to KU employees, but the public may use the lights also.

Budget: NA

Staff Recommended Action:

Permit KU to purchase, install, and maintain flashing pedestrian crossing signs in the Island Street right-of-way.
