Re: 3-24 Alley Paving Project

Background information:

The Engineering Department has reviewed one bid from Vinton Construction Company, received on May 1st, 2024, at 4:00PM for the 3-24 Alley Paving Project. The Engineering Department received one bid this year and looked to compare this bid to various past projects to look for consistency and fair pricing.

After reviewing, the Engineering Department has identified one Alternate Bid Item and some possible change orders to reduce project cost.

Strategic Plan:

This project will increase visitors and activities in the downtown area by creating plazas suitable for small gatherings and events.

Budget: Total budget for all improvements in the downtown area associated with the alley project was estimated at \$830,000.

Staff Recommended Action:

- 1) Award Project 3-24 Alley Paving Project to Vinton Construction Company, Two Rivers, WI for a total bid price of \$570,776.90, replacing the concrete raised planters with the modular block alternate (Alternate AA).
- 2) Direct staff to investigate additional cost savings with the contractor.
