REFERENCE ID: FAD 21537

Subject: City of Kaukauna – Fieldcrest Drive Tributary Floodplain Analysis

Mr. Neumeier:

The Department of Natural Resources has completed its review of the floodplain analysis requested by the City of Kaukauna on August 4, 2026. This analysis, received September 17, 2026, was prepared by John Davel of Davel Engineering and Environmental Inc., and evaluates the existing conditions a tributary to Garner's Creek. It incorporates improved data that was not available when the waterway was originally mapped. The analysis was conducted on behalf of the City of Kaukauna for the project located in Section 35, T21N, R19E, City of Kaukauna, Outagamie County.

The tributary to Garner's Creek (WBIC: 5021989) is currently mapped as an approximate Zone A floodplain. The floodplain analysis was completed to determine floodway, flood fringe, and establish base flood elevations for the study area.

Based on our review, this study meets the standards outlined in NR 116 and is hereby approved by the Department. Please note that a Letter of Map Revision (LOMR) must be submitted to and approved by FEMA before the updated data can be used for regulatory purposes.

This approval pertains solely to the requirements of NR 116 and does not exempt the applicant from complying with any other applicable Federal, State, or Local requirements. If you have any questions regarding this approval, please contact me at ryan.pichler@wisconsin.gov or (920) 769-6234.

Sincerely,

Ryan Pichler
Water Management Engineer
