Re: 2c - Strassburg Park Improvements Plan

Background information:

Staff is completing playground updates, evaluating potential layouts, and different equipment/amenities available for Strassburg Park. Attached is a proposed layout of the park with possible updates noted.

Strategic Plan:

This playground project and these possible additions, bring a much-needed update to an underutilized park. The project will be improving quality of life, increasing park usage, and will help work toward being a community of choice.

Budget: The additional updates were not budgeted for in 2025. Possible funding sources could be Park Funds earmarked by Common Council earlier this year, Red Hills Tipping Fee account, additional capital borrowing, or a combination of any funds. City staff would propose to maximize our use of the funds by utilizing our skilled Public Works crews to perform most of the work at the park.

Staff Recommended Action:

To be determined based on discussion.
