Re: **2b) Proposed Traffic Control Signage – Various Locations**

### Background information:

Please see attached drawings.

The traffic volume is/will be increasing at several intersections in the City and completion of various subdivision phases and reconstruct projects has led to the need for additional traffic control. The Engineering Department is proposing the installation of "Yield" and "Stop" signs which would help assign the right of way at these intersections.

The City maintains an official traffic map that indicates the location of all stop and yield signs (Sec. 7.03). The common council may make additions or deletions to the map from time to time.

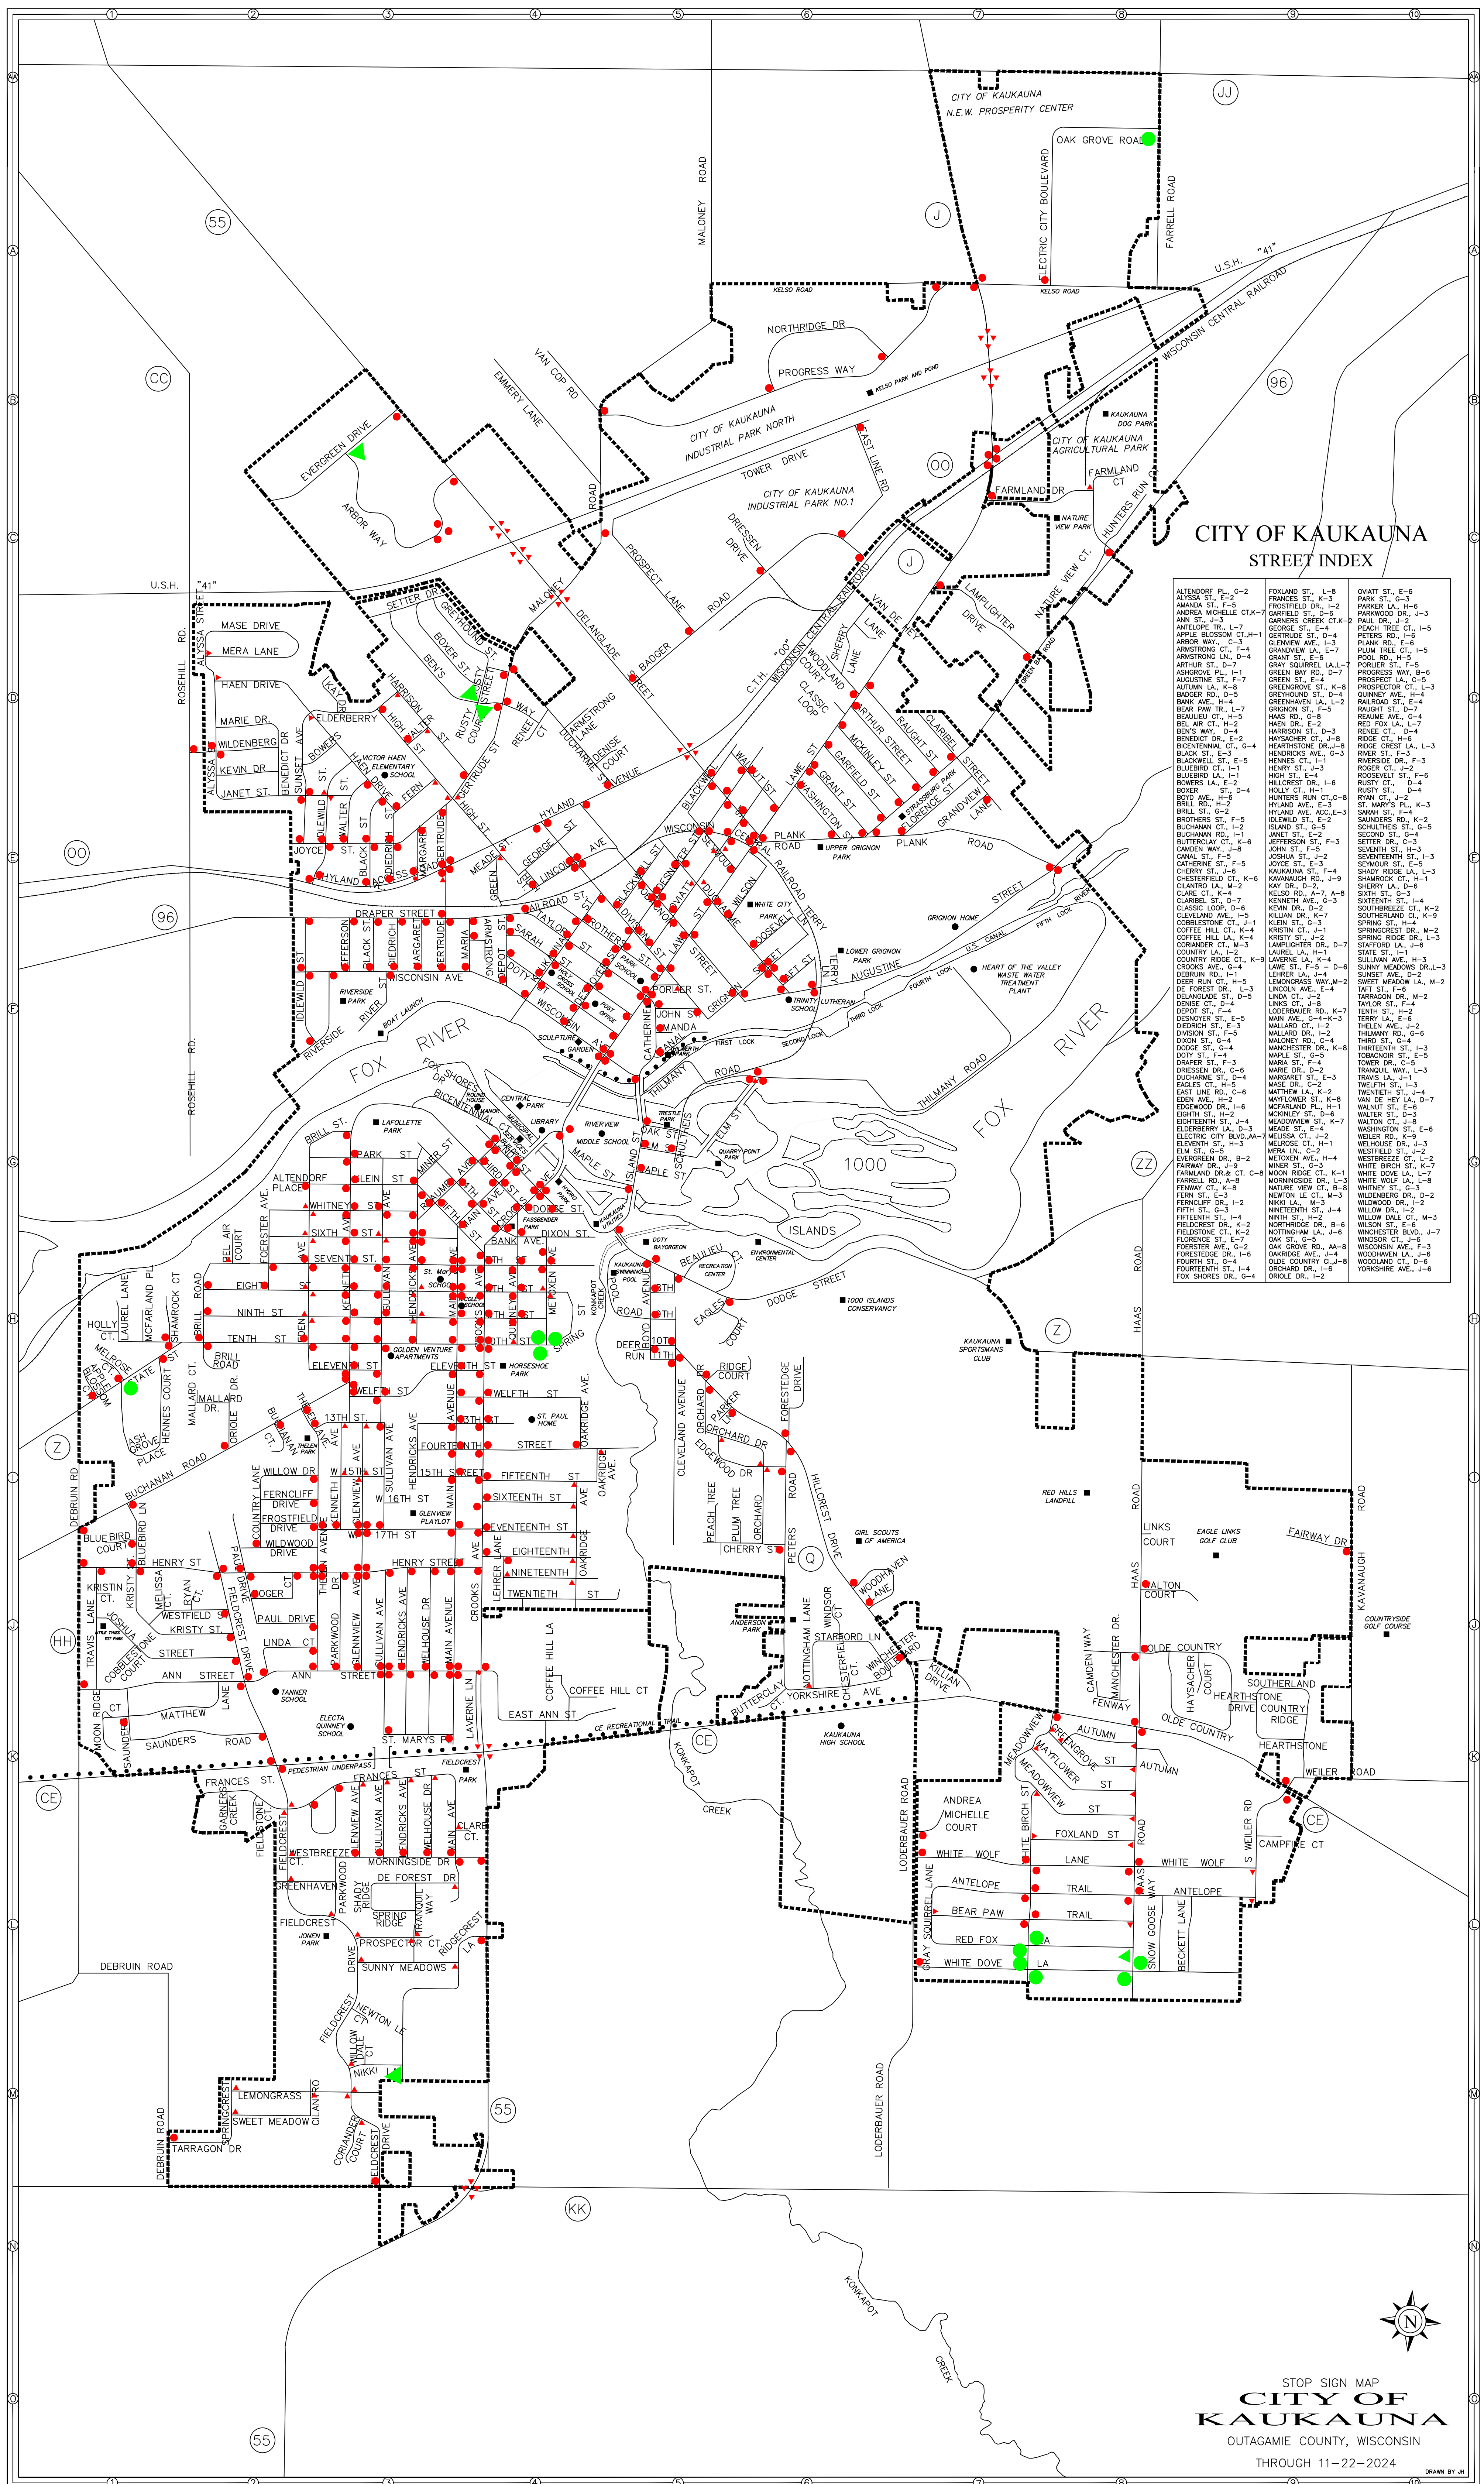

### Strategic Plan:

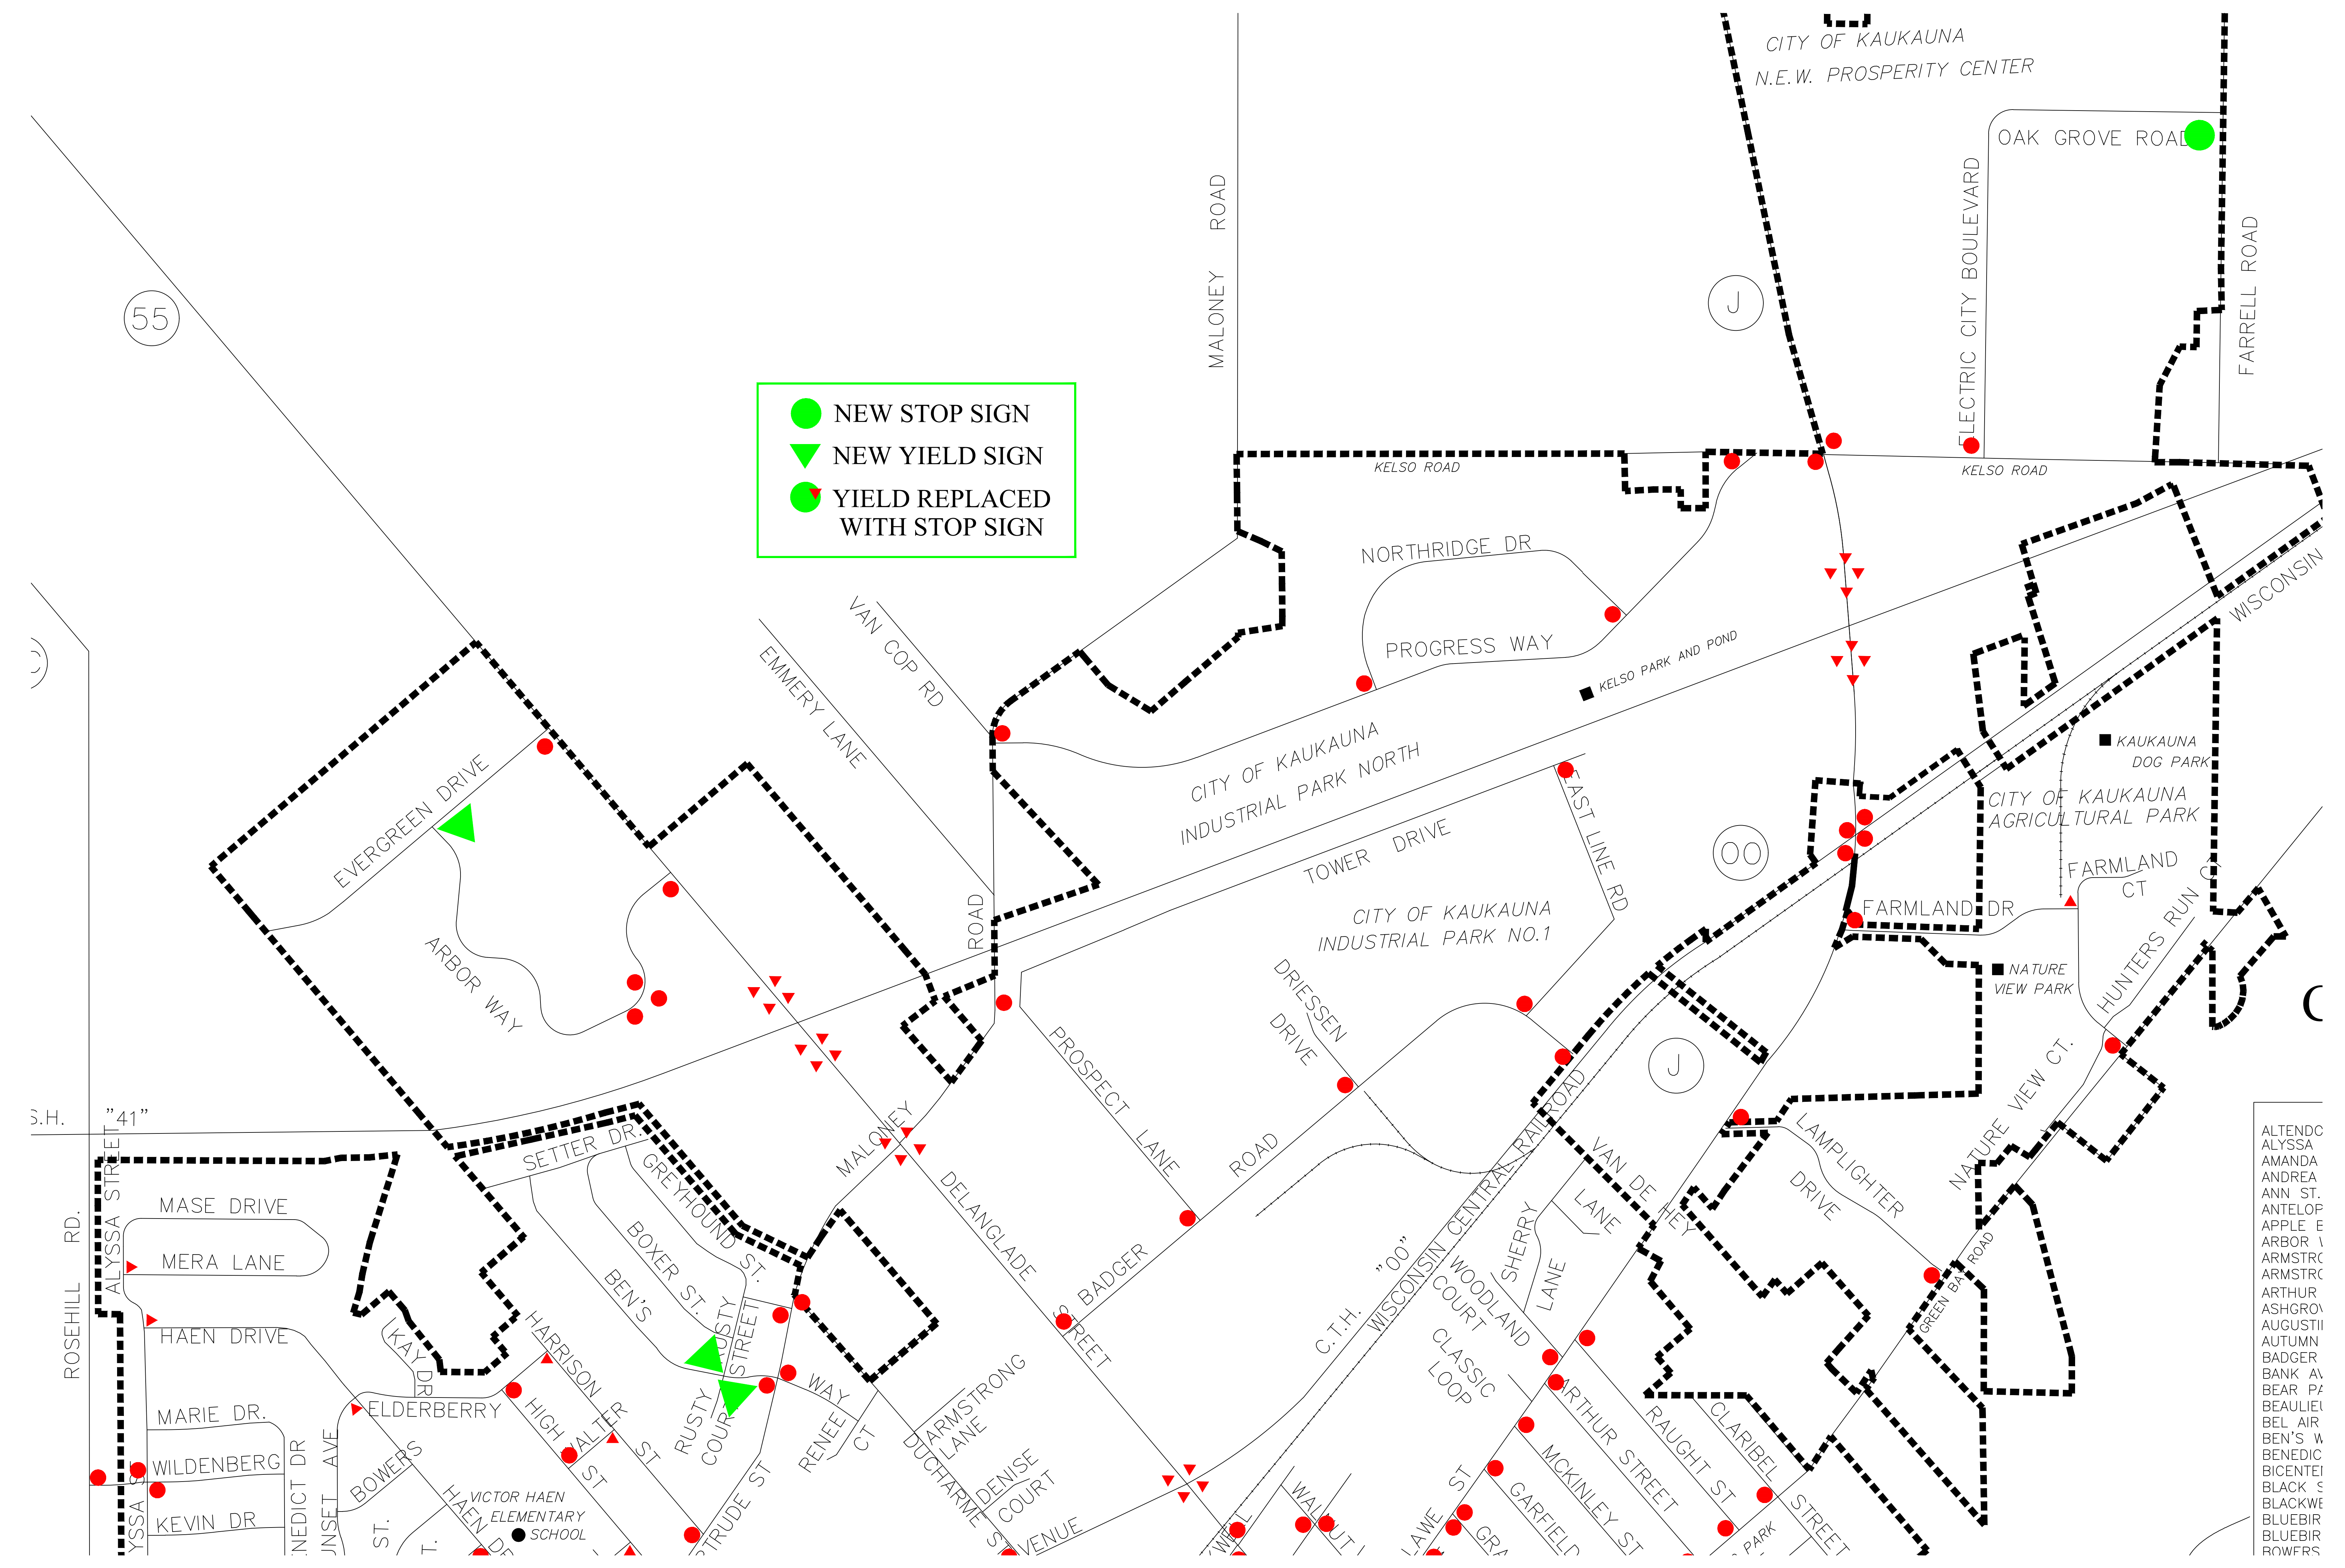

The installation and management of traffic control directly contributes to maintaining a safe and healthy community.

**Budget:** New signage would be paid from out of the transportation budget.

### Staff Recommended Action:

Direct the City Attorney to draft the necessary ordinances authorizing the installation new "Stop" and "Yield" signs at the locations shown on the attached maps, the replacement of existing "Yield" signs with "Stop" signs on Metoxen Ave at E10th Street, and on Red Fox at White Birch Lane, and the removal an existing "Yield" sign on White Dove Lane at White Birch Street.

NEW STOP SIGN

NEW YIELD SIGN

YIELD REPLACED  
WITH STOP SIGN
