RE: HVAC
Environmental Center

We propose to supply and replace the existing furnace located in the closet next to the offices and the central air. The new furnace will be a Rheem 95% efficient, sealed combustion and the condensing unit will be a 13 SEER. This will be done for the sum of

\$9,850.00

ADD

We propose to supply and install a two zone system. One zone will be for the two offices next to the furnace room and the other zone will be for the remaining area. We will add one return in the adjacent office. This will be done for the sum of

\$6,475.00

We propose to supply and install a new furnace and condensing unit for the conference room. This unit will be located in the storage area. This will be a non-condensing mid-efficiency Rheem furnace. The condensing unit will be located out the side of the storage room. This includes insulated ductwork. We will install one supply grille up high and the other return grille will be low. The gas line will be exposed on the outside of the building. This will be done for the sum of

\$12,825.00

Excluding

Line Voltage Wiring
State and local permit fees (if needed)
Concrete pad (if needed)
Professional cleaning
Ceiling repair (if damaged)

Thank you for the opportunity to bid on this project. We look forward to working with you on this and other projects.

Sincerely,

A handwritten signature in black ink that reads "Troy Baumgart". The signature is written in a cursive style with a large, stylized 'T' and a long, sweeping underline.
