Background (if necessary):

- Discussion based on Council's direction to move to a more sustainable and environmentally friendly fleet.
- Purchase of Ford Lightning Electric Vehicle would demonstrate commitment and leadership by City government to reach sustainability goals.
- Marketplace, infrastructure, and availability have reached a tipping point in favor of this technology.
- Will continue to explore possible federal incentives/grants to offset costs.
- Wastewater Department will use the new truck to replace the 2001 GMC pickup of the Collections Supervisor. Daily use includes line locates, service connection inspections, mainline video inspections, customer service calls, and general utility activities.

Ford F-150 Lightning Electric Vehicle

PROS		<u>CONS</u>	
•	City Sustainability Goals	•	Higher upfront purchase costs
•	Environmental Leadership	•	Higher upfront infrastructure costs
•	Zero Emissions	•	Winter weather affects battery range
•	Lower energy (fuel) costs	•	Reduced driving range vs. gas model
•	Lower ongoing maintenance costs	•	Lack of driving range while towing
•	Software upgrades to ensure up to date systems	•	Order Time/Delivery window: In 6 to 8
•	Data driven decisions used for fleet productivity and visibility		Weeks up to 12 months or more
•	400 lbs. of extra, waterproof cargo space with "frunk"		
•	Onboard Pro Power Source – 9.6 kW for wastewater cameras and tools needed for daily workload vs. carrying a generator		
•	Warranty – 3-year/36,000-mile bumper-to-bumper warranty and 5-year/60,000-mile powertrain warranty, PLUS 8-year/100,000-mile Electric Vehicle Component – retaining a minimum of 70% of battery's original capacity over the period.		
•	Time savings (no waiting to refuel at gas station)		
•	Truck could be used for "on-call" commuter vehicle to save on gas.		
•	2024 Model Year

FORD F-150 LIGHTNING CHARGING OPTIONS AND ESTIMATED CHARGE TIMES

Estimated charge times 15% to 100% at 240 volts¹

Ford Mobile Charger 32-amp

Standard-**Range Battery** (targeted EPA-estimated range of 230 miles²)

Extended-Range Battery (targeted ÈPA-estimated range of 300 miles³) 14 hours*

19 hours*

32-amp portable AC charger runs on either a 120- or 240-volt AC wall outlet and is included in the purchase or lease of an F-150 Lightning.

*Charge time shown with 240-volt power connetion.

Ford Connected Charge Station 48-amp

10 hours 13 hours

48-amp wall mount AC charger runs on a wired 240-volt AC circuit for faster Level 2 home, office or depot charging than the basic 32-amp Ford Mobile Charger.

Ford Charge Station Pro 80-amp

10 hours 8 hours

80-amp wall mount AC charger runs on a wired 240volt AC circuit for optimal AC charging capability. On the extended-range F-150 Lightning, it works with the truck's dual on-board chargers for 15% to 100% overnight charging in about 8 hours.

Electrify America DC Fast Charging Station 150-kW (15% to 80% charge) 44 minutes

41 minutes

Up to 150 kW for rapid charging on the road, the F-150 Lightning can access network of DC fast chargers that can add up to 41 miles of range in about 10 minutes on the standard range truck and up to 54 miles of range in about 10 minutes on the extended range truck.⁴

¹Charge time based on manufacturer computer engineering simulations. The charging rate decreases as battery reaches full capacity. Your results may vary based on peak charging times and battery state of charge. ²Based on full charge. USA EPA-targeted range based on analytical projection consistent with U.S. EPA combined drive cycle. Actual range varies with conditions such as external environment, vehicle use, vehicle maintenance, lithium-ion battery age and state of health. Final EPA-estimated ratings available in 2022 calendar year. ³Excludes Platinum models. Based on full charge.
