RE: Meeting 7/5/22 Action Item 16 Lot merge 108 – 110 Ritchie

The developer has not officially shared their plans for the future of the Ritchie lots, but according to their website [Warm Springs Condominiums - Presidio Vista Properties](#) the plan is to build 12 condominium units on a 35,799 sq. ft. merged lot.

The future development of Ritchie drive should be consistent with its surroundings. The T-3000 zoning district is currently comprised of **single-family homes and townhomes with 1 to 4 units per building.**

On Sunday, July 17, 2022, 10:32:39 PM MDT, Bridget Bagley <bridget.bagley@gmail.com> wrote:

There is a concerted effort to subliminally welcome and direct people who come into Ketchum at the Main Street south entrance to surrender and follow the satanic dark One World Order by symbols. The satanic eye is back in deliberate positioning on the wall of the hole on the right approach side of mainstreet across from the LimeLight Hotel AGAIN.

THIS IS DELIBERATE. THE EYE IS AN EVIL SYMBOL THAT. SLIPS BY THE CENSOR OF THE SLEEPING PEOPLE OF OUR COUNTRY. IT IS A CODE OF DARKNESS AND PART OF THE LANGUAGE THAT A PERSON whois IS A GUARDIAN OF AMERICA'S FREEDOM AND STRENGTH MUST RECOGNIZE AND STOP!

|

What a welcome to Sun Valley and Ketchum with a new banner up on the wall around the giant pit/hole across from The LimeLight Hotel with the Masonic satanic eye, as seen on the top of the pyramid on the American fiat dollar bills! A historical international symbol of One World Domination, the practice of slaughtering our children, Orwellian censorship, abolishing ways to defend ourselves, lowering the world population 85% are intentions now playing out.

Wake up the community to the fact that we have among us a body of demonic humans that want to take over the planet, our country, our towns and we are greeting them with this known signal as they arrive that they are welcome here.

Learn their language. Watch the finger talk and listen to the code words used.

Get that banner down. It sits next to artwork done by our community's children that are being stolen, caged, terrorized and murdered for andrenachrome highs. We must educate ourselves quickly to this long playing control by our dark elite populace here in Ketchum. They are attracted to power, money and influence. They must be recognized, eradicated immediately. No cordialness required here. Find out who is their leader. Why is this repeating! Find the group. Look them in the eye and tell them to leave, take their hands off our school children whose minds they have been bending causing an enormous rise in suicides in Blaine County in the last 3 years. The highest in the country! These are murderers with no conscience. This is not TV or a movie. This is Ketchum, Idaho USA falling for the propaganda of 1% who are hoping to control the 99% of humanity for one world ownership.

Be the leader I know you are Neil as our Ketchum, Idaho mayor.

Subject: Human Wildlife conflict/solutions
Attachments: It's time to be bear aware.doc; COTWS_HJohnsonBears.pdf

Dear City of Ketchum Officials,

Thank you for the opportunity to share my viewpoint.

Given yesterday's death of the black bear mother and subsequent relocation of her two cubs to a wildlife rescue facility, it is time for the City of Ketchum to implement a program whereby wildlife resistant garbage cans and dumpsters are mandated. As a member of the Wildlife Smart Communities, Ketchum can lead by example.

I'd like to provide some context for my input. My husband, Bob and I have lived in Blaine County for 30 plus years, and on Bordeaux Street in West Ketchum for the past 23. Since first moving to Bordeaux Street we have advised our neighbors to put garbage cans out the morning of service: Wednesdays. If you drive down Bordeaux Street on Tuesday night, you rarely see a garbage can. In contrast, if you drive down Wood River Drive, Williams Street, Sabala or Byrd Drive, on a Tuesday evening the streets are lined with cans. Over many years I've put a flyer (attached below) on cans left out the night before service. This effort is mostly an exercise in futility as property management companies/housekeepers/short-term rental guests put cans out the night before service and other residents either don't care or are new residents and are unaware of the issue.

The number one problem is we don't have access to wildlife resistant containers. I understand that Clear Creek Disposal would like to provide them but is concerned about the cost and with supply chain issues the cost has gone up recently.

Human-wildlife conflict in Ketchum is going to increase, given the growing population of residents/visitors and the effects of climate change on dwindling food resources for wildlife. Bears that habituate to a food source can become extremely dangerous, to the point of killing to protect that food source. As an advocate for wildlife, I find the death of the mother bear and relocation of her cubs very distressing, but this is also a significant Public Safety issue and I'm afraid it is just a matter of time before someone is hurt or worse. This is a known problem and one that if someone is mauled or killed, the city will be held responsible for not doing everything in its power to ensure the safety of its citizens and visitors. Idaho Fish & Game can't mandate sensible waste management practices, but the City of Ketchum can. It's past time to just be bear aware.

Attached below is a study done in Durango, Colorado that illustrates a similar bear issue and how Durango implemented a program in stages to address it. I've included a screenshot from the City of Aspen that shows garbage regulations and fines.

Thank you for your time and consideration.

Best,

Gina

Causes, Consequences and Considerations for Management of Human-Black Bear Conflicts: Lessons Learned from Research in Durango

COLORADO
Parks and Wildlife

Department of Natural Resources

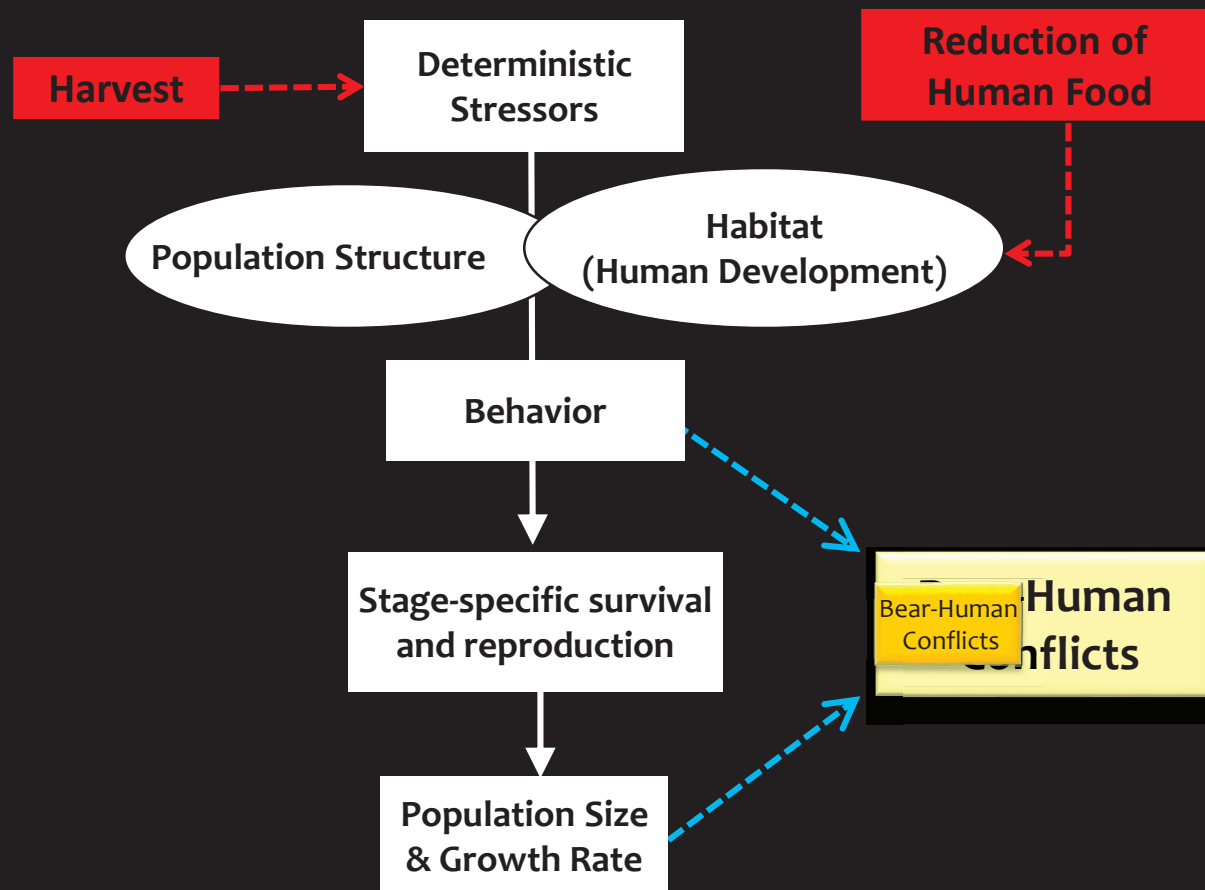

Heather Johnson

Stewart Breck, David Lewis, Jared
Laufenberg, Stacy Lischka, Paul Doherty,
Tana Verzuh, and Cody Wallace

Why are human-bear conflicts increasing?

Are we as thoughtful about bear behavior?

Lessons Learned from Durango Bear Research

CAUSES OF CONFLICTS:

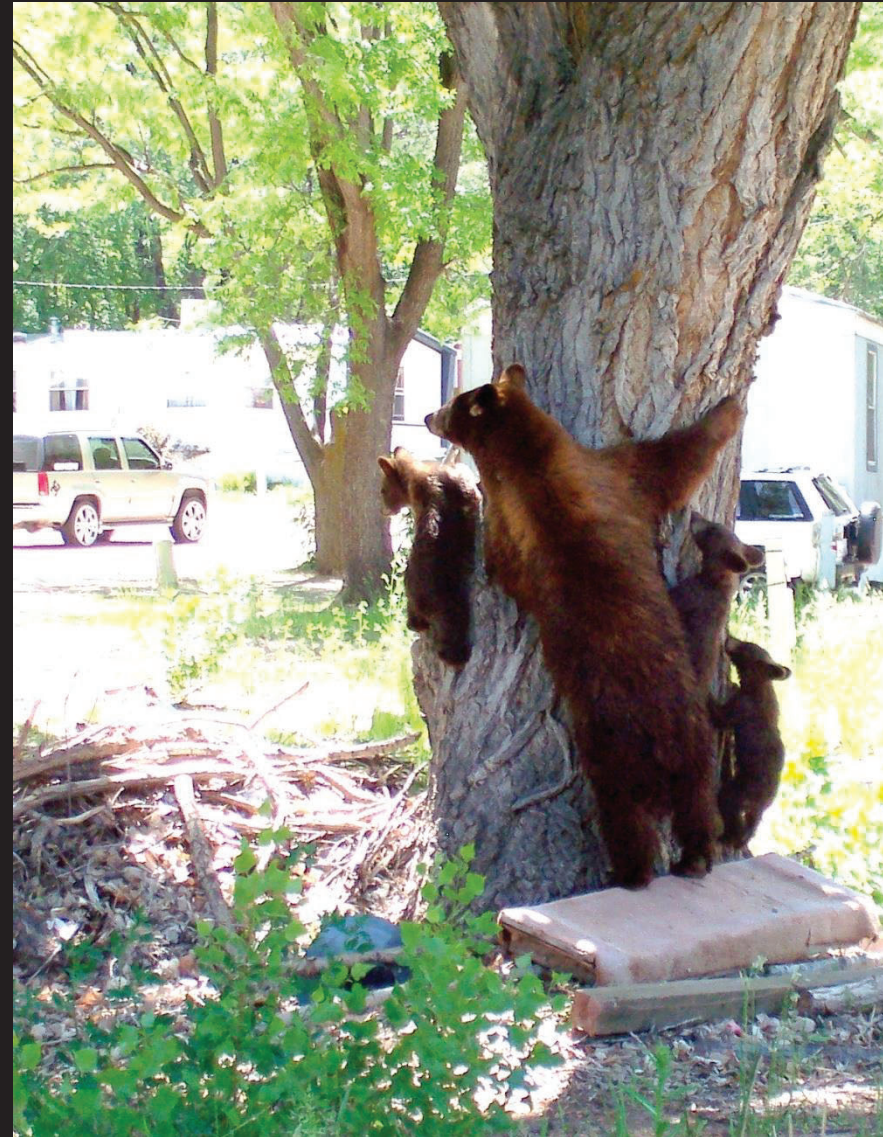

changes in black bear behavior that contribute to increases in human-bear conflicts

CONSEQUENCES OF

CONFLICTS: population trends in black bears living along the urban-wildland interface

STRATEGY TO REDUCE

CONFLICTS: wide-scale urban bear-proofing to reduce bear conflicts

CAUSES OF CONFLICTS

Shifts in Bear BEHAVIOR that Increases Conflicts

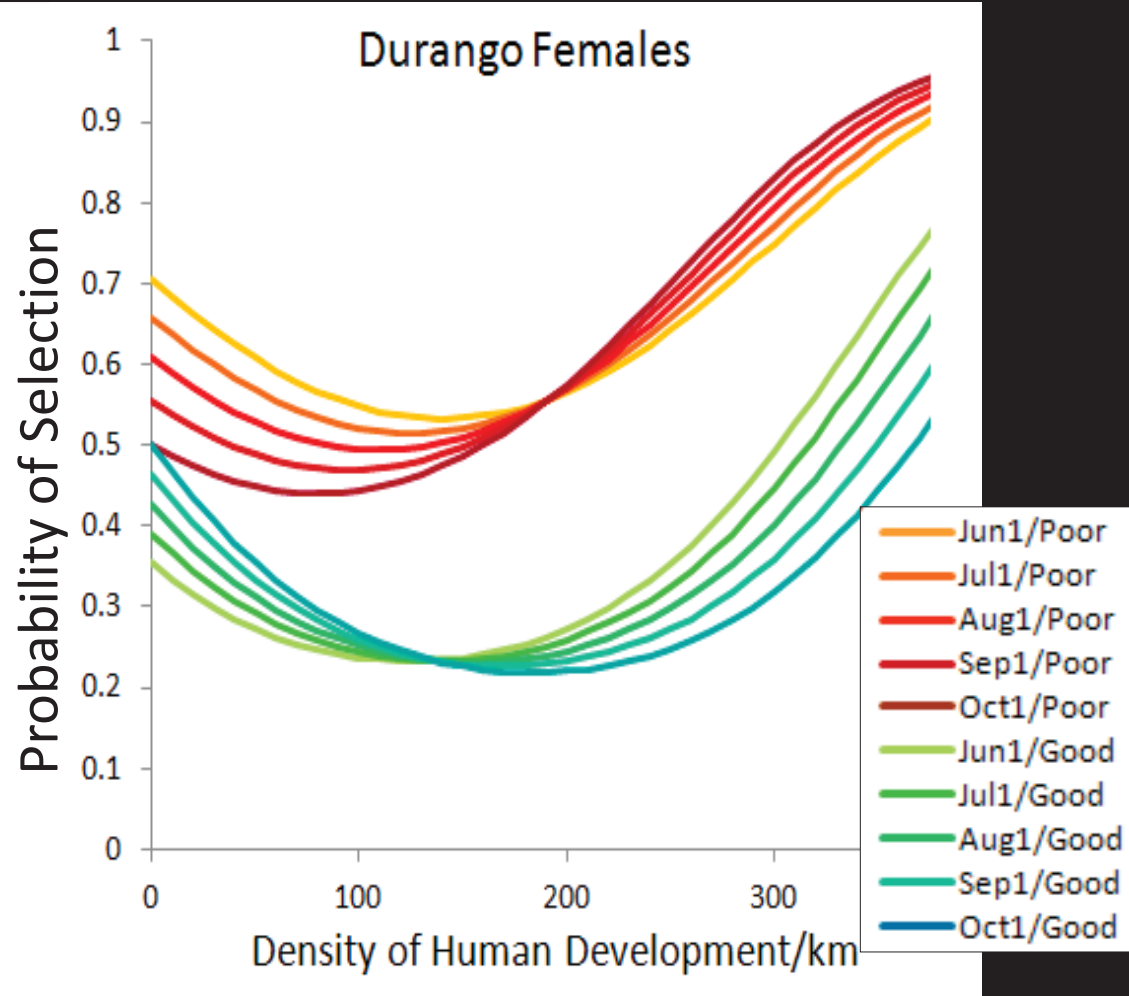

Changes in Foraging Behavior

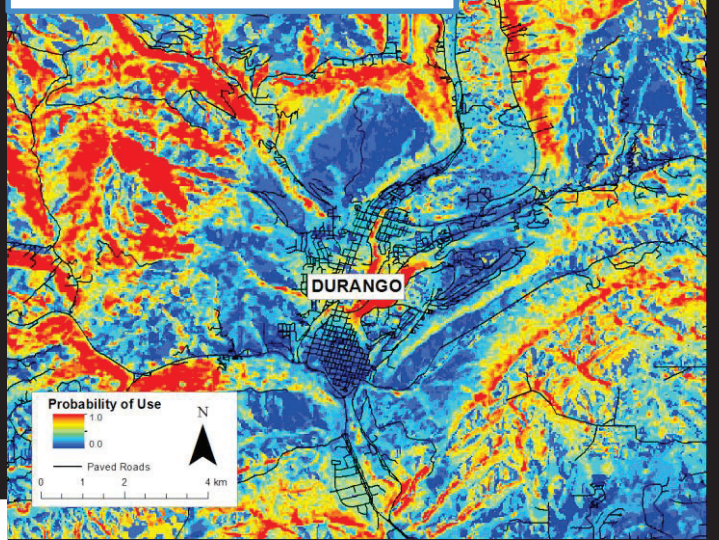

40 Adult female bears
collared/year

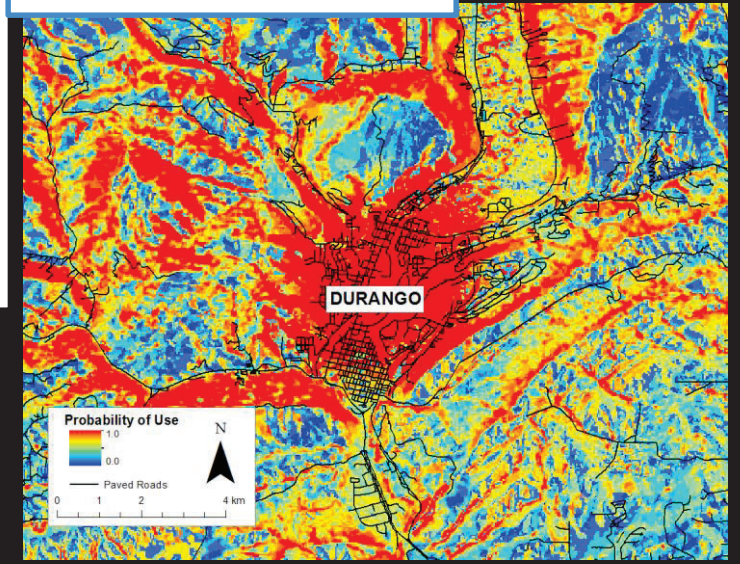

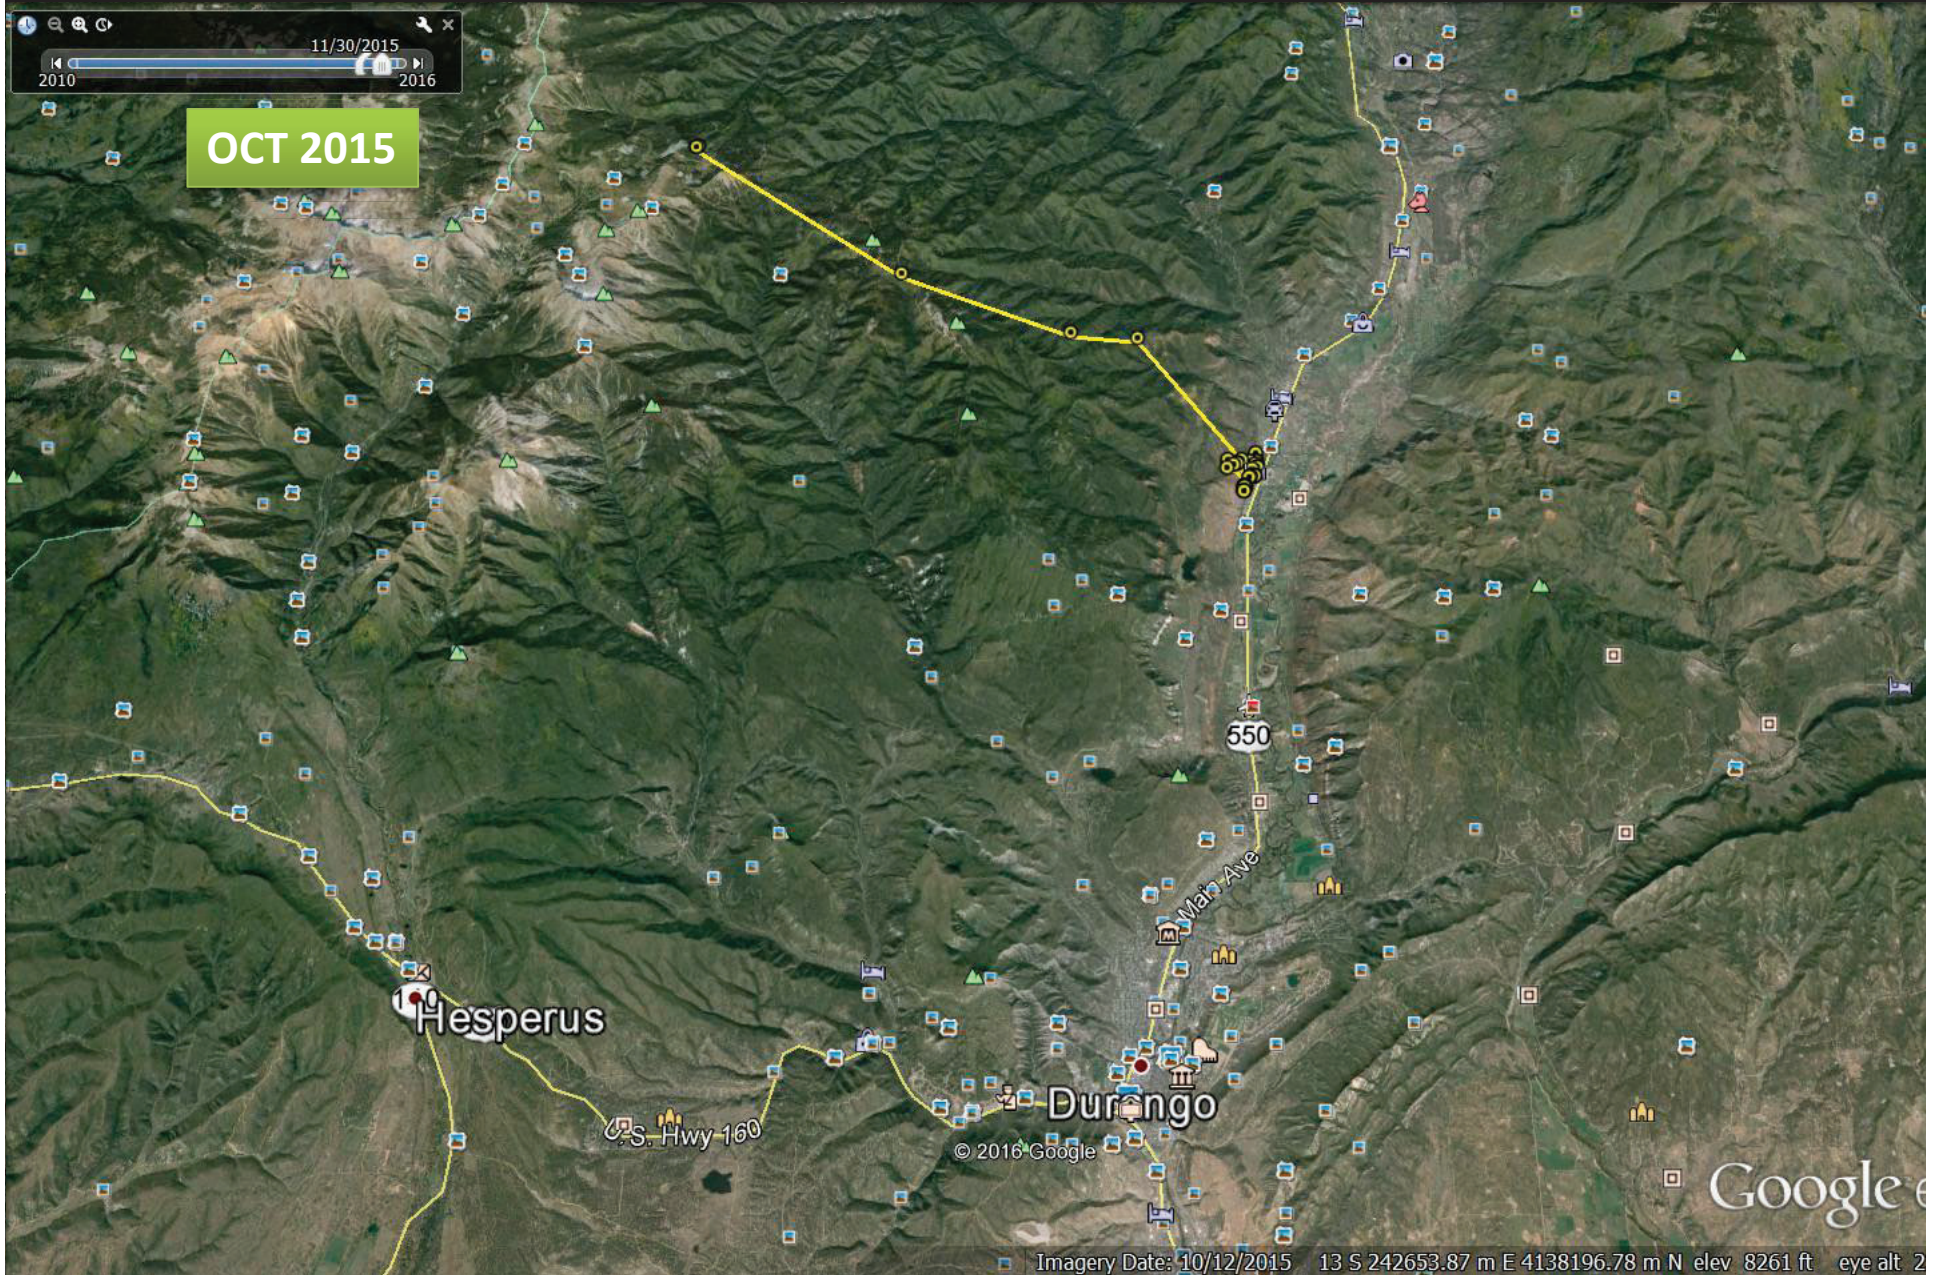

Good natural foods

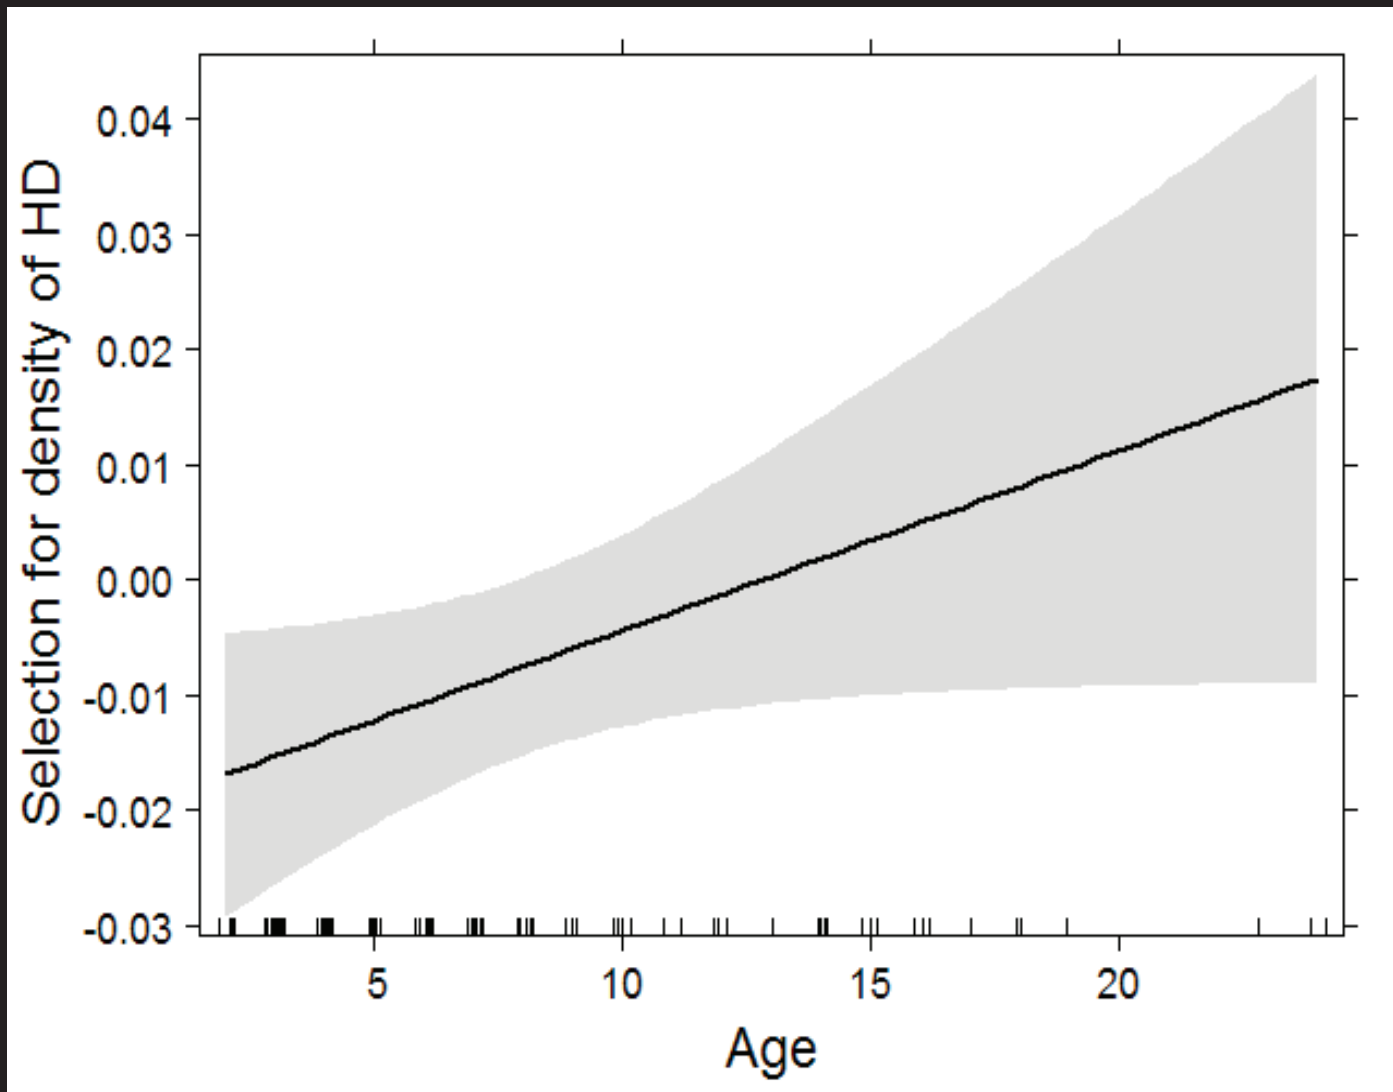

Poor natural foods

B298: 2015

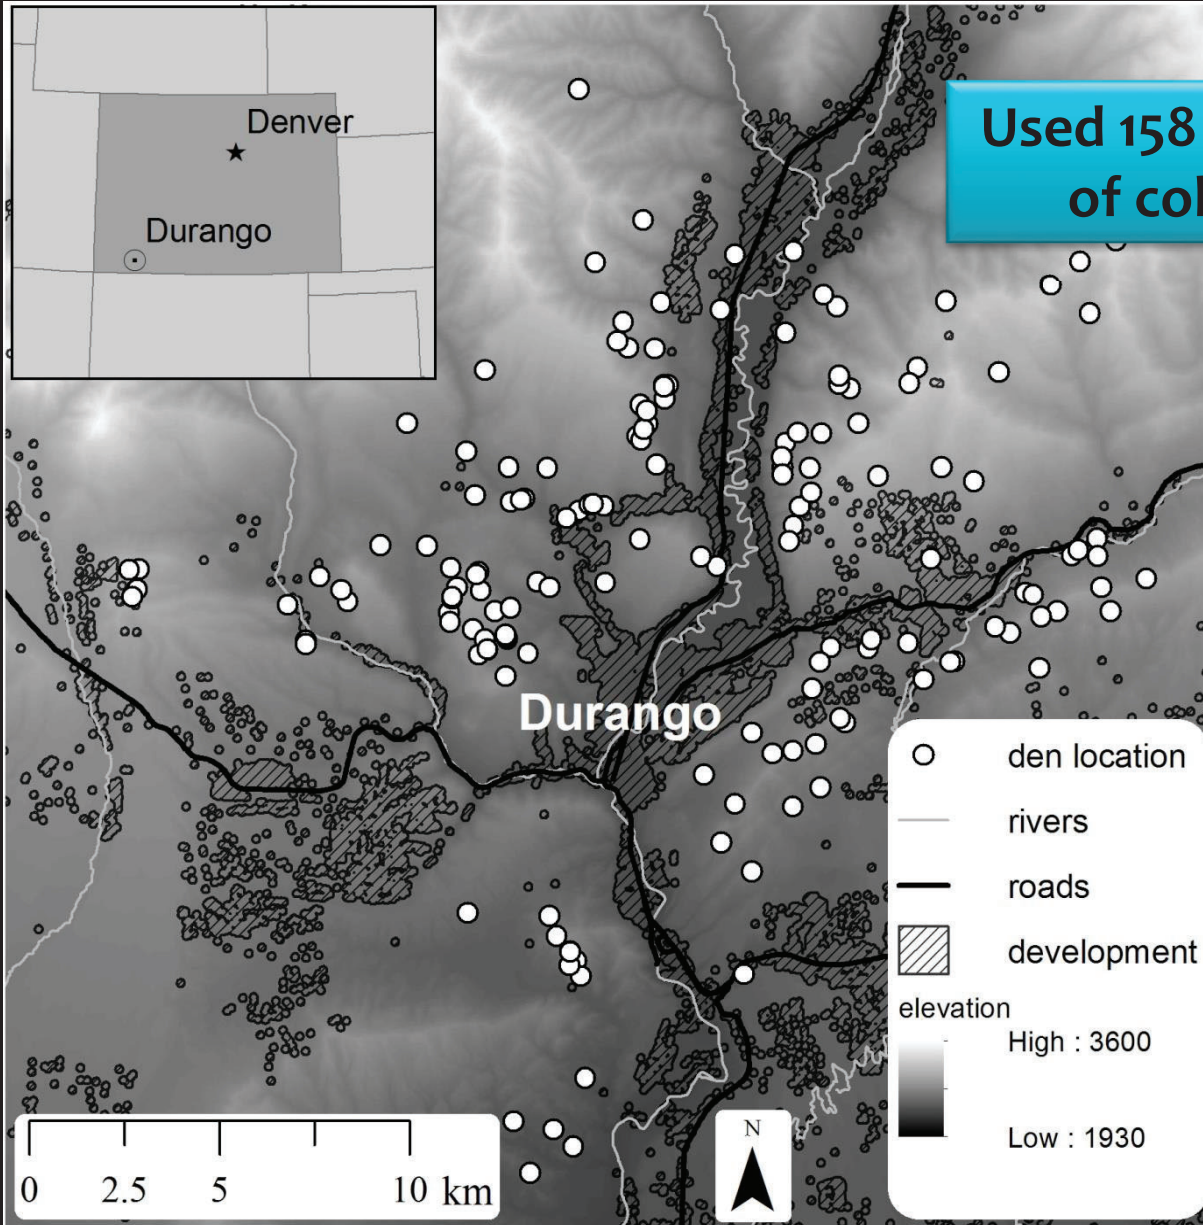

Bears increased their selection for human development as they got older

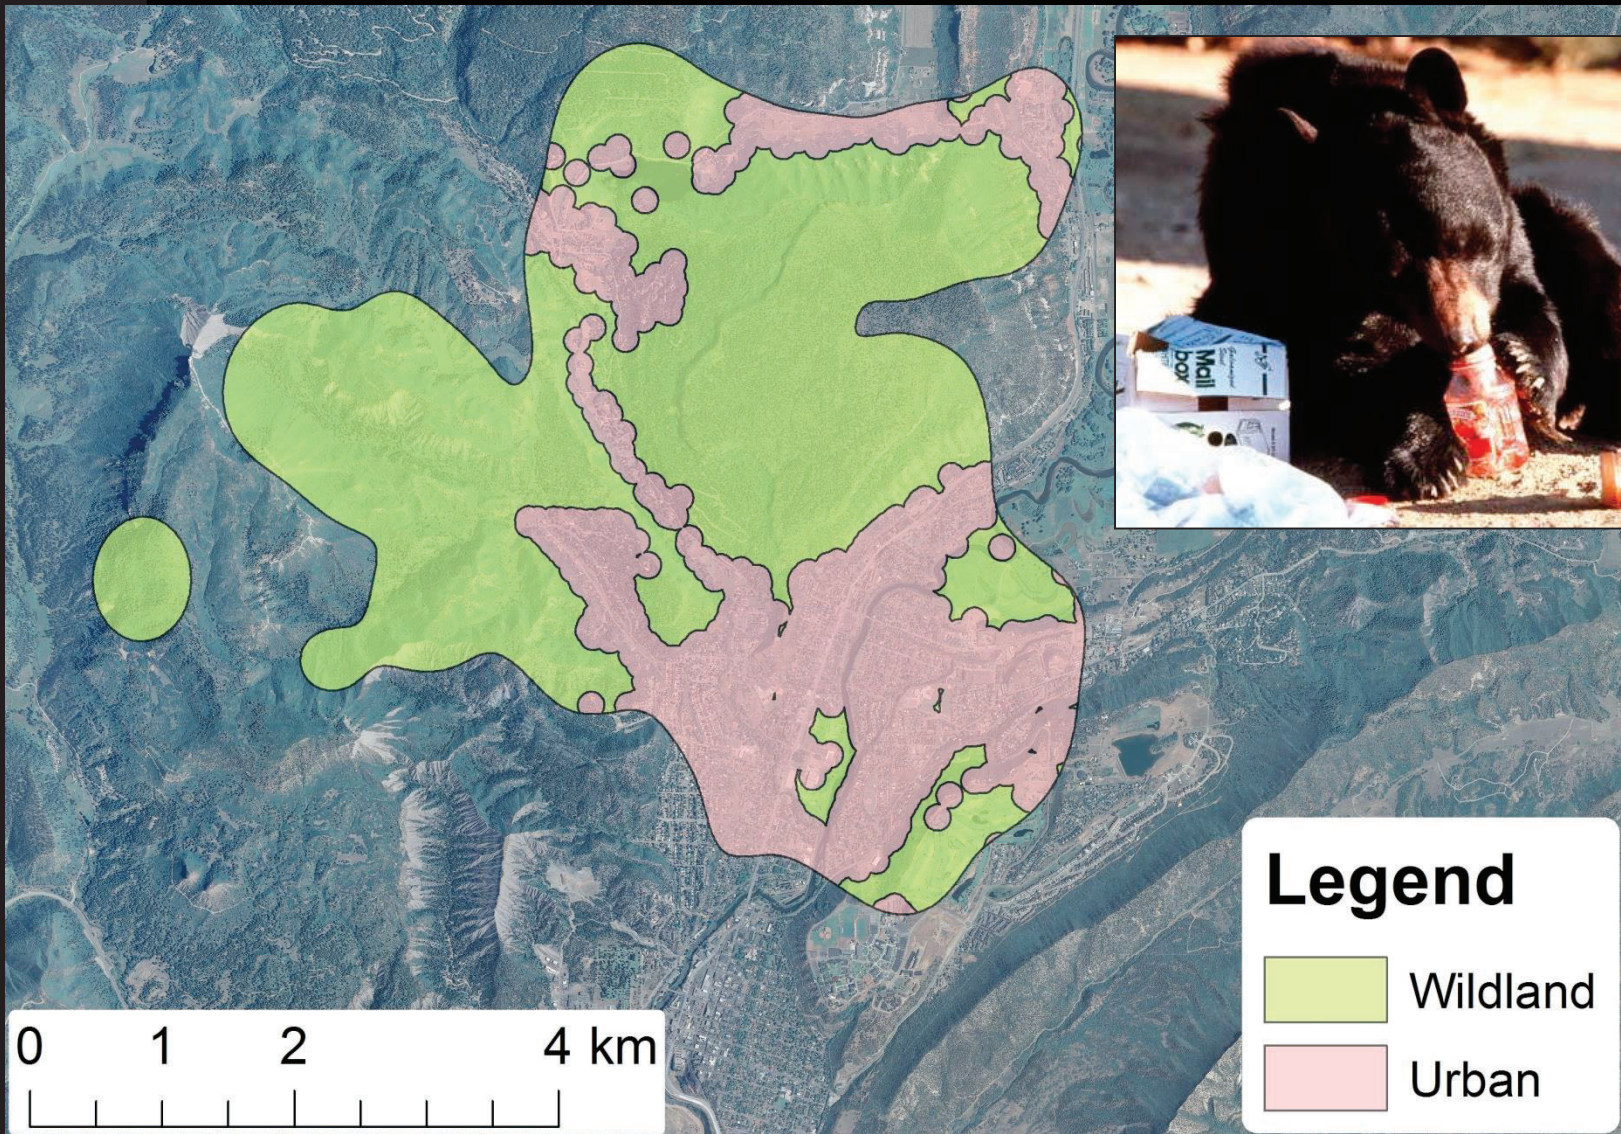

Changes in Hibernation Behavior

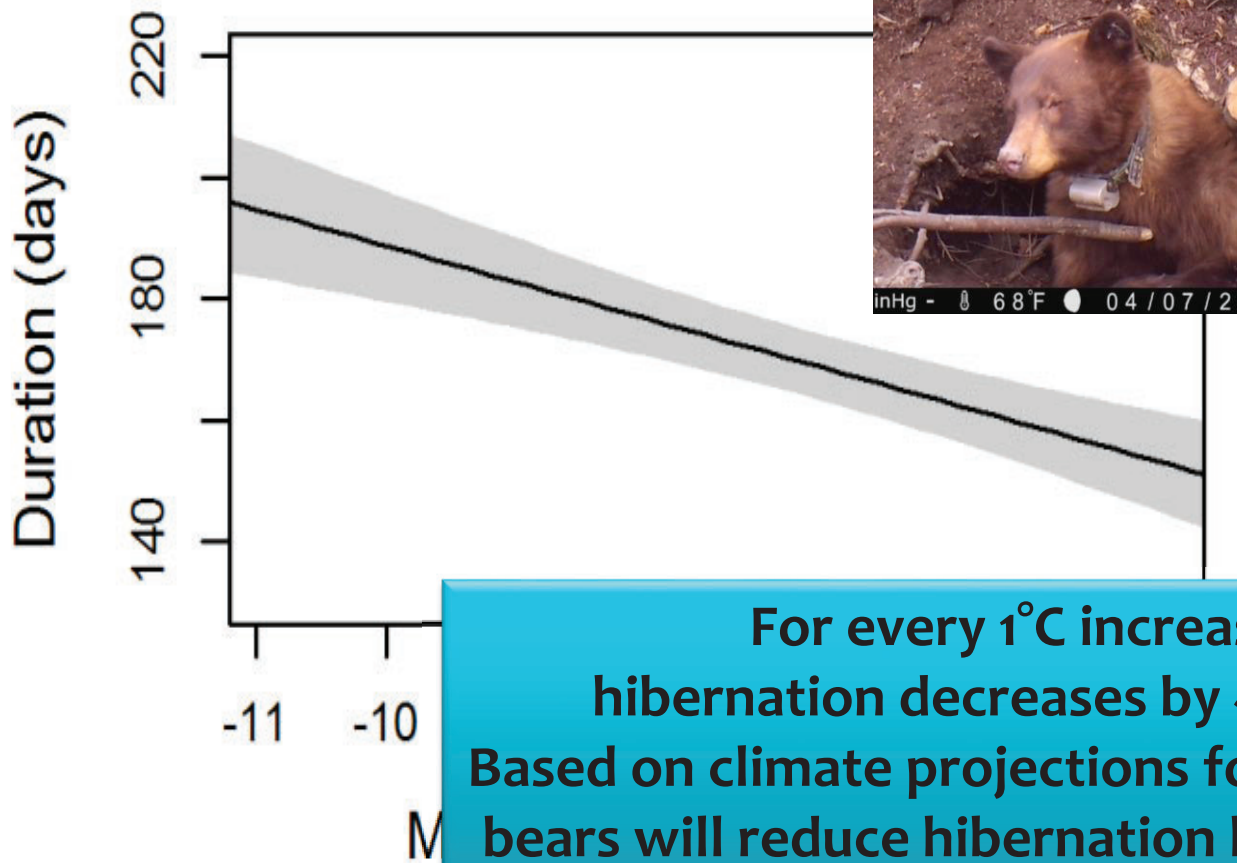

Used 158 den events (2011-2016)
of collared female bears

Influence of HUMAN FOODS on black bear hibernation length

Influence of MINIMUM TEMPERATURES on bear hibernation length

For every 1°C increase,
hibernation decreases by ~ 1 week.
Based on climate projections for CO₂, by 2050
bears will reduce hibernation by 15-40 days.

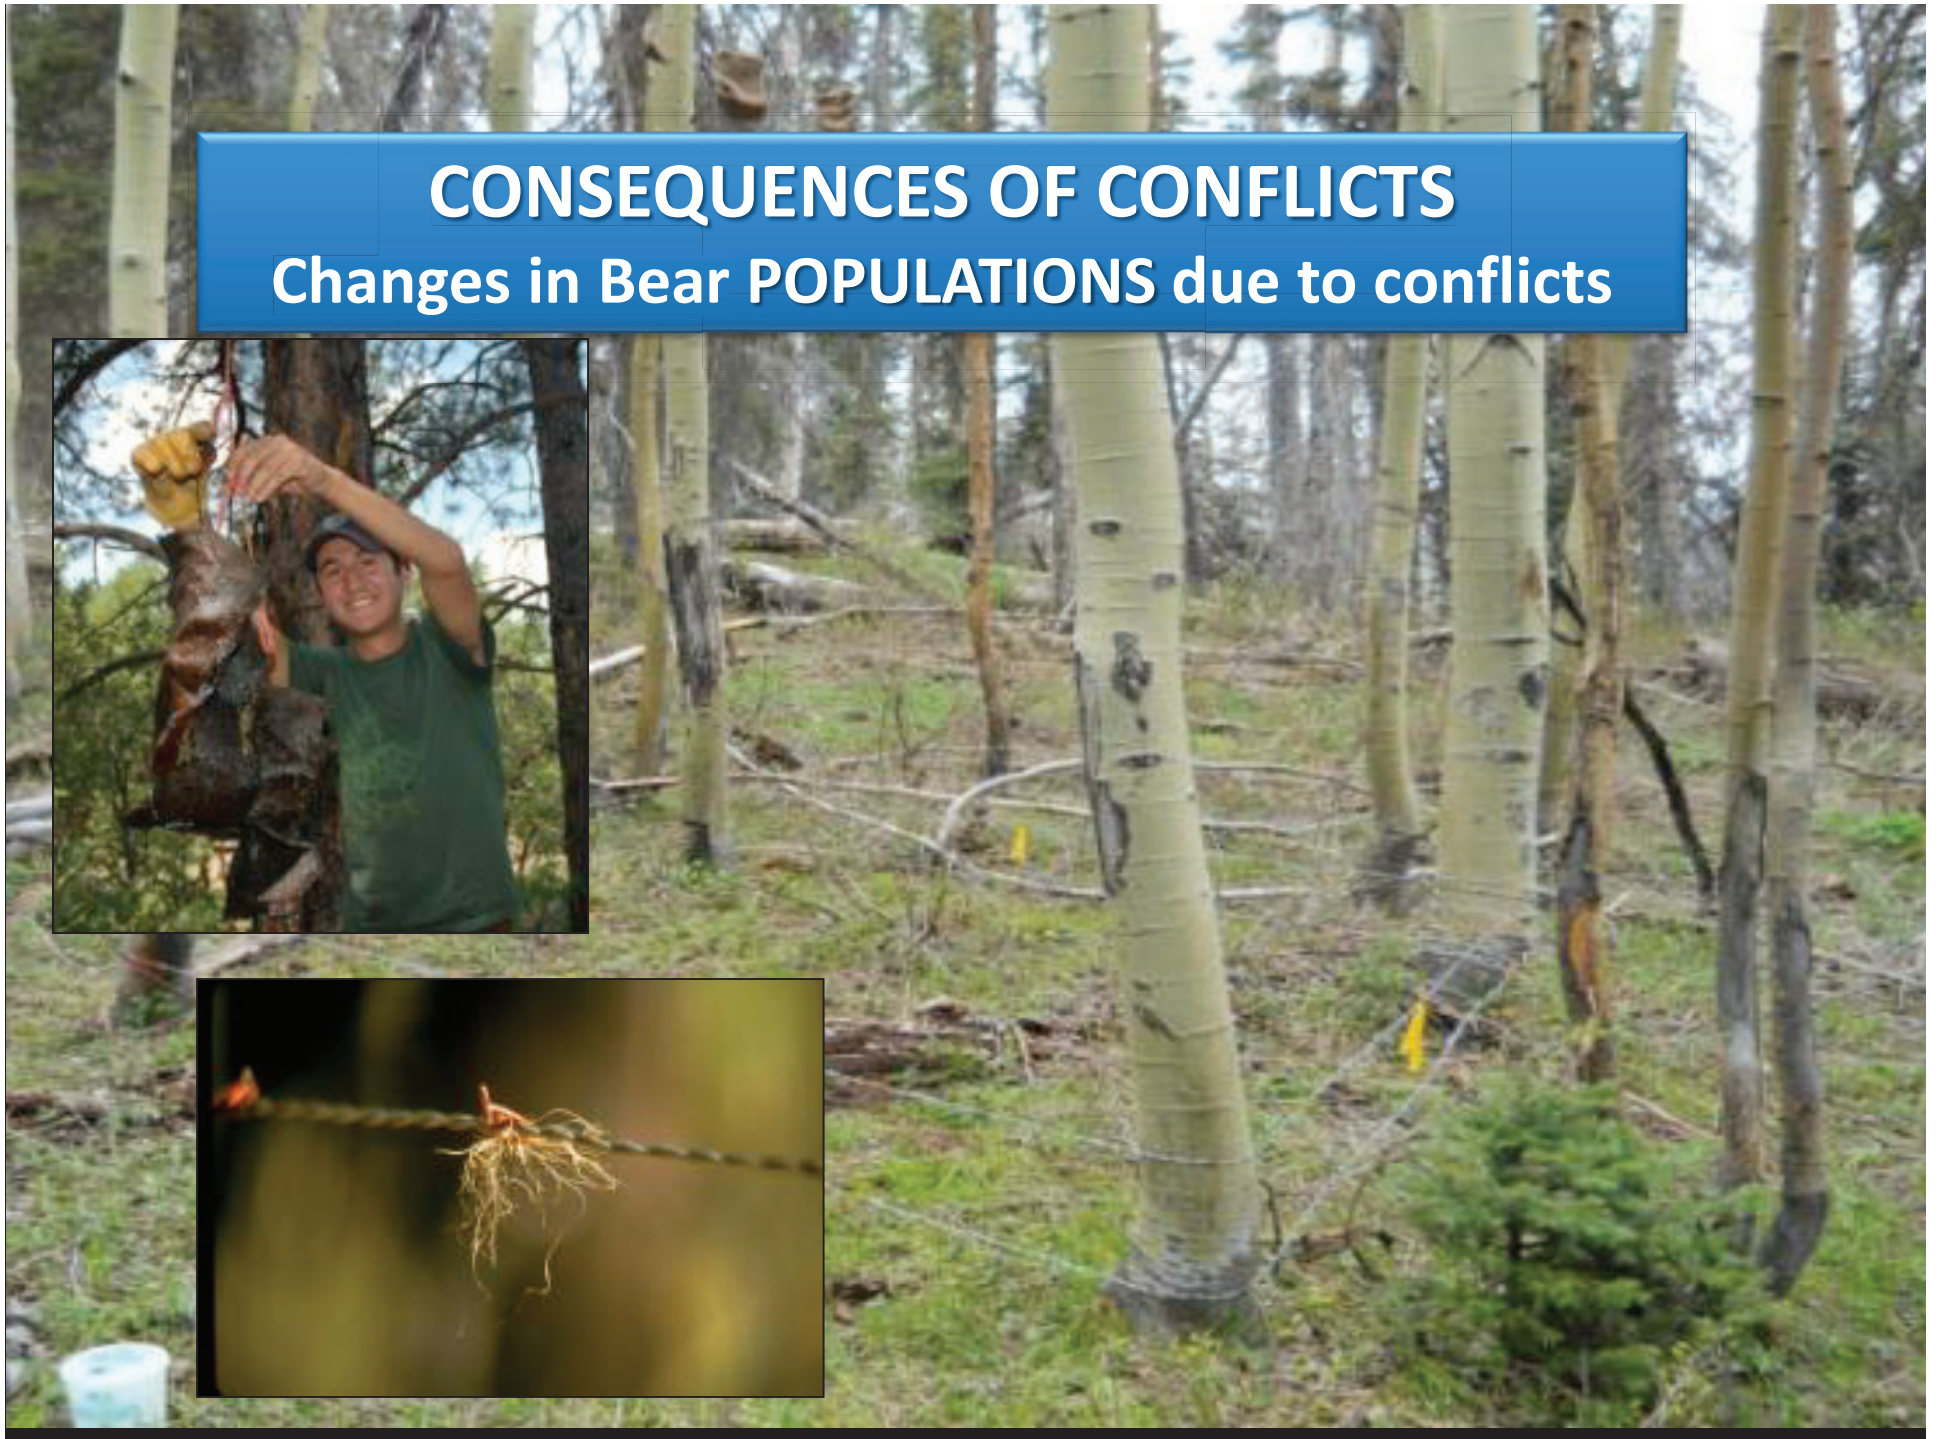

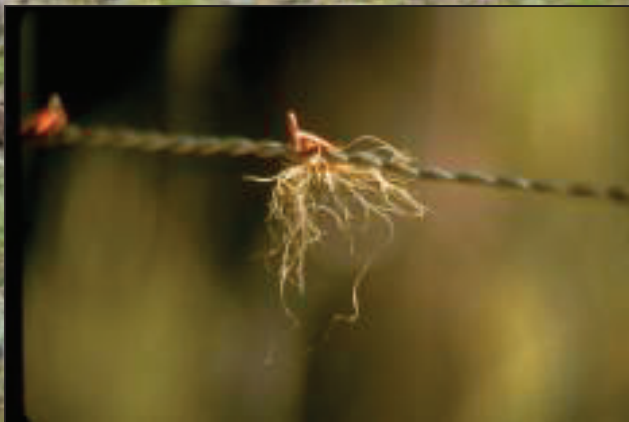

TAKE HOME MESSAGES

- When natural foods are limited, bears will readily forage on human foods, and bears appear to be increasing their use of development over time
- Hibernation length is likely to decrease due to expanding development and increasing temperatures
- Given changes in foraging and hibernation, we should expect more conflicts from the same number of bears in future
- Reduced hibernation will also alter the number of bears susceptible to late-season harvest

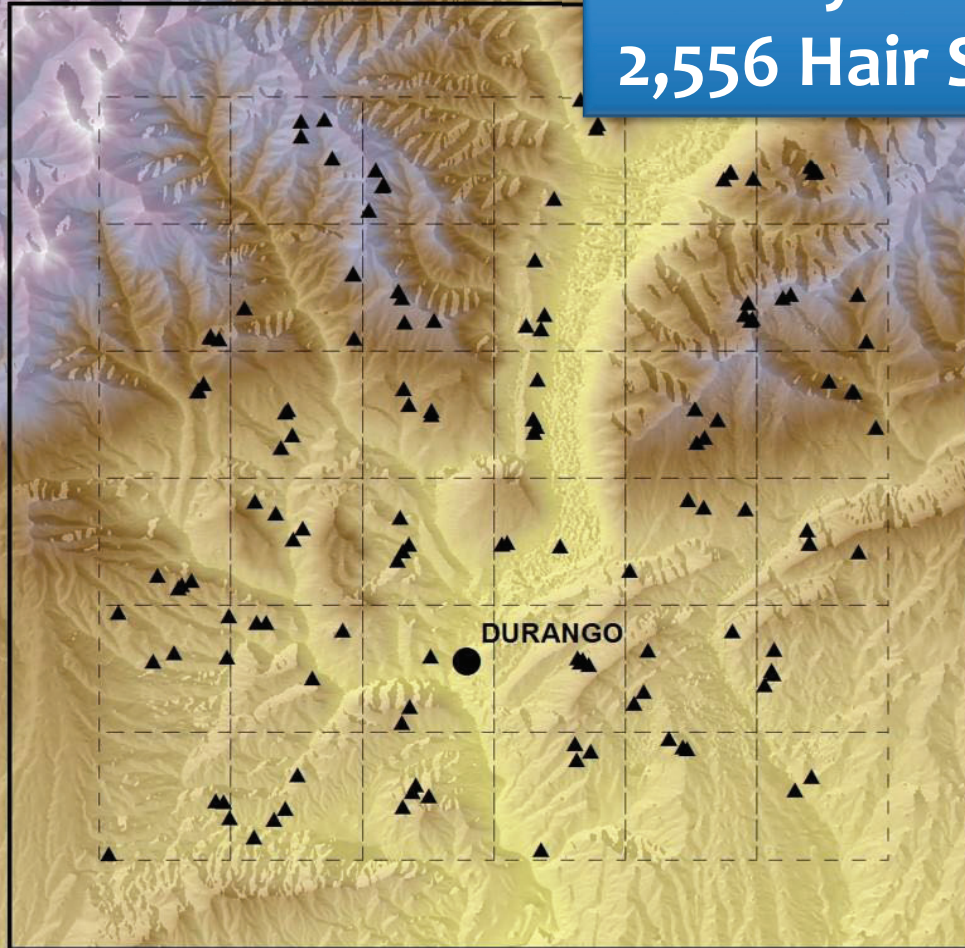

CONSEQUENCES OF CONFLICTS

Changes in Bear POPULATIONS due to conflicts

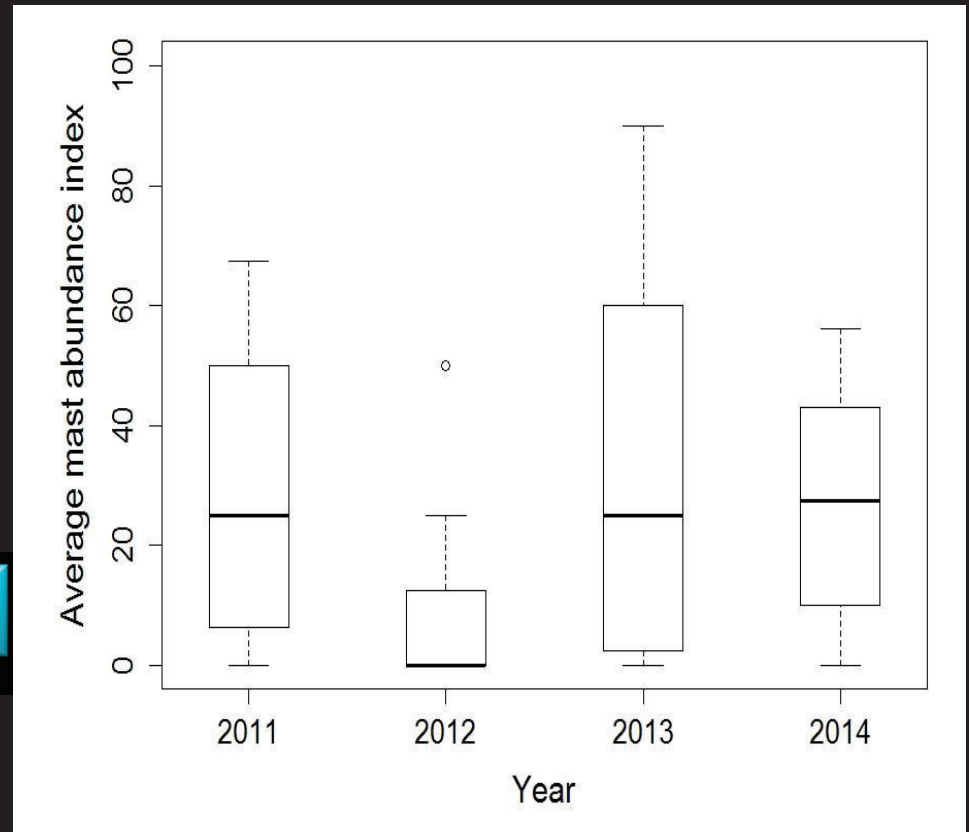

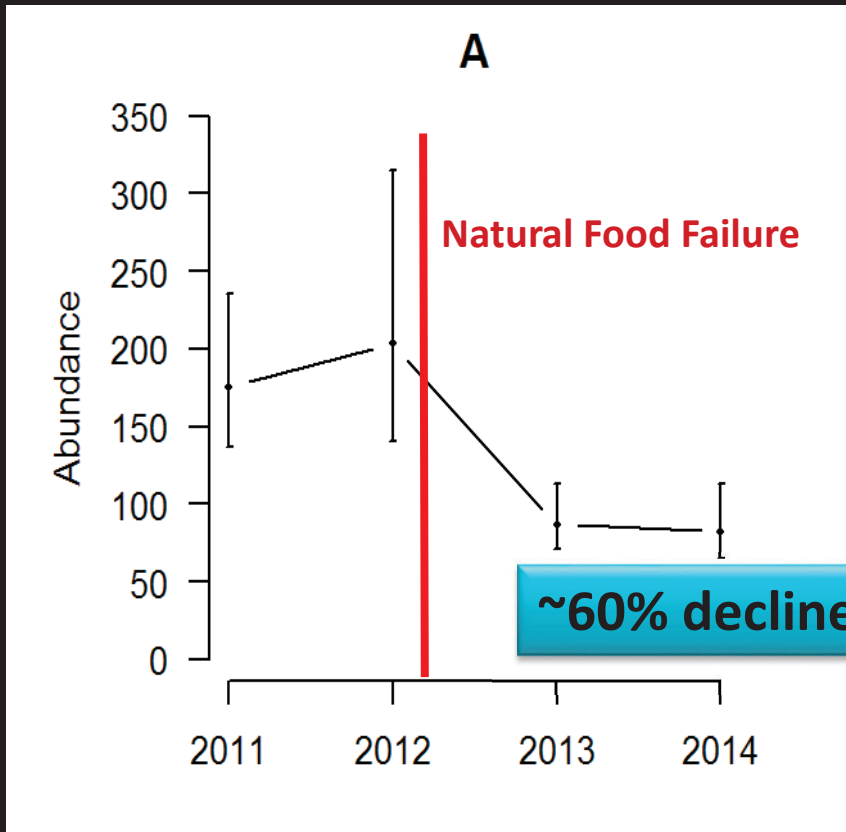

Colorado

Surveys 2011-2014 2,556 Hair Samples

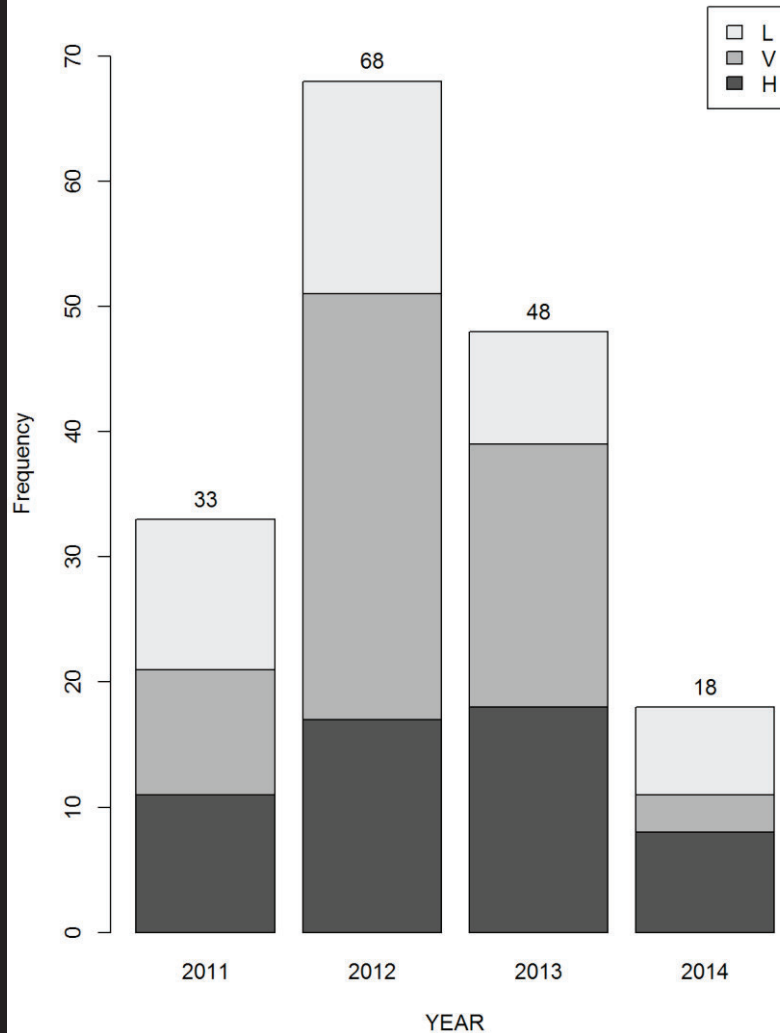

0 2 4 8 12 16 Kilometers

Durango Female Bear Population Trend (2011-2014)

All mortalities within study area

Frequencies of harvest (H), vehicle (V), and lethal management (L) mortalities by year (n = 167)

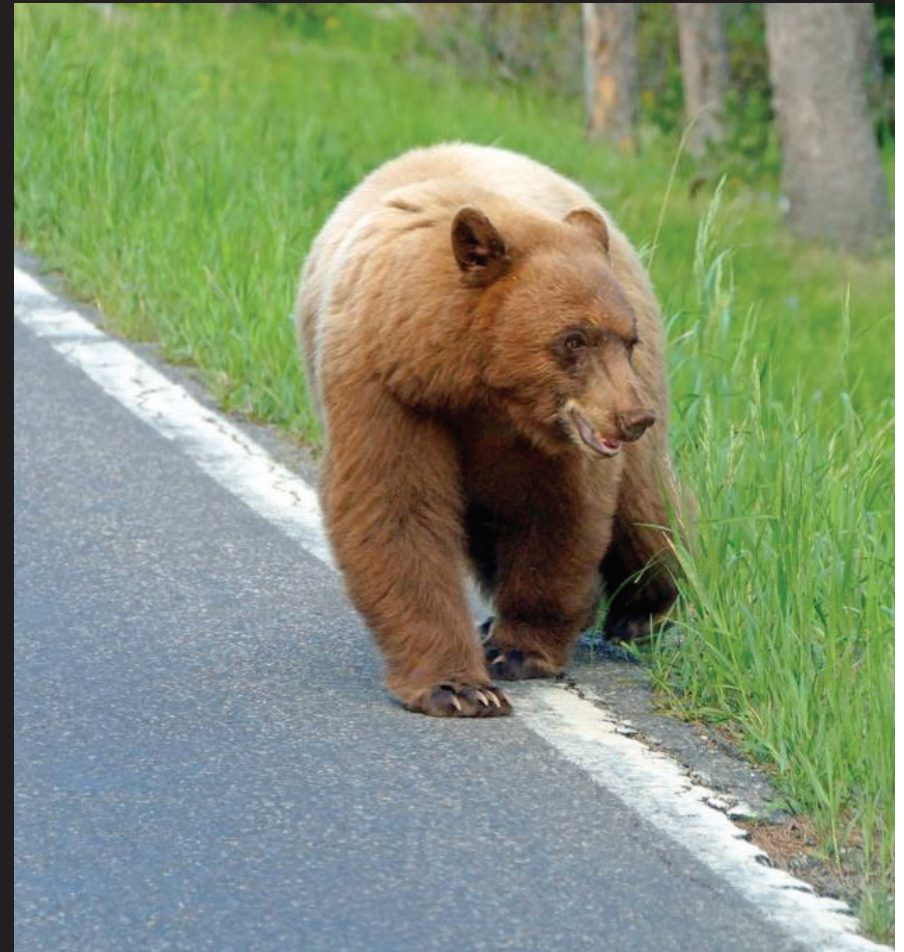

Collared female bear mortalities

Year	Survival	NonHarvest	Harvest
2011	0.92	0.04	0.04
2012	0.82	0.16	0.02
2013	0.84	0.12	0.04
2014	0.94	0.02	0.04
2015	0.88	0.09	0.03

TAKE HOME MESSAGES

- Increased bear use of development during poor natural food years can lead to significant population declines through high adult mortality
- Bear populations along the urban-wildland interface may be largely driven by non-harvest mortality (no management control, and little information about)
- Such effects are not well-recognized in management scenarios, but will play an increasing role in bear populations in the future
- Stay tuned

A STRATEGY TO REDUCE CONFLICTS

Bear Containers=58 conflicts

ELSEVIER

Contents lists available at SciVerse ScienceDirect

Biological Conservation

journal homepage: www.elsevier.com/locate/biocon

Use of patch selection models as a decision support tool to evaluate mitigation strategies of human-wildlife conflict

Sharon Baruch-Mordo^{a,b,*}, Colleen T. Webb^{c,b}, Stewart W. Breck^d, Kenneth R. Wilson^{a,b}

^a Department of Fish, Wildlife, and Conservation Biology, Colorado State University, Fort Collins, CO 80523, United States

^b Graduate Degree Program in Ecology, Colorado State University, Fort Collins, CO 80523, United States

^c Department of Biology, Colorado State University, Fort Collins, CO 80523, United States

^d USDA-WIS-National Wildlife Research Center, Fort Collins, CO 80521, United States

“Benefit reduction $\geq 55\%$ in urban patches and $\geq 70\%$ in urban-interface patches resulted in avoidance by bears [of development] “

TAKE HOME MESSAGES

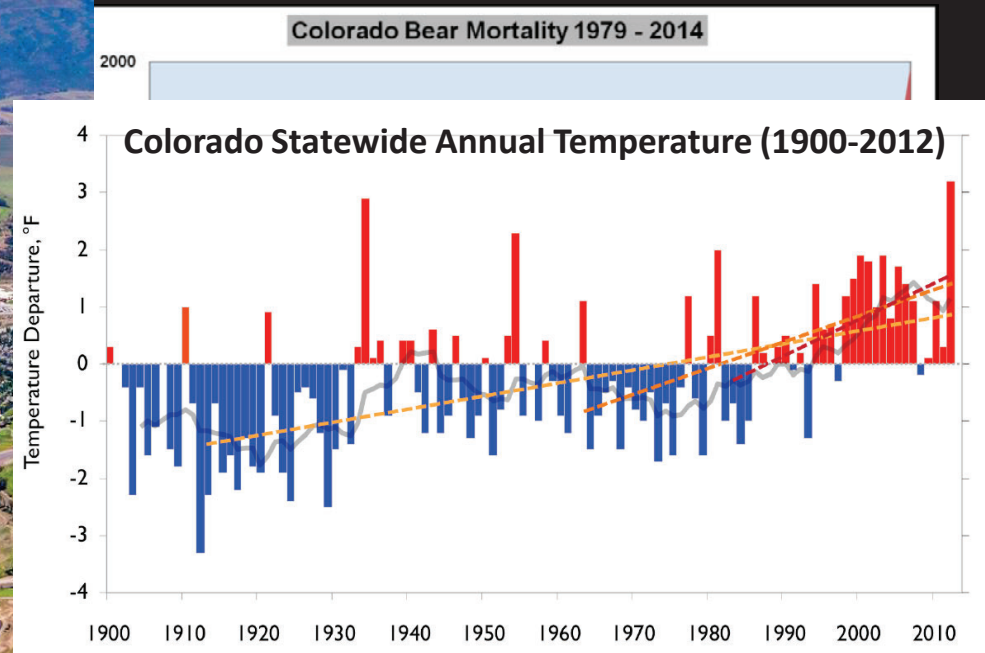

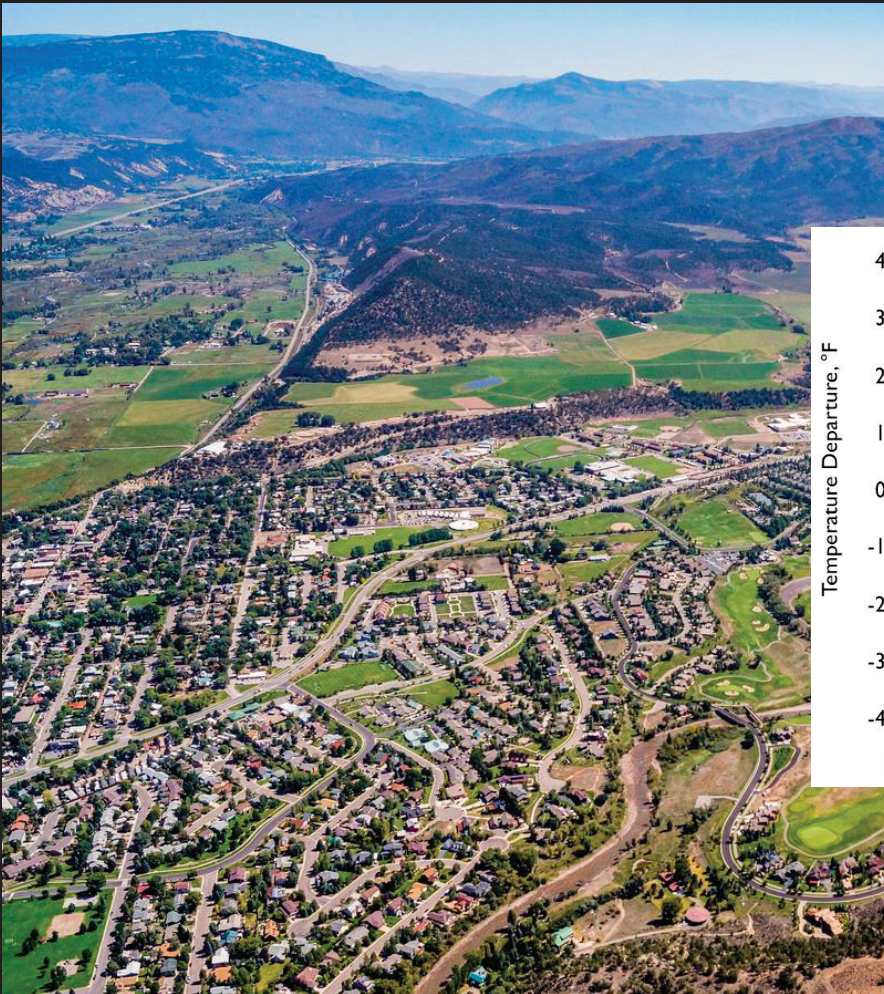

- Distribution of bear-resistant containers resulted in 50% fewer conflicts than control areas
- More important, is compliance with ordinances to reduce access to human foods (by whatever means)
- ~60% compliance rate significantly reduced conflicts, which may serve as a useful management target

Implications for future management of conflicts

Black Bear Behavior is DYNAMIC, changing in response to environmental conditions, *YET* many of our management practices assume that behavior is FIXED.

Success in reducing human-bear conflicts will likely depend upon our ability to **CHANGE HUMAN BEHAVIOR**

Subject: Tonya Anderson

Greetings Participate People,
Holley duPont here.

I had a great conversation with Tonya Anderson from Jackson Hole. Her title is Eco systems stewardship Administrator. This is to address our summertime problem of getting the public to be on board to not feed the Bears.

Jackson in 2 weeks will have everything on the table to be addressed and passed.

Coming with recommendations from the recyclers, the trash haulers, the birders with their bird feeders, the commuters who have to put their trash out early due to commuting and the general Public.

She is in charge of Air, water, wildlife, public lands and climate change in Jackson. Really!

We may not have to reinvent the wheel and we may be able to take a page from Jackson's play book, who have a much bigger risk factor, Grizzlies.

She has a methodical method of going about getting recommendations from the entire system and coordinating that. She also was on the Idaho Conservation League for many years.

Do we have some one at the city who is our Tonya?

Tonya Anderson 307-734-4419
tanderson@jacksonwy.org

Let's have a look at their recommendations and their path to coordinating keeping our Wildlife Wild.

They also said, even if you put the trash out in the morning instead of over night.

The Bears will be meeting you at the 6:00 a.m. drop off for their free lunch. This coming from their Bear experts. They have a huge resource of experts who live in Jackson and who are trying to solve this problem....

Let's maybe, have a discussion on what did not work and what is working for them.

Lisa,
If I get Derek Craighead to come over from Jackson who is the top Bear Biologist in the world for the August 1st meeting. Can he be on the agenda?
He can answer any and all Bear questions,. I have to ask him first but, I need to know if that is possible, so let me know if that works.

All The Best,
Holley duPont

Subject: Gina Gordon Aspen

On another Note...

ASPEN has 100% Bear resistant trash cans in the city of Aspen...

Gina Gordon is the gal there. They have worked for 30 years to get to this point.

1-970-274-4141. ginna.gordon@aspen.gov

They do not tolerate anyone without a Bear proof can.

They have a committee that chooses the Bear trash cans, they are the IAGBC Intra, Agency, Grizzlie Bear Committee.

If you do not have a Bear resistant can the first offense is the cost of a can.

So either pay the fine the will continue or pay for a new can and avoid the offense.

Aspen seems to have the most ro-bust trash ordinance.

Bird feeders are not allowed unless suspended super high and has no crumbs under them.

Zero tolerance for feeding the wild life...

Hugely pro-active.

BRAVO Aspen.

She is sending the ordinances to me.

The Police monitor the Bears.

Best,
Holley

Subject: Re: Gina Gordon Aspen

Also, Jackson has a non profit that helps people pay for their can on a sliding scale.

Aspen ran into a problem and is re-writing the ordinance for the recycled trash. It has to be totally clean and free of food otherwise it needs to be out into a secured bear resistant can... These are some of their solutions..

Subject: Saddle Bike Path

It seems to me if Ketchum has so much money why they cannot improve their portion of the bike path over Saddle Road? I think it is about time that they do something about it before someone gets seriously hurt. Caution signs should be improved etc. Why can't this be taken into consideration? I inquired about this two years ago and the reply was That you were looking into it. That was two years ago. Why not take another look?

Thank You.

Subject: Please No Masks

Hello,

My name is Marcia Pillon and I live at 105 Audubon Pl in Hailey.

I am trained as an Integrative Health Coach (by IIN) so I have dug into the research about how detrimental and ineffective masks are in terms of staying healthy. They do not stop the spread of viruses and they are often filled with bacteria, in addition to impeding the necessary flow of oxygen.

And, very importantly, it is criminal to make children wear masks. Face coverings significantly impede their emotional, social and educational development.

If members of our community want to wear masks, that is their choice of course. But, please, please don't mandate wearing them for those of us that have become informed and choose not to.

Thank you very much for listening.

Sincerely,

Marcia Pillon

Question/Comment

I'M EXPRESSING MY SUPPORT FOR BEAR-RESISTANT TRASH CONTAINERS AFTER THE SAD OUTCOME OF THE RECENT INCIDENT IN THE WARM SPRINGS AREA. A MOTHER BEAR WAS EUTHANIZED LEAVING 2 ORPHANED CUBS. SUPPOSEDLY A RESCUE GROUP TOOK IN THE CUBS WHICH I HOPE IS TRUE. I DON'T THINK WE CAN DEPEND ON EVERYONE IN THE AREA TAKING THE NECESSARY PRECAUTIONS TO PREVENT THIS FROM HAPPENING AGAIN. SO IF THERE IS A CONTAINER OUT THERE THAT WILL DO THE JOB LET'S GO FOR IT. THE EXTRA COST IS WORTH IT TO PROTECT OUR WILDLIFE.

Subject: no masks especially for children or anyone else!!!!

i realize that you elected leaders already know this because you have looking into this issue even more than the average person, due to the fact you are dictating and mandating actions upon the citizens who have elected you.

therefore, i assume you are in agreement finally with the science; that the only verified research on masks proves they are bacterial and toxin traps and do NOTHING to stop virus transmission. mandating masks is mandating poison.

first precept: DO NO HARM!!!!!!

Subject: Bear Resistant Trash Containers

I am in support of the concept of bear resistant trash containers and hope the city creates a task force to look into costs, transportability, size, and compatibility with our current waste hauler. I live in Warm Springs where this has been a constant problem so it would be great to figure out a solution that allows humans and wildlife to live together.

To the Ketchum city Council

Last week the female bear was Euthanized on my husband's property. I saw it firsthand. I am sending you this email in support of a law to require bear resistant trash containers. I made a \$200 donation to the Snowdon wildlife sanctuary in Mc Call to help the two Orphan cubs. Please take action so not to let this happen again!

Question/Comment

Bear proof trash containers need to be required in the Ketchum neighborhoods adjacent to bear habitat, i.e. West Ketchum and Warm Springs. I have lived at 127 Exhibition since 1993 and witnessed bears searching for food off and on over the years, usually in the spring and fall. Some years have been worse than others. However, these past two years the bear activity has been out of control with far more activity occurring in the summer months. This problem is obviously being caused by more garbage left outside due to more full time residents and short term renters in our neighborhood. On the morning before the sow was trapped and euthanized, I counted six garbage cans overturned with garbage strewn up and down the street. This morning, Tuesday, July 26, one day before our trash pickup, I counted three garbage cans left on the curb packed to the brim with garbage just waiting for another bear to come along. Apparently, the door-to-door talks with game officers and flyers distributed asking residents not to leave garbage outside did not do much good. Not everyone has the ability to store their trash indoors and some won't do so even if they know that it attracts bears. That is why I believe requiring bearproof trash containers is the only solution to the garbage problem and the only realistic way to keep our local bears away and alive. We owe it to the bears to keep them in the woods where they belong.

Thank you for your consideration.

Subject: Blaine County Bike trail

Hi Amanda,

My name is Beth Sas and I live in Cold Springs. We bought this home 2 years ago and we were so thrilled about the location of our back yard butting up to the bike trail. Now it's the bane of our existence.

The e bike situation is becoming totally out of control. People are going down this faster then they are allowed on the street in front of us. There are young kids 13 and under riding them very fast also. Now e bikes have come up with non assisted pedaling bikes which are essentially like riding a Vespa. I'm afraid someone or some animal is going to get hurt.

I'm hoping we can implement a speed limit and the class of e bike that is allowed on the trail. Can you let me know what steps I need to take to do something like this?

I appreciate any help or advice you can give me.

Thanks!

Beth Sas

Hi Barbara

Thanks for your email

We will be discussing the issue at the Aug 1 meeting- the agenda will be posted later today.

The meeting on Monday will be part of the process.

Hopefully you get our newsletter as this will explain more about what we have done on this issue over the last couple of years.

We will be seeking council direction on a few different initiatives at the Monday meeting.

Thanks again for reaching out, I encourage you to attend the council meeting if your schedule permits.

Neil

Hello Mayor Bradshaw and Ketchum City Council,

Would you please tell me what progress you have made on requiring bear proof garbage cans for parts of Ketchum?

Was it discussed at your last meeting? Any decisions?

The agenda posted online for your July 18 meeting shows nothing whatsoever about bears, garbage, Warm Springs garbage cans, etc.

So, are you ignoring this issue in the hope you don't have to kill another bear this year, and we will all forget about it??!

Neil, your email to me said you would be discussing this with city council / administration, then "reaching out" to Ketchum residents to find a consensus on a course of action. Is that in process?

Please tell me what you have done on this issue.

Thank you,

Barbara Browning

Subject: Ketchum trash management

Dear Mayor Neal & Council Members,

Ketchum must immediately take steps to properly manage and dispose of trash. This must be done to thwart pests and wildlife from feeding in receptacles and to keep Ketchum a beautiful preeminent mountain town.

Evidence of Ketchum's failure to successfully implement an effective trash management plan is in evidence (photos attached). Commercial dumpsters and residential trash bins throughout the city are often left open and so overflowing that lids cannot be closed. Poor trash management by homeowners recently led to a bear being euthanized leaving cubs without their mama. Poor trash disposal habits can easily lead to a rat infestation and disease as well as wildlife issues.

Most residents and visitors seek to dispose of garbage properly. As Ketchum's population increases so does the amount of trash. Bins located along Sun Valley Road and other streets fill and trash spills over or is left on the ground next to bins before Clear Creek returns to empty the bins. Either Ketchum needs additional bins or the city must contract for more frequent pick ups on weekends and when special events take place.

The recycling center in the light industrial area has become a dumping ground. Prominent and clear signage is required to better inform and educate residents and visitors about what is permitted at the Ketchum recycling center. Signage ought also direct people where to take non-recyclable items (tin and aluminum cans, boards and wood, pipes, mattresses, styrofoam, magazines, etc.)

This untenable problem is unacceptable. The Ketchum City Council should include in its budget a rapid transition to BEAR PROOF receptacles for all commercial businesses and residential properties (single family dwellings, townhomes, condominiums) within its jurisdiction no later than December 31, 2022, and require that all refuse containers be kept closed.

The Council ought to implement a robust communication plan to educate and inform all business owners, residents and visitors of proper trash disposal and the Ketchum recycling program. The Council should impose fines on those who flagrantly disregard proper trash management. Thank you for the opportunity to comment.

Sincerely,
GG Luke and Liz Keegan

Subject: Black Bear Issues

Mr. Bradshaw: I have followed the news media concerning your area's issues with black bear encounters, trash, and more. I lived in Lowman, Idaho for 17 years and was well aware of the hunters who bait bears in areas 1/2 to 1 mile from campgrounds and other recreation areas. In my opinion, this is nonsense as bears are allowed to eat human food placed in areas where hunted as bait, but bears are not allowed to follow the scent of human food eaten by campers, hikers, backpackers and fishermen. Perhaps it is time for Idaho to wake up and own up to the fact that we are creating our own problems with baiting bears. Maybe Idaho should also allow baiting mountain lions and other game animals and then see what happens when wildlife become aggressive, move into cities and town, and the safety of humans and pets becomes a greater issue.

Thank you for your time.

Gretchen Sherlin in Mountain Home
