Subject: Flood plain extension

Planning and zoning should reject the Marriotts request for an extension of the flood plain permit. This community has expressed loud and clear that it is unacceptable to build in flood zones. When we have a flood it becomes a community problem. Our water resources are scarce. Placing buildings near our water resources risks contamination to the water supply and the water ecology. Placing buildings in the flood zone could cause Ketchum residents to see increased insurance rates in an already stressed insurance environment. I think the extension should be denied. Bradshaw will be gone, so should his policies. A new day has dawned.
