Dear Ketchum Planning and Zoning Commissioners,

I am writing in support of Commissioner Brenda Moczygemba and the vital role she plays on the Ketchum P&Z Commission. Brenda consistently demonstrates a strong adherence to the City's zoning regulations and ensures that all decisions are grounded in the framework of allowed uses. She has a deep understanding of how to encourage smart and professional growth while protecting the unique character of Ketchum. As the only licensed architect on the commission, Brenda brings a valuable technical perspective that helps applicants receive constructive, concrete feedback. She is always professional, reasonable, and deliberate, leaving emotion out of discussions and focusing solely on what is best for the community. Her ability to build consensus and foster respectful dialogue among the commission and applicants is an asset to the process. Brenda's balanced approach not only strengthens the commission's work but also builds confidence in the fairness and integrity of its decisions.

Sincerely,
Aimee Haynes
Ketchum Voter
