| None – discussion only | | | | |
| | | | | |
| | | | | |

Reasons for Recommendation:

Meeting Date: July 3 2023

- City planning staff has been working with Economic and Planning Systems to develop a commercial demand analysis for Ketchum and financial feasibility studies to test the requirements of Interim Ordinance 1234
- City staff has presented the initial findings to the Technical Advisory Group and the Planning and Zoning Commission
- Two open houses for the public are scheduled for July 12th in the Community Meeting Room at City Hall

Policy Analysis and Background (non-consent items only):

Interim Ordinance 1234 was adopted in October 2022 with an effective period of one year. During the adoption process, and since its effective date, city staff received feedback from the development community outlining areas of concern as follows:

- The requirements of the interim ordinance mandates projects that don't pencil, resulting in a moratorium on development
- The ordinance forces the construction of all 2.25 FAR projects
- The ordinance requires the creation of more commercial space and it is unclear how much more commercial space the city needs
- The minimum residential densities cannot be built on interior townsite lots

To vet the questions/concerns, the city contracted with Economic and Planning Systems and HOLST Architects to conduct a commercial demand analysis, physically model various development scenarios, and develop a financial feasibility study to determine if those development scenarios pencil. All of these efforts were focused on identifying areas of the interim ordinance that are not achieving the goals of the ordinance and are not creating a development environment that helps the city achieve its goals.

The first phase of this work has been completed with preliminary findings on both the commercial demand analysis and the financial feasibility studies. Attachment 1 includes the packet provided to the Planning and

Zoning Commission at their June 27, 2023 meeting. The packet includes a slide deck presented to the Technical Advisory Group with an overview of preliminary findings and recommendations as well as the detailed models of the commercial demand analysis and all development scenarios.

The purpose of this discussion is to bring the City Council up to date on the progress of the project and outline the next steps for community feedback and preparation of the permanent ordinance.

City of Ketchum Planning & Building

STAFF REPORT KETCHUM PLANNING AND ZONING COMMISSION MEETING OF JUNE 27, 2023

WORKSHOP: EVALUATION OF INTERIM ORDINANCE 1234 STANDARDS

Introduction

Since its adoption in October, staff has been analyzing Interim Ordinance 1234 (the "interim ordinance"), gauging its effectiveness, and evaluating whether its meeting desired outcomes. The purpose of this workshop is to share everything we've learned so far with the Planning and Zoning Commission (the "Commission") and provide an opportunity for the Commission to ask questions regarding initial findings.

Key Questions

Through meetings and interviews with stakeholders from the design and development community, we've heard that the interim ordinance doesn't pencil, will result in a moratorium on development, forces 2.25-FAR maxed-out development, and will result in vacant storefronts by supplying more retail than Ketchum needs to meet demand.

Figure 1: Interim Ordinance Goals

After hearing this feedback, staff set out to answer the following key questions:

- Do the interim ordinance standards trigger either a moratorium on downtown development or force 2.25-FAR maxed-out development?
- Does Ketchum have enough commercial space to support its economic health?
- Is the 55% commercial on the ground floor requirement achievable given the space needed for the dumpster, transformer, and parking?
- Are the minimum residential density requirements achievable?
- What role does the residential penthouse play in the financial feasibility of a development project?
- Does limiting the residential penthouse size to no more than 3,000 square feet impact the financial feasibility of a development project?

The Planning Department has been working with technical experts, Holst Architecture ("Holst") and Economic and Planning Systems, Inc. ("EPS"), to help us answer these key questions. Holst has prepared an architectural feasibility analysis (See Attachment B) to evaluate whether the interim ordinance standards are achievable on different types of Ketchum townsite lots downtown, including 5,500-square-foot interior and corner lots and 8,250-square-foot interior lots. EPS has prepared a commercial demand analysis (See Attachments A & C) to help us understand Ketchum's current and future commercial demand. EPS has also prepared a financial feasibility study (See Attachments A & D)

to evaluate whether the interim ordinance results in projects with acceptable rates of return that developers can finance.

WHAT WE'VE LEARNED

Are the minimum residential density requirements achievable?

The Holst architectural studies demonstrate that the minimum residential density requirements are achievable on interior and corner 5,500-square-foot Ketchum townsite lots ("standard lots") and interior 8,250-square-foot Ketchum townsite lots ("long lots"). Their development concept models show that the minimum density requirements can be met for mixed-use and 100% residential development scenarios that comply with current zoning code dimensional standards and building code. A 100% residential development on an interior standard lot can accommodate up to 13 dwelling units of various sizes, which is five more units than required under the interim ordinance.

Figure 2: High Density Scenario (Holst Architectural Study, Page 7)

EPS studied the financial feasibility of development scenarios that provide the minimum number of residential units to meet the interim ordinance density requirements as well as higher density models. Although the densities are feasible from a design perspective, the EPS study shows that increasing residential density decreases the financial feasibility of a development project. Density and financial return have an inverse relationship because increasing the number of residential units decreases the number of larger penthouses that can be accommodated within a project.

What role does the residential penthouse play in the financial feasibility of a development project? As the development community has told us time and time again, the penthouse pays for the project. EPS's financial feasibility study demonstrates that penthouses pay for the cost of development. Providing multiple penthouses within a project significantly increases the development's financial return. EPS modeled two different 100% residential development scenarios that provide the minimum

number of residential units to meet the density requirement on a standard lot. Both scenarios provide 7 dwelling units to meet minimum residential density requirements. The only difference between the two models was the number of penthouses. Providing two penthouses as opposed to only one increases the development scenario's internal rate of return by over 11%.

Will limiting the residential penthouse size to no more than 3,000 square feet impact the financial feasibility of a development project?

Under certain development scenarios, limiting the size of penthouses to 3,000 square feet results in a feasible project, however, allowing for larger penthouses increases the financial feasibility of other development scenarios. EPS's financial feasibility study found that, "the ability to achieve top of the market rates is essential."

Is the 55% commercial on the ground floor requirement achievable given the space needed for parking, dumpster, and transformer? Holst's mixed-use development scenarios demonstrate that 55% commercial on the ground floor is achievable. The mixed-use models meet or exceed 55% commercial on the ground floor while also providing a dumpster that meets Clear Creek Disposal servicing standards, a transformer that complies with Idaho Power's clearance requirements, and required parking.

The mixed-use models show that to meet the 55% minimum, all leasable space on the ground floor must be commercial. With the total area required for the dumpster, transformer, parking, mechanical, and circulation, the 55% commercial requirement doesn't leave any remaining space on the ground floor for residential units. Limiting options for the building program, the 55% requirement can result in undesirable configurations of commercial space on the ground floor.

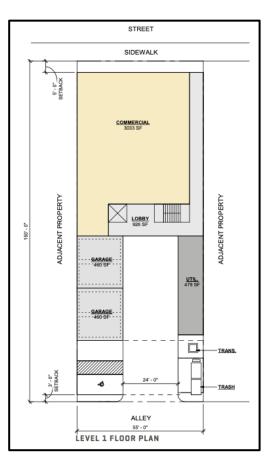

Figure 3: Mixed-Use Model Ground Floor (Holst Architectural Study, Page 13)

Does Ketchum have enough commercial space to support its economic health? EPS's commercial demand analysis found that Ketchum has unmet demand for commercial space, particularly for retail and restaurant uses. Ketchum could support up to 60,000 square feet of additional retail and restaurant space. In addition to current unmet demand, population growth and visitor increases in Ketchum will generate even more demand for commercial space supporting up to 40,000 square feet of additional retail and restaurant space by 2030. Ketchum can support an additional 100,000 SF (25% increase) in commercial space for retail and restaurant space by 2030.

Will the interim ordinance standards trigger either a moratorium on downtown development or force 2.25-FAR maxed-out development?

The Holst studies show that the interim ordinance does not force 2.25-FAR maxed-out development. The studies show development scenarios of various sizes ranging from 1.87 to 2.25 FAR. The Holst studies illustrate that the interim ordinance standards are achievable. In addition, current downtown development projects demonstrate that the interim ordinance will not trigger a de facto moratorium. Certain development scenarios under the interim ordinance, however, are not financially feasible. Based on their findings from the commercial demand analysis and financial feasibility study as well as interviews with key stakeholders in the development community, EPS has provided recommendations on revisions to certain interim ordinance standards, which can be found on page 23 of Attachment A.

Next Steps

Based on everything we've learned so far, staff will begin revising certain interim ordinance standards. These revisions will be informed by findings from Holst's architectural feasibility studies and EPS's commercial demand analysis and financial feasibility study. The city will be hosting two public open houses on July 12 at 12:00pm and 5:00pm to gather community feedback on Vibrancy and Housing 2.0: The Permanent Adoption of Interim Ordinance 1234.

COMMERCIAL DEMAND STUDY AND FEASIBILITY ANALYSIS

TAG Meeting

June 22, 2023

STUDY OBJECTIVES

Develop an inventory of commercial space in the City

Gain a collective understanding of current and future commercial space demand

Understand the financial feasibility of development under Interim Ordinance 1234

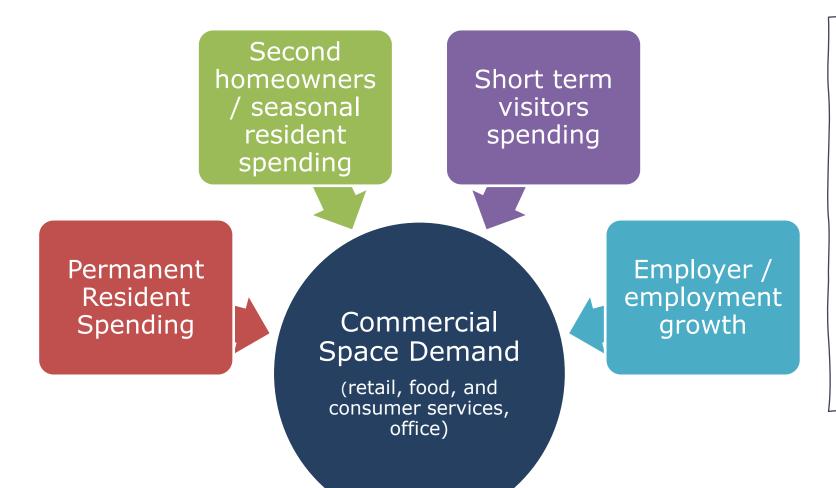

Identify long-term options for tracking commercial space and ensuring the community has enough commercial space to grow

TWO PRIMARY STUDY QUESTIONS

- Does the City of Ketchum have enough commercial space to support its economic health?
- Does Interim Ordinance 1234 allow for the development of feasible projects?
 - Are the parameters of the ordinance too limiting?
 - If so, when? under what conditions?

COMMERCIAL DEMAND ANALYSIS

APPROACH

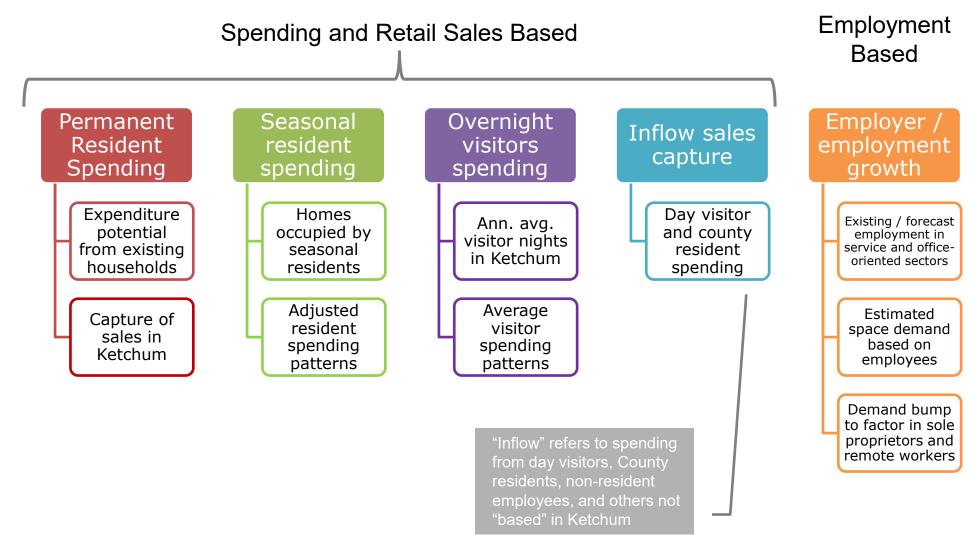

Note: Commercial space for this study is defined as space that is suitable for office employment, retail sales, personal services, and selling of food and beverages.

Commercial demand and space estimates account for both renter- and owner-occupied properties.

It does not include industrial or flex-industrial space/buildings. Commercial space does not encompass other commercial enterprises such as hotels.

APPROACH

RETAIL SALES ANALYSIS - EXPENDITURE POTENTIAL

Expenditure Potential* (City of Ketchum)

- Permanent residents: \$67.7 million
- Seasonal residents: \$37.6 million
- Overnight visitors: \$61.8 million
- Total exp. potential: \$167.1 million/year

Current Total Retail Sales in Ketchum

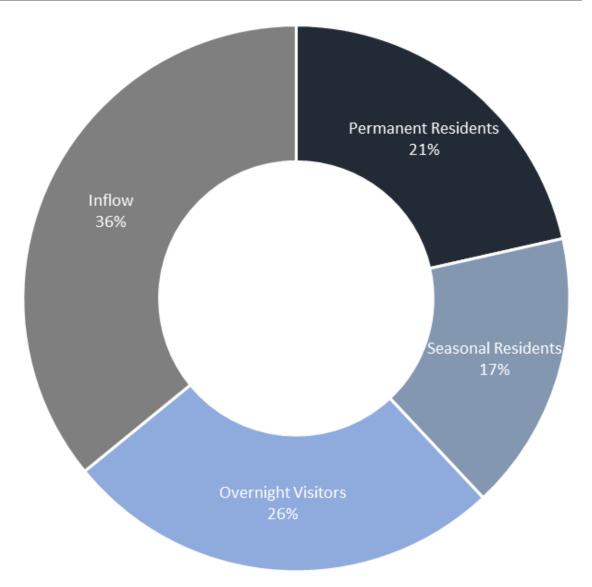

\$146.6 million of retail sales in Ketchum

Capture/ Leakage

- The delta of \$20 million of expenditures "leak" out of the area
- Opportunity to "capture" more of the expenditure potential

RETAIL SALES ANALYSIS - SALES FLOW

- Ketchum "captures" sales by different groups
 - Permanent residents
 - Seasonal residents
 - Overnight visitors
 - Inflow
- "Inflow" includes day visitors, County residents, non-resident employees

CURRENT COMMERCIAL SPACE DEMAND

- The City's existing inventory of retail/restaurant space is approx. 415,000 sq ft (not including pipeline projects)
 - 60% is supported by permanent resident, seasonal resident, and overnight visitor spending (based on current spending and capture rates)
 - The remaining 40% is supported by "inflow" spending

EPS estimates employment in office and service sectors generate demand for 300,000 to 325,00 square feet of office space

- The city's existing office inventory is estimated at approximately 317,000 sq ft
- Current demand for office and service employment space is generally being met

60% 245,000 sq. ft. 40% 170,000 sq. ft.

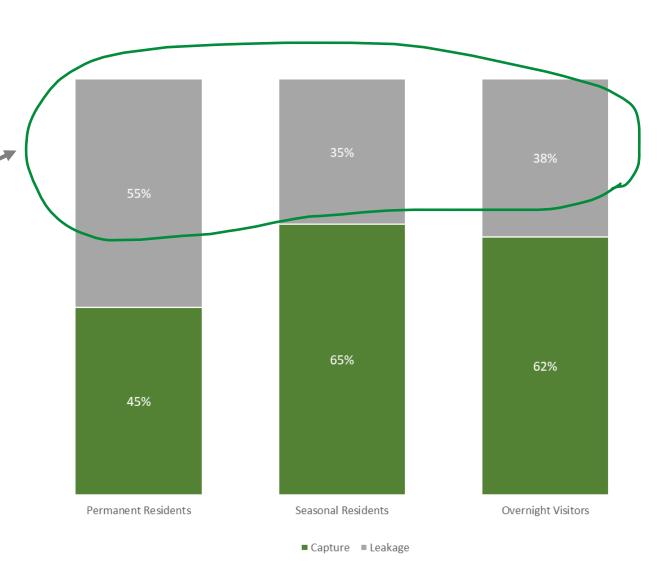

■ "Inflow" spending

■ Permanent Resident, Seasonal Resident, Overnight Visitor spending

CURRENT RETAIL SALES LEAKAGE

Depending on the group, between 35% and 55% of expenditure potential is spent outside of Ketchum (aka: leakage)

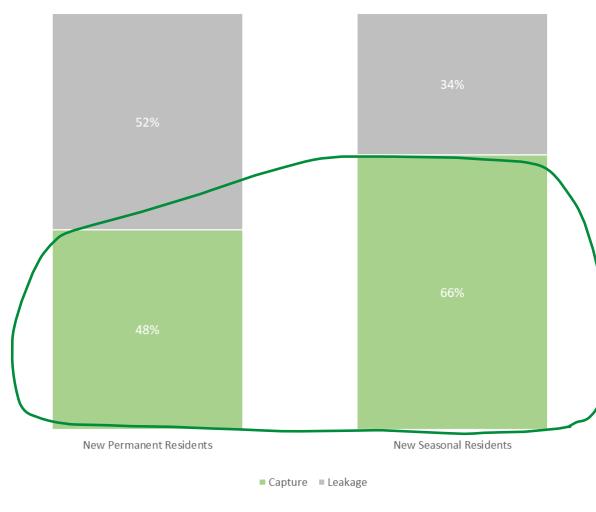

- There is potential to capture a portion of leakage which could support up to 60,000 square feet of additional retail/restaurant space in the City
- Some leakage is likely not possible to be captured

FUTURE COMMERCIAL SPACE DEMAND

- In addition, permanent and seasonal resident populations will grow by 2030* and generate more demand
- New spending associated with this population growth can support nearly 40,000 square feet of additional retail/restaurant space by 2030
- Combined with the recapture of leakage, there is demand for a 25% increase in space for retail/food uses by 2030 (100,000 sf of new space)

Employment growth through 2030 will generate demand for 32,000 square feet of office/service space

* Permanent resident population growth estimated at 1.5% annually

COMMERCIAL DEMAND FINDINGS

Does the City of Ketchum have enough commercial space to support its economic health?

- Finding 1: There is currently unmet demand for commercial space in Ketchum, specifically retail and restaurant space.
 - Expenditure Potential = 167 Million, Actual Retail Sales = 146 Million
 - Potential capture expenditures spent outside of Ketchum (up to 60,000 sf of demand)
- **Finding 2**: The growth of the resident and visitor base will generate additional demand for retail/restaurant space (40,000 sf) that needs to be accommodated
- Finding 3: Growth of the Ketchum economy will generate demand additional 32,000 sf to accommodate office users and personal services businesses
- **Finding 4**: The community core is an essential area for capturing potential retail sales and the most desirable place for office/service uses
- **Finding 5**: There is a risk of losing commercial space (especially affordable space) to redevelopment

BARRIERS TO COMMERCIAL AND ECONOMIC GROWTH

- Land availability is limited and the cost of land too high for large format uses (e.g. big box retail and large format industrial)
- Current land use regulations that do not allow for large format uses
- Cost of housing and lack of housing supply to support workforce growth

INFILL FEASIBILITY ANALYSIS

MODEL INPUTS

INFILL FEASIBILITY

| Market Inputs | |
|---------------------------------------------------|-------------------|
| Penthouse ¹ Condo Price (per SF) | \$2,000 |
| Condo Price (per SF) | \$1,250 |
| Market Rate Apartment (Monthly Rent per SF) | \$4.00 |
| Community Housing Apartment (Monthly Rent per SF) | \$1.50- \$2.50 |
| Commercial Space (Monthly Rent per SF) | \$3.50 (NNN) |

| Construction Cost 1 | Inputs |
|----------------------------------|-------------|
| Land Cost (per SF) | \$235 |
| Parking ² (per space) | \$5,000 |
| Residential Hard Cost (per SF) | \$750-\$900 |
| Commercial Hard Cost (per SF) | \$600-\$700 |

^{1 -} Penthouse Condo is defined as a condo greater than 2,500 sf in size with luxury finishes and premium orientation within the building.

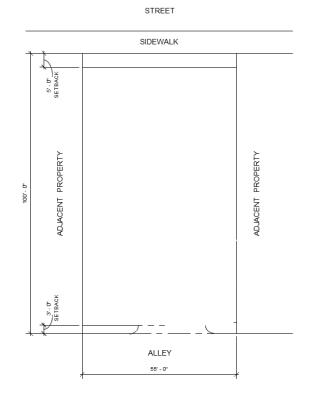

²⁻ Cost for enclosed garage space on ground floor in addition to core and shell cost for the ground floor

OVERALL FINDINGS

INFILL FEASIBILITY

- The penthouse units pay for the cost of development and the community amenities included.
 - The ability to achieve top of the market rates is essential.
 - The ability to fit more than one penthouse unit greatly increase feasibility even with residential density minimums
 - The cap on unit size does impact flexibility which can hurt feasibility.
- Other findings
 - Market rate condos (not large penthouses) produce a greater return than market rate apartment
 - Depth of demand for both is unknown.
 - Providing community housing units on-site is generally more favorable (in terms of return) than fee in lieu.
 - The flexibility to pay for small portions of requirement in fees is important.

FEASIBILITY FINDINGS

INFILL FEASIBILITY

Ordinance Considerations:

- Increase or eliminate the 3,000 square feet limit on unit size OR allow larger unit sizes on top/third floor
- Provide greater flexibility (i.e., reduction) on amount or percent of commercial required as long as its on ground floor and street oriented, especially for the larger interior long lots
- Allow for community housing on ground floor with desired design elements (e.g., porches, multiple entrances/doors) especially for interior lots
- Consider reducing the minimum density requirement some in 100% residential projects

FEASIBILITY FINDINGS

INFILL FEASIBILITY

Long-term Considerations

- Does it make sense for the regulations to favor generating commercial space over community housing (or vice versa)?
 - Trying to achieve both outcomes in one building/project is difficult to regulate and to develop. The market support for the most feasible building types (e.g. mixed use building with commercial space, community housing, and penthouses) may not allows be present.
- Is there potential/support for providing density/height bonuses or regulatory incentives (e.g., requirement reductions/waivers) for projects that provide desired community benefits beyond what the base zoning allows?
 - Examples:
 - Can there be a menu of community benefits to choose from in a project?
 - Is there support for greater height if more community housing is provided?
 - · Is there support for reduced community housing requirements if projects provide more commercial space or specific types of commercial spaces like restaurants?

- OPTION 3: 100% RESIDENTIAL DEVELOPMENT HIGH DENSITY

ASSUMPTIONS

- MINIMUM RESIDENTIAL DENSITY REQUIREMENTS AND PERCENT COMMERCIAL ARE CALCULATED PER THE REQUIREMENTS OF INTERIM ORDINANCE 1234.
- MIXED-USE SCENARIOS INCLUDE COMMERCIAL SPACE THAT MEET OR EXCEED 55% OF THE GROUND FLOOR'S GROSS FLOOR AREA (GSF).
- ALL SCENARIOS PROVIDE A 5-FOOT SETBACK FROM FRONT AND STREET SIDE PROPERTY LINES ON ALL FLOORS.
- ALL SCENARIOS INCLUDE TRANSFORMER AND DUMPSTER LOCATIONS PER IDAHO POWER AND CLEAR CREEK DISPOSAL REQUIREMENTS.
- ALL SCENARIOS ASSUME COMMERCIAL USE IS EXEMPT FROM PROVIDING OFF-STREET PARKING.
- GSF CALCULATION INCLUDES STAIR TOWERS AND ELEVATORS ON THE GROUND FLOOR ONLY AND EXEMPTS UP TO 4 ENCLOSED PARKING STALLS.
- EFFICIENCY %:
 - -NET FLOOR AREA EXCLUDES LOBBIES, CIRCULATION, AND STORAGE AREAS.
 - -A SQUARE FOOT REDUCTION FOR SHAFTS, WALLS, AND OTHER NON-ASSIGNABLE AREAS HAS NOT BEEN APPLIED TO RESIDENTIAL NET FLOOR AREA CALCULATIONS.
- ALL SCENARIOS TAKE ADVANTAGE OF FAR BONUS IN EXCHANGE FOR COMMUNITY HOUSING.
- COMMUNITY HOUSING IS EXEMPT FROM PROVIDING PARKING.
- COMMUNITY HOUSING CONTRIBUTION SATISFIED BY EITHER: (A) PROVIDING ENTIRE CONTRIBUTION THROUGH DEED-RESTRICTED UNITS ON SITE OR (B)
 PROVIDING DEED-RESTRICTING UNITS ON SITE AND PAYING FEE IN LIEU FOR THE REMAINDER.
