STAFF REPORT
HISTORIC PRESERVATION COMMISSION
REGULAR MEETING OF JANUARY 4th, 2023

PROJECT: TNT Taproom Historic Building Alteration Request

FILE NUMBER: H22-065

APPLICATION TYPE: Request to Alter a Historic Structure

REPRESENTATIVE: Joey Stevenson, Architect

PROPERTY OWNER: PM Lemman Investments LLC (Max Lemman)

REQUEST: Proposal to modify existing 2nd floor balcony to allow for patron use

LOCATION: 271 E Sun Valley Rd (Ketchum Townsite S W 23' x 30' of Lot 4 Blk 17)

ZONING: Retail Core Subdistrict of the Community Core (CC-1)

NOTICE: The public hearing notice was published in the Idaho Mountain Express on December 14th, 2022. A public hearing notice was mailed to adjacent properties within 300 feet of the project site on December 14th, 2022. A public hearing notice was posted on the project site on December 14th, 2022. A public hearing notice was posted on the City website on December 14th, 2022.

REVIEWER: Adam Crutcher, Associate Planner

EXECUTIVE SUMMARY

The applicant, PM Lemman Investments LLC, has submitted a Request to Alter a Historic Structure located at 271 E Sun Valley Rd (Ketchum Townsite Lot S W 23' x 30' of 4 Blk 17) within the Retail Core Subdistrict of the Community Core (CC-1) Zone. The building is currently occupied and known as TNT Taproom, a bar establishment, but has been referred to historically as the Dynamite Shed. The request proposes to modify the existing second floor balcony by raising the height of the existing railing, adding a backsplash and two proposed light fixtures as shown in Attachment B.

The project is subject to Historic Preservation Commission (HPC) review pursuant to KMC 17.20.010.B. HPC review is required for all requests for partial or total demolitions, exterior alterations, and additions to all structures on the Historic Building List.

BACKGROUND/HISTORY

The Dynamite Shed was constructed in 1880 and was built of stone to store explosives and other mining supplies. After the Silver Crash of 1894, the building frequently changed ownership and was either vacant or housed small businesses. In the 1950's Glenn & Esther Mueller were owners and occupants of a gift shop which ran in the building. From the 1990's to 2011, Bobbie Burns owned and operated a business out of the building. Burns is well known in the community for his innovations to the skiing industry throughout the 1970's and 1980's. Throughout the years, the ground floor has been used for various businesses including gift shop, Jailhouse beauty shop, espresso bar, ski shop, real estate office, and currently as a bar.

The original structure was a one-story stone building with a tin roof but has received numerous alterations since its construction. Based on staff research of City of Ketchum records, Sanborn maps, and research at the Community Library, exterior alterations to the structure have occurred in 1950, 1993, and 2012. The first known alteration in 1950 was for a second floor addition by the previously mentioned Glenn & Esther Mueller. The Muellers constructed the second floor to allow for themselves to live above the gift shop they ran on the ground floor. Other alterations were found through building permits in city records which are listed below as well as in Attachment D:

- 1991 Building Permit: Scope of work was entirely interior and did not affect the external appearance of the building.
- 1993 Building Permit: The 1993 alteration included painting of the window shutters blue, the addition of a window to the entry side of the building, and new stucco material. Due to minimal information in the building permit, staff was not able to identify where the proposed stucco material was to be used. This alteration was done when Bobbie Burns was the owner of the building and used the ground floor for a ski shop.
- 2012 Building Permit: The alteration in 2012 included the removal of the window shutters, 2nd floor wood siding and deck painted flat black, 2nd floor windows extended to floor, and entry side windows and doors expanded and relocated as shown in Figure 1 below. This is the last alteration to staff's knowledge and is how the building looks today.

Figure 1: Present day appearance of Dynamite Shed
271 E Sun Valley Rd Alteration (H22-051)

ANALYSIS

The HPC may approve, approve with conditions, or deny a Request for Demolition or Alteration application based on the four criteria specified in KMC 17.20.030.C & 17.20.030.D. The following analysis evaluates the proposed alteration to the TNT Taproom in relation to the review criteria for requests to alter structures on the Historic Building List. The project plans are attached as Exhibit A.

17.20.030.C.1 - Is the structure of historic or architectural value or significance and does it contribute to the historic significance of the property within the Community Core?

The Dynamite Shed is one of the 24 structures on the Historic Building List adopted by the HPC on October 19, 2021. The 2005 Walsworth Associates Windshield Survey identified the Dynamite Shed as a historic building due to its themes of commerce/trade and culture. As mentioned above, the existing structure was built in 1880 for the purpose of storing explosives sold by the Gillette & Evans hardware store on Main Street and is a rare example in Ketchum of a stone building from the 1800's.

The Dynamite Shed building has social and cultural value to the community and architectural significance within downtown Ketchum. The original structure is an example of Ketchum's mining history in the 1880's and early 1890's. The building was also occupied by Bobbie Burns who is a key figure of Ketchum's ski industry in the 1970's & 1980's. The use of stone is one of the few remaining examples of that style of architecture in the 1800's. Many of the other stone buildings constructed in the 1800's are no longer present within the community.

Due to the building being situated in its original location and the stone architecture still remaining on the ground floor, staff believes the structure is still of historic and architectural significance.

17.20.030.C.2 - Would the loss, alteration of, or addition to, the structure adversely affect the historic integrity of the structure, impact the significance of the structure within the Community Core, impact the architectural or aesthetic relationship to adjacent properties, or conflict with the Comprehensive Plan?

Historic integrity measures how effectively a building's materials, design, feeling, location, association, workmanship, and setting convey the property's historic significance. The Dynamite Shed has been heavily altered since its original construction in 1880. While the structure has remained in its same location and retained its original stone materiality, additions and alterations have changed the appearance of the building.

The proposed project includes the elevation of the existing guardrail, installation of a backsplash, as well as two exterior lighting fixtures. The alteration of the guardrail does not negatively impact the historic or architectural integrity of the structure as the deck was an addition to the original structure and has been altered multiple times over the past 60 years. The proposed deck alteration raises the height of the existing guardrail for patron safety and will keep the same architectural style which currently exists. The deck alteration follows standard #9 of the Secretary of the Interior Standards for Rehabilitations which states,

"New additions, exterior alteration, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and

shall be compatible with the massing, size, scale and architectural features to protect the historic integrity of the property and its environment”.

The proposed alteration to the guardrail will be compatible with the existing building as it only raises the height of the railing and does not propose to redesign the guardrail system to a different architectural style. The proposal will keep the same coloration of the existing deck and the proposal is minor in nature. The alteration does not impact the historic stone elements of the building on the ground floor which is the primary historic and architecturally significant aspect of the structure.

One of the vision statements located within Chapter 4 of the 2014 Ketchum Comprehensive Plan states, “Protect and support our architectural heritage through appropriate historic preservation standards and guidelines”. This vision statement is being met as the HPC has identified the building as historic and is reviewing the proposed alteration against the criteria determined by the HPC.

As the proposed alteration does not impact the stone material on the ground floor, staff believes the project does not adversely affect the historic integrity of the structure, impact the significance of the structure or is in conflict with the Comprehensive Plan.

17.20.030.C.3 - Does the structure retain the requisite integrity to convey its historic and/or architectural significance?

Staff believes the Dynamite Shed retains its historic integrity through the feeling and association conveyed through the stone materials used to house mining supplies in the 1880’s. The building is in good condition and contains the same stone materials from the original construction. Many alterations have occurred after the original construction and have changed the architectural characteristics of the building, primarily on the second floor. As many of the alterations have occurred on the second floor, the buildings still retains the stone material on the ground floor which makes the building architecturally significant.

17.20.030.C.4 - Does the proposed demolition or alteration adversely affect the historic significance or architectural distinction of the structure or the Community Core?

The proposed alteration/addition does not adversely affect the historic significance or architectural distinction of the structure. The alterations/additions won’t detract from the existing historical qualities which make the existing building significant (original stone structure being used for mining supplies). The architectural significance of the Dynamite Shed is it being one of the few remaining stone structures from the 1800’s. This architectural significance will not be negatively impacted due to the proposed additions/alterations as they are focused around the second-floor deck.

STAFF RECOMMENDATION

After considering the project plans, staff’s analysis, the applicant’s presentation, and public comment, staff recommends the Historic Preservation Commission deliberate and move to approve the Request to Alter a Historic Structure located at 271 E Sun Valley Road.

RECOMMENDED MOTION

“I move to approve the Request to Alter a Historic Structure for the proposed alteration to the structure located at 271 E Sun Valley Rd.”

ALTERATION OR DEMOLITION REVIEW EVALUATION STANDARDS

SECTION 3 OF ORDINANCE 1216 STANDARDS FOR ALL PROJECTS

The HPC may approve, approve with conditions, or deny a Request for Demolition or Alteration application based on the following criteria:

1. Is the structure of historic or architectural value or significance and does it contribute to the historic significance of the property within the Community Core.
2. Would the loss, alteration of, or addition to, the structure adversely affects the historic integrity of the structure, impact the significance of the structure within the Community Core , impact the architectural or aesthetic relationship to adjacent properties, or conflict with the Comprehensive Plan.
3. Does the structure retain the requisite integrity to convey its historic and/or architectural significance.
4. Does the proposed demolition or alteration adversely affect the historic significance or architectural distinction of the structure or the Community Core.

Appropriate alterations might include but are not limited to:

1. Changes to the building’s interior that are not visible from a public street, alley, park, or other public place;
2. Changes to internal building systems that will not adversely affect the external appearance of the building;
3. The erection or removal of temporary improvements.
4. Adaptive reuse consistent with the Secretary of the Interior’s Standards for Rehabilitation and Idaho Code Title 67-4618.

The HPC shall consider the unique circumstances of each proposed demolition or alteration. Approval of each individual Demolition or Alteration application is unique to that property and does not constitute a precedent for other properties.

A two-story building with a stone ground floor and dark wood upper floor. The ground floor features a stone wall with a large window on the left and a glass door in the center. The glass door has a circular logo that reads "TNT TAPROOM" at the top, "SUN VALLEY IDAHO" at the bottom, and a central graphic of a beer tap. To the right of the door is a dark wooden door with the number "271" above it. The upper floor has a dark wood balcony with a railing and three large windows. A chimney is visible on the roof.

I have read and understand Sec. 301.(a) Permits Required; Sec. 301.(b) Exempted Work; Sec. 305.(b) Inspection Requests; Sec. 305.(d) Approval Required; and, Sec. 305.(e) Required Inspections.

I have also read and understand Sec. 303.(a) Approved plans and specifications shall not be changed, modified or altered without authorizations from the building official, and all work shall be done in accordance with the approved plans; and, Sec. 303.(b) Approved plans shall be kept on the building site at all times during which the work authorized thereby is in progress.

Prior to Receiving a Final Inspection and/or Certificate of Occupancy:

I agree to complete all accessory improvements including landscape, paving and amenities and other improvements as represented herein and as approved by Design Review of the project.

Upon completion of these improvements, I will notify the Ketchum Planning Department for an inspection. (From November 15 to May 15 a performance bond may be accepted as security for installation of said improvements in the amount of 150% of the total estimated cost.)

CITY OF KETCHUM
ZONING CODE TITLE 17
ADMINISTRATIVE DESIGN REVIEW EXEMPTION
FINDINGS AND DECISION

PROJECT: The "Dynamite Shed Building"
PROJECT #: 12-004
OWNERS: Schuchart Dow Inc.
LOCATION: Lot 4 Block 11 Ketchum Townsite (271 Sun Valley Rd)
ZONING: Community Core (CC)
REQUEST: Exemption of Design Review requirement - Administrative Approval of minor project.

1. The City of Ketchum is a municipal corporation organized under Article XII of the Idaho Constitution and the laws of the State of Idaho, Title 50. Under Chapter 65, Title 67 of the Idaho Code, the City is required to pass certain ordinances regarding land use, including a zoning ordinance.
2. Pursuant to Zoning Code Title 17, Section 17.96.100, the Administrator is authorized to exempt from the Design Review process projects determined to be so minor as to neither conflict with the Design Review Standards of this Section, nor impact any adjacent properties. Examples include, but are not limited to, minor deck additions, additions of a window or door, and minor landscape changes.
3. The proposed project consists of a change to one existing door and window on the Sun Valley Road facade of the subject building.
4. The proposed project that includes window and door changes to the Dynamite Shed building is so minor as to not conflict with the Design Review Standards of Zoning Code Title 17, Chapter 17.96, nor to impact any adjacent properties.
5. On February 21, 2012, the owners gained approval from the City of Ketchum City Council for a Right-of-Way Encroachment Agreement for the existing (roof overhang & porch) and proposed (door canopy) structural elements of the building.

Decision: Approved with the following condition:

- That the rough opening for the doorway not exceed 8 feet in height and the applicants will make an effort to replace the original stone around the central window on the Sun Valley Road façade, where such work will not compromise the historical quality or structural integrity of the existing structure.

DATED this 29th day of February, 2012.

Rich Fabiano or Deborah Burns, Co-Chair
Planning and Zoning Commission

Joyce Allgaier
Planning Manager

Subject: Dynamite Shed- Entry Door Revisions
Attachments: 2012-02-29 Dynamite Entry Door- Revised.pdf

Hi Joyce,

Based on your feedback, we have revised the proposed new entry door to the Dynamite Shed as described in the attached sketch so that it exists within an 8'-0" rough opening- approximately 1'-0" less than what we had originally proposed. As you will see on the attached, we have omitted the steel wide flange beam and instead, will rely on the entry canopy steel plate to carry the load of the rock. We hope that you find these adjustments in line with your comments and acceptable to proceed with your approval so that our clients can work towards permitting.

If you should have any questions regarding the sketch or design intent, please do not hesitate to contact me direct at the telephone number below or by email.

Thanks,
Edward

*called Ed. T on
2/24 to inform*

Joyce,

We have designed a couple projects in the Aspen area, but nothing built (yet). Similarly for Sun Valley... we have one house project under construction in City of Ketchum and another one in Bigwood about to start. Someday we hope the Center of Arts will pick up!

Thanks for the note!
Edward

Edward – just wondering if O K A has done some work in Aspen? I seem to remember the firm name from there, but the firm has quite a presence here I see. Just curious.

Joyce

Subject: RE: Dynamite Shed (Bobbie Burns Building)

Hi Joyce,

As follow up to our telephone conversation earlier, I have attached a quick sketch of the proposed Entry Door and Canopy alongside the façade with dimensions, also showing critical alignments with the existing features of the building. As you will see, both the door and the proposed steel lintel are buried within the thickness of the stone. Since the door opens to the interior, it is placed inwards quite a bit. I hope my sketch helps clarify- rather than causes more confusion!

Also, for your reference I have included two images: The Hot Rod House canopy is similar to what we propose with Dynamite Shed with a 3/8" thick steel plate and hemmed edge. Similarly, the Laurelhurst Residence image shows a steel canopy with the small light detail which we plan for Sun Valley.

If you should have any questions or require further clarification, please do not hesitate to call or email.

Thanks,
Edward

Subject: RE: Dynamite Shed (Bobbie Burns Building)

Hello Mike,
Pleasure to meet you as well. Thank you for stopping in the other day.

I have been in touch with Edward Lalonde at Olson Kundig and we are handling the details of the design review. I don't see a problem with the project gaining its administrative approval. We have a some concern about the additional canopy over the main door, in that it is changing the rhythm of the openings on that facade (in particular the height of the openings), covers more of the historic rock material (a significant and unique character of that building), and functionally, it seems redundant in that the canopy is located under a porch already. Is there any exterior lighting that is existing or proposed? If so, the lighting must be in compliance with the "Dark Sky" provisions of our land use code, Section 17.132. Someone needs to actually file a design review application and the \$100 processing fee. That application is on the city's website at www.ketchumidaho.org under Community and Economic Development, Planning Division, applications.

Regarding the reroofing of the building, you can proceed with a building permit for the roofing project without effecting the design review process. It can be separate or part of your building permit for the other work.

The owner of the building will need to get an encroachment license for the existing porch overhanging the Sun Valley Road right-of-way (in this case, the sidewalk). Should the canopy be approved as part of the design review, we would want that included in the encroachment license. The encroachment license application is attached and requires city council approval. The application describes what we need in terms of a site plan, dimensions, etc. (We handle this application at council on the consent agenda to keep the process short.) This can be applied for at any time and we would get it in front of the council at the next possible meeting. This requirement is triggered in conjunction with getting a building permit even if the encroachment exists, but it will not hold up the permit. I have attached an application for this.

Please let me know if you have any questions or if I can assist with something. Thank you.

Regards,
Joyce Allgaier
