

City of Ketchum

**CITY COUNCIL MEETING AGENDA MEMO**

Meeting Date:  Staff Member/Dept:

Agenda Item:

**Recommended Motion:**

I move to approve Purchase Order 23087 for a Rescue Operations Drone from Unmanned Vehicle Technologies not to exceed \$18,939.97

**Reasons for Recommendation:**

- We anticipate flooding to occur within the next 45 days. A full understanding of the status of the floods requires fly-over. This can be done by contract aircraft; however, use of unmanned aerial vehicles (UAV) is safer and can be done more frequently. It is possible to get very detailed information about the extent of flooding, and risks to the public using a UAV. For example, it would be possible to locate persons in flood waters and to “follow” them if they are washed downstream. This drone has both infrared and daylight video feed. It also has a speaker to allow communication to stranded persons.
- The drone would have regular use beyond flooding. It has been on the planned acquisition list for other rescues as well. The drone will allow exact pinpointing of injured persons much more quickly than rescuers on the ground can when persons are injured in the backcountry. It would also allow rapid size up of wildfires and even large structure fires, increasing the effectiveness of ground crews.
- Delivery of the drone can be within 7 days of approval. Training on operation would begin immediately to allow use during this flooding season.

**Sustainability Impact:**

None

**Financial Impact:**

None OR Adequate funds exist in account:	Purchase would require an allocation of an unbudgeted capital expenditure of no more than \$18,939.97 (MSRP) with adequate funds existing within the overall department budget. It is on Sourcewell cooperative bid at a 5% discount, bringing it to an expected cost of \$17,992.97.
