

CITY OF KING PLANNING BOARD

MEETING DATE:

AUGUST 24, 2026

PART A

Subject:	REQUEST FOR THE 10/70 PROVISION BY LMC AUTOMOTIVE.
Action Requested:	Recommendation on granting the 10/70 provision to this industrial site off Industrial Drive.
Attachments:	• Zoning application/permit • Site plan

Todd Cox, Int. Planning & Zoning Official Emerson Wright, Planning & Zoning intern	This abstract requires review by:	
	City Manager	City Attorney

PART B

Introduction and Background:
We have a request from LMC Automotive (Justin & Marty Myers) to use our 10/70 provision which would allow them to use up to 53.42% of their site. The site is in our WS-IV watershed and would only allow for 36% use of the 26-acre tract but the ordinance will allow up to 70% with council approval. They are asking for 4.63-acres of our existing 620-acres we have setback for this type of use.
Discussion and Analysis:
This would be a good site to use the 10/70 provision.
Budgetary Impact:
Additional county and city tax base.
Recommendation:
Staff has reviewed the owner's request and would recommend it for approval if the rezoning passes for this site.

Watershed Requirements –

Built-upon area means built-upon area means impervious surface and partially impervious surface to the extent that the partially impervious surface does not allow water to infiltrate through the surface and into the subsoil. "Built-upon area" does not include a slatted deck; the water area of a swimming pool; a surface of number 57 stone, as designated by the American Society for Testing and Materials, laid at least four inches thick over a geotextile fabric; a trail as defined in G.S. 113A-85 that is either unpaved or paved as long as the pavement is porous with a hydraulic conductivity greater than 0.001 centimeters per second (1.41 inches per hour); or landscaping material, including, but not limited to, gravel, mulch, sand, and vegetation, placed on areas that receive pedestrian or bicycle traffic or on portions of driveways and parking areas that will not be compacted by the weight of a vehicle, such as the area between sections of pavement that support the weight of a vehicle (except as exempted by state law).

Sec. 32-288. - Watershed areas; density and built-upon limits.

(a) *Project density.* The following maximum allowable project densities and minimum lot sizes shall apply to a project according to the classification of the water supply watershed where it is located, its relative location in the watershed, its project density, and the type of development:

b. Non-residential and all other residential — 24 percent built-upon area; or 36 percent built-upon area without curb and gutter street system.

(2) *High density development (10/70 provision, requires approval by the city).*

WS-IV Critical Area:

a. All types — 24 percent to 50 percent built-upon area.

WS-IV Protected Area:

a. All types — 24 percent to 70 percent built-upon.
