Subject: Advisory commission - possible position

Good evening,

My name Conrad Kerber. I've been teaching the high school sciences here at KMHS for a couple years now. I am inquiring as to the possibility of membership to the Parks and Rec Advisory Commission. One of my students, Finnian Sweeney, your youth representative, asked if I would be interested, should a position become available.

Not only as a teacher of Environmental Science / Systems for many years now, but I am also active with my memberships in various conservation / preservation societies, and I am interested in assisting the community in any manner that may be productive and impactful.

Please let me know if there is a place where I could be useful within the Parks and Recreation department.

Thank you.

Conrad Kerber M.Ed.
