 - a) <u>Credit Risk</u> is the risk of loss due to the failure of the security issuer, financial institution, or backer.

Credit risk may be mitigated by:

- Pre-qualifying the financial institutions, broker/dealer, intermediaries and advisors with which the Village will do business; and
- Diversifying the investment portfolio so that potential losses on individual securities will be minimized.
- b) <u>Interest Rate Risk</u> is the risk that the market value of securities in the portfolio will fall due to changes in general interest rates. Interest rate risk may be mitigated by:
 - Structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations thereby avoiding the need to sell securities on the open market prior to maturity; and
 - > By investing operating funds primarily in shorter-term securities.

- 2) Liquidity: The investment portfolio shall remain sufficiently liquid to meet all operating requirements that may be reasonably anticipated.
- 3) Yield: The Village's investment portfolio shall be designed with the objective of obttaining a market rate of return throughout budgetary and economic cycles, considering the investment risk constraints and Village's cash flow needs, return on investment is of least importance compared to the safety and liquidity objectives described above.
