

INTELLIGENT TRAINING SYSTEM™ XTREME (I.T.S. XTREME)

Prop-enabled extinguisher training that's ready in a flash

ADD ON DIFFERENT TRAINING PROPS TO CREATE A VARIETY OF REALISTIC FIRE SCENARIOS FOR YOUR TRAINEES

LION's I.T.S. Xtreme senses where the trainee aims and sweeps the SmartExtinguisher® and varies the flames automatically, putting the fire out only when the extinguisher is used correctly. The SmartExtinguishers are recharged quickly and easily with only compressed air and water.

LET THEM SEE HOW DIFFERENT FIRES REALLY FUNCTION

In addition to all of the features of the Intelligent Training System, the I.T.S. Xtreme allows instructors to mix and match our add-on props to experience the flame behavior of everyday items. Teach the proper method of extinguishing a Class A Trash Can fire, Class B Stove Top and Paint Locker fires, as well as a Class C Electric Motor Prop.

BE READY TO TRAIN IN MINUTES

We've heard from instructors like you that they spend far more time preparing the site before

training and cleaning it up after than actually teaching their trainees to use an extinguisher. Not anymore. The I.T.S. compact design makes it easy for one person to set up in just a few minutes. The handheld controlled makes it easy to light the flames with the push of a button, so the evolution can start as soon as the next trainee is ready. Plus, the I.T.S. is constructed with industrial grade stainless steel components so that it can withstand years and years of intense training.

EXTINGUISHER TRAINING WITHOUT THE MESS

The I.T.S.'s easy set up and field rechargeable air/water SmartExtinguishers eliminate the mess associated with traditional dry chemical extinguishers and diesel burn pans. No messy dry chemical extinguishers or dangerous diesel fumes also means no environmental effects or exposure risks for your trainees.
