

Report to Utility Committee

Item Name: Director of Public Works and Utilities Report

Meeting Date: June 2, 2026

Referring Body:

Committee Contact:

Staff Contact: Greg Ulman

Report Prepared by: Greg Ulman

- Lift Station #3 is going through the engineering stage now to get ready for a public bidding process. I'll notify UC when that date gets set.
- The metering station telemetry will be delivered hopefully sometime in May, we are just waiting on AT&T, then after a few days we can get water to flow through the station to test it per DNR requirements. After all testing is complete, we would be able to purchase water if need be from Rothschild.
- Work has started on Lift Stations 2&6 with the upgrade project. New panels and generators are being installed and work will be completed in spring 2026.
- The water level has been raised for the summer in the tower.
- The Flanner Rd/Jamroz Rd project bid opening took place on April 20, 2026. Because of the elevated bid price, we won't be able to complete the project this year.
- Sewage water has finally decreased through our system in the past month (see attached sheet).
- Lift Station #8 work is progressing and the contractor states the work shall be completed by mid-July.
- The new garage project RFPs have been returned with 6 good applicants, CLIPP reviewed them last night and it will go to the Village Board for potential full approval on Monday.
- Hydrant flushing wrapped up for the spring last month.
