INTRODUCTION

We serve children by crafting natural playscapes that inspire self discovery.

GRG Playscapes is pleased to submit this proposal to the Village Kronenwetter in response to their request for proposals for the Buska Park playground renovation. We are committed to developing a unique, inclusive, and engaging natural play environment that complements the existing amenities at Buska Park. The conceptual playscape design we propose for your consideration prioritizes nature-inspired, imaginative adventure play and aims to serve children and families with a wide range of abilities and sensory needs.

Our design features separate, clearly differentiated play activities for the 2-5 and 5-12 age groups. Specifically, the non-scripted outdoor play areas GRG is proposing will encourage children to connect with nature by integrating:

- Long lasting, natural playscape equipment.
- Abundant climbing opportunities for all ages, including substantial log and rope climbers, and clambering loops.
- A nest swing to accommodate all ages and abilities.
- Use of your existing benches within the play area.
- Easy access among the play elements/around and through the area for caregiver comfort and ease.
- Safety surfacing (Engineered Wood Fiber mulch).

GRG intends to maximize the play value of the available \$150,000 budget. Detailed pricing is included below (page 6). If awarded, GRG hopes to collaborate with the Village to make adjustments to the design and proposal as needed to meet needs and site conditions.

To those who will vote on the proposals for Buska Park, GRG Playscapes (GRG) would like to thank the Village for considering our proposal. We are confident that our proposal not only meets your intentions for this project, but also offers the Village a chance to introduce a new look and a fresh approach to this playground, combining all the excitement of energetic play features with the understated beauty of natural materials. GRG's end product is a unique play space that activates your whole space and invites children to engage in an open-ended, nature-inspired play environment and enjoy being outdoors again!

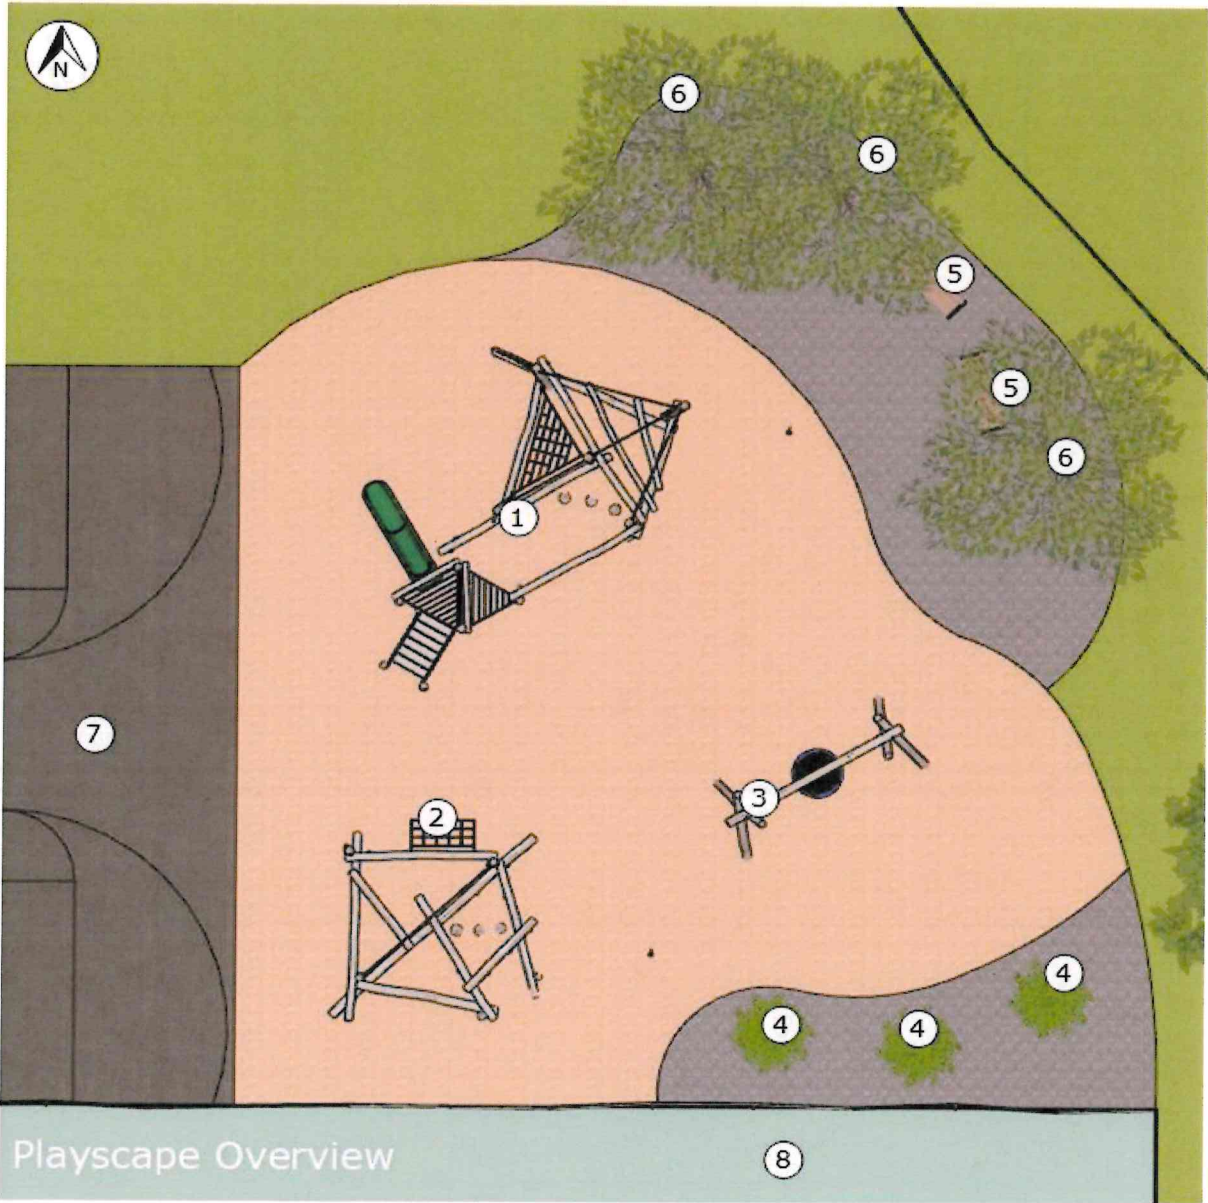

Kind regards,

John LaPointe

SCOPE OF WORK

Assumptions and Exclusions: Site Conditions and Work

- Assumes demolition of existing structures and surfacing, including all excavation for new equipment will be completed by others.
- Assumes that all demolition and excavation will be completed prior to GRG arriving.
- Assumes no drain tile or drainage included in this scope of work.
- Assumes existing edging can be reused (if needed) and will not be disposed of during demolition of the site. New edging is not included in this scope.
- Assumes GRG is provided with a place to unload and stage products and materials prior to and during installation.
- Assumes GRG is able to follow our proprietary installation methods.
- Assumes subgrade infrastructure like water, gas, electric are not installed underneath GRG's designated areas.
- Assumes GRG is not liable for damaging subgrade infrastructure if subgrade infrastructure location is undisclosed to GRG.
- Assumes plaques for donor memorial trees are not included in scope.
- Assumes 3 donor memorial trees included in scope. More trees can be added, if desired, but are outside of the scope.
- Assumes benches in plan images are existing.

Assumptions: Contract Administration

- Assumes this is a tax-exempt job. If not, applicable taxes shall apply.
- Assumes project does not require Prevailing Wage or Union wage rates.
- Assumes GRG's current insurance coverage meets requirements (see COI below). If GRG is required to increase coverage, there will be an increase in price.
- Assumes GRG's standard warranty meets requirements (see Warranty below).
- Assumes contracting and any upfront payment occurs in time to meet our 60 day lead time for black locust and prefabricated carpentry items, and longer lead times for slides and other ready-made items.

PROPOSED PROJECT TIMELINE

The project timeline and substantial completion date were not specified, and will be determined by the Village at a later date.

Project Duration Estimate

As weather permits, we estimate the project to take five (5) weeks. Considering unpredictable summer weather, we propose a maximum time frame of six (6) weeks for completion.

GRG's Standard Project Timeline and Execution Plan ("Estimated Lead Times")

- This Month – Design-Build Contract signed.
- 30 Days Post Contract Signing – Initial Design phase completed.
- 30 Days Post Initial Design – Feedback, Modifications, and Design Sign-Off.
- 60 Days Post Design Sign-Off – Manufacturing completed.
- 60 Days Post Manufacturing – Construction completed.

GRG'S ORGANIZATIONAL CAPABILITIES

EXPERIENCE

We've spent a lot of time over the years observing children at play. With this, certain themes have emerged and these elements are the basis of our approach to any play space, large or small. These concepts drive our evaluation of what exists and our imagination for what could be.

We create worlds of wonder and imagination where children can engage with the same space repeatedly without becoming bored. Our spaces are much more than just a collection of products dropped into a site. They are carefully designed to maximize the entire space. We do this by sculpting topography, building multiple destinations, maximizing the use of corners and paths, and creating variety in the types of features and architectural elements.

DESIGN

Creating an effective, usable and inspiring space takes an understanding of land, the natural environment and the ability to actively listen to the community and its stakeholders to turn vision into reality.

We employ a collaborative and holistic design approach to successfully create a comprehensive space that considers nature and the built environment, as well as connectivity of spaces and people.

Landscapes into Playscapes

Create a world for children to enter and their whole self will be immediately engaged. We accomplish this by using the Whole Space: this approach eliminates underused zones and often includes topographical interest with hills, banks, and berms. The **playground** becomes a **playscape**, activity is dispersed throughout the entire space and boredom is a thing of the past.

Open -Ended Play

A properly designed and built space can have a huge impact on the child's executive functioning skills. Adventure Play is the exhilaration of movement and the challenge of building physical strength and skill. Village Play is where childhood creativity comes to life as children recreate, dramatize and build their own worlds. Furthermore, the open-ended opportunities within drive the development of interpersonal skills.

Nature

Nature gives kids a break from the technology saturated world that dominates much of the modern childhood experience. When a child and/or caregiver is steeped in a nature rich and playful environment there is an intangible but real and noticeable impact on their wellbeing. Our spaces seek to maximize this effect with each crafted detail and material choice.

Adventure Play

Adventure components encourage gross motor movement, such as climbing, jumping, running, swinging, balancing, and building upper body strength. Adventure is the exhilaration of movement and the challenge of building physical strength and skill.

Caregiver Experience

Caregiver experience measures how the childcare providers interact with the space. An enriching space should be comfortable, easily supervised, generally enjoyable and adaptable for a variety of activities to compliment indoor learning experiences. We transform “no” spaces (outdoor areas that are unorganized, unsafe and fragmented) into “yes” playscapes that encourage quality interaction between child and caregiver.

MANUFACTURING

Black Locust is a unique hardwood known for its exceptional qualities such as rot resistance, density, and structural integrity, making it an ideal material for playgrounds. This material is completely biodegradable and yet exceedingly long lasting and is carefully processed by local craftsmen to ensure a smooth, durable, high-quality finish that enhances safety for children playing at the park. By utilizing locally sourced Black Locust and adhering to a meticulous manufacturing process, we not only promote sustainability but also contribute to the creation of beautiful and resilient outdoor environments.

BUILD: CONSTRUCTION AND PROJECT MANAGEMENT

GRG has several Certified Playground Safety Inspectors on staff to ensure the safe design and construction of our playscapes.

Understanding the importance of a skilled and consistent staff to perform all project-related duties, GRG Playscapes highlights the following commitments to its clients:

1. **Experienced Professionals:** GRG's highly experienced craftsmen take great pride in building safe, long lasting and unique playscapes. Our team has a long track record of exceptional projects, building an impressive reputation. This team is local to the Madison area and they see each space as an opportunity to impress and inspire the community.
2. **Contact:** GRG Playscapes will designate a Project Manager for your direct communication for the duration of the project. This ensures a smooth progression between project phases, serving as primary contact, and overseeing all aspects of construction.
3. **Safety:** GRG's on-staff Certified Playground Safety Inspector (CPSI) will be available for consultation throughout the life of the project, guaranteeing and ensuring that all construction is compliant with playground safety standards as described by the Consumer Product Safety Commission (CPSC), ASTM International, and the Americans with Disabilities Act (ADA).
4. **Jobsite Management:** Our crews are accustomed to working safely in areas where children are nearby and maintain a safe and clean work site throughout the demolition, construction, and installation phases. We will provide temporary fencing to enclose work areas as needed.
5. **Timeline:** GRG Playscapes will adhere to the project timeline committed to. We will keep clients and key client representatives updated to timeline adjustments due to weather or other factors.
6. **Warranty:** GRG Playscapes' Limited Warranty covers building materials and construction of all our GRG products. For third-party manufactured products, such as slides, swings, or net climbers, manufacturers' warranties apply and are provided.

KEY STAFF QUALIFICATIONS

Greatness is the reflection of how well we work together; with our clients, as a GRG team, and as a partner to our industry and community.

The team at GRG Playscapes has extensive experience in the design and construction of outdoor natural play spaces that inspire children. The following are key personnel that will serve as key contacts and work closely on your playscape project:

John LaPointe, Co- Owner and Founder

- As GRG's founder and co-owner, John has over 20 years of experience in building compelling outdoor spaces for children. He has led GRG Playscapes to a position of leadership in the natural play industry and is a regular presenter at conferences for childcare professionals, schools, and recreation departments.
- lapointe@grgplayscapes.com
- (262) 844-2397

Aaron Holder, Lead Designer

- As GRG's lead designer with a BFA in Industrial design, Aaron is a seasoned CPSI (Certified Playground Safety Inspector) playscape designer. He has been with GRG Playscapes as lead designer for over 12 years, building a portfolio of playground designs. His creativity and woodworking background are invaluable as he designs playscapes that are safe, buildable, and lots of fun!
- aaron@grgplayscapes.com
- (414) 429-2069

Philip Cox, Operations Director

- As the operations lead, Phil works behind the scenes to support projects by coordinating the various arms of GRG's internal operations: production, fabrication, purchasing, and construction. Phil also serves as the primary client contact for the construction and maintenance phases of GRG's projects.
- philip@grgplayscapes.com
- (414) 322-3227

Lisa Prost, Operations Manager

- Lisa ensures every project detail is in place. She manages the construction calendar, purchasing, and team coordination — keeping schedules tight and communication clear. Her behind-the-scenes work brings order to complexity, allowing our operations team to stay focused and our projects to move forward smoothly and efficiently.
- lisa@grgplayscapes.com
- (262) 356-4306

REFERENCE PROJECTS AND CONTACTS

1. Market	Street	Playground
		Completion: 2022
		8485 Market Street, Middleton, WI 53562

Contact: Kiley Scherer
 Director of Parks & Recreation - City of Middleton
 7426 Hubbard Avenue, Middleton, WI 53562
 Email: kscherer@cityofmiddleton.us
 Phone: 608-821-8349

In the summer of 2021, award-winning landscape design firm, Parkitecture + Planning, invited GRG to design a natural playscape along the Pheasant Branch Creek fork trail in Middleton, WI.

At the time, the local park board was torn between introducing a natural play concept or going with a conventional play structure. Additionally, the client wanted to furnish the 3800 sqft site with a swing and desired to keep much of the site work in-house. Determined to “wow” the client and secure the space for a natural playscape, the GRG design team envisioned a plan that harmonized natural play with conventional elements. The result was a collaborative construction project, in which the City of Middleton provided site work and much of the safety surfacing. The GRG team, in turn, built a sprawling log and boulder fortress, featuring a spacious deck bridge, ADA tunnel path, and a blend of ropes, rings, swings and slides across varied elevation and colorful safety surfacing. The Market Street playscape is a colorful gem tucked along a city nature trail, only steps away from new housing developments and commercial space.

2.Rennwood

**Park
Completion: 2025**

W6640 Ethan Dr, Appleton, WI 54915

Contact: Chad Pelishek
Assistant Village Manager
5298 State Road 114, Harrison, WI 54952
Email: cpelishek@harrison-wi.org
Phone: 920-989-1062, ext 8

GRG Playscapes partnered with the Village of Harrison, WI to custom design and build a dynamic natural playscape for the community.

This sculpted landscape integrates log climbing features, a tree-top perch with a slide, boulder climbing walls, a hill slide, ADA-accessible pathways, and a woodland log adventure area. Designed for ages 2-12, the space supports inclusive and adventurous play. The project also includes a community gazebo, and a pedestrian bridge—all seamlessly integrated into the topography. This was a true construction and design collaboration between GRG and the Village, emphasizing natural materials, flowing landforms, and a shared commitment to creating an imaginative, welcoming environment for children and families alike..

3. Burnham

Pointe

Park

Completion: 2021

60 West Burnham Street, West Allis, WI 53214

Phone: 414-302-8372

This urban natural playscape offers inclusive, ADA-accessible, open-ended play opportunities, fostering community connection in a growing neighborhood.

GRG Playscapes transformed 945 square feet of a vacant urban lot in West Allis, Wisconsin, into a natural playground as part of a broader community initiative. Collaborating with local stakeholders, we created a welcoming space that fosters connection and engagement with nature through thoughtful design and natural materials.

The small natural playscape serves as the heart of Burnham Pointe Park, anchoring a community venue that features a stage, walkways, and outdoor seating—creating an inviting space for all ages to gather, play, and connect.

SUBCONTRACTORS LISTING

If awarded the contract, GRG will **not** use any subcontractors for the playground installation work at Buska Park.

DESIGNATION OF CONFIDENTIAL AND PROPRIETARY

Our construction documents are confidential. If we are awarded this opportunity and the Village wishes to see our construction document for the build, we ask that you keep it confidential and not share it with others.

ATTACHMENT A

GRG PLAYSCAPES' LIMITED WARRANTY, WOOD CARE & REPAIR POLICY

LIMITED WARRANTY

Playscape Component Category	Issues Covered by Warranty	Warranty Length
Black Locust Construction and Play Elements, e.g., built structures, retaining walls, edging, balance beams, stumps, etc.	Breakage or Structural Failure	10 Years Repair or Replace
Black Locust Patio Pavers	Breakage or Structural Failure <i>Polymeric sand infill between pavers is not a warranty item and may need periodic patching. Refer to Maintenance Guide.</i>	10 Years Repair or Replace
Non-Black Locust Wooden Construction and Play Elements, e.g., playscape features built from cedar, pine, treated wood.	Breakage or Structural Failure	2 Years Repair or Replace
Stone Patios, Walkways or Brick Work	Breakage or Structural Failure <i>Non-structural cracking can be expected with concrete installations.</i>	2 Years Repair or Replace
Manufactured Equipment, e.g., slides, swings, netting, ropes, etc.	Manufacturer's Warranty <i>Information Included</i>	Varied

WOOD CARE

Checking in Logs

The variety of logs and log structures on your GRG Playscape are nearly maintenance-free. However, wood can continue to dry out over time, causing additional checking (cracks) in logs. This checking does not pose a structural concern, nor does it detract from the natural aesthetics, but it may create sharp edges or pinch points for children's fingers. These edges can be sanded smooth and larger cracks can be packed with a wood filler.

Mold and Fungus

Generally, Black Locust and Cedar are tremendously resistant to mold, mildew and fungus, as part of their inherent rot resistance. Occasionally, mold or fungus do grow on wood, especially in areas of constant moisture where the wood never dries. If mold or fungus presents an aesthetic concern or a perceived safety concern, we advise a coarse sanding to remove it.

Cedar Decking

GRG does not treat the cedar used in play structures or decking. The cedar changes from a golden color to a silvery color in about a year.

Pressure Treated Lumber

Pressure-treated lumber is used strictly as structural framing beneath our decks. Whenever used, it is always clad in cedar and out of visibility. Pressure treated lumber should require no regular maintenance and structural problems are serviced under the GRG warranty.

REPAIR POLICY

Our warranty specifies that all black locust materials are warrantied for 10 years, and all cedar/treated wood is warrantied for 2. The other materials used in our products like slides and clambering loops carry their own warranties. In the event that any materials fail while under warranty, GRG will replace these materials and make all necessary repairs.

In the event of misuse, intentional destruction/vandalism, or acts of God, GRG will offer advice on how to make repairs if requested.

All materials used in GRG Playscapes' products are readily available in the event that they wear out after the warranty period.

Part II Certification

Under penalties of perjury, I certify that:

- The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
- I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
- I am a U.S. citizen or other U.S. person (defined below); and
- The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must check out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign this certification, but you must provide your correct TIN. See the instructions for Part II, later.

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to www.irs.gov/FormW9.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they
