Kronenwetter WI – Buska Park

Northland Recreation is pleased to submit our proposal for the Buska Park Playground Project. We appreciate the opportunity to be considered as a partner in designing and delivering a play space that will serve the Village of Kronenwetter for years to come.

Our team brings experience working on similar community-focused playground projects throughout the region, including K.A.S.H. Playground in Stevens Point, JoJo's Jungle in Wausau, and Alexander Park in Wausau. In addition to these local projects, we complete playgrounds throughout Wisconsin, as outlined in our project list included within this RFP. These projects reflect our commitment to thoughtful design, long-term durability, and creating spaces that encourage inclusive and engaging play for all ages.

Within our RFP submission, we have included two playground design concepts that we feel align well with both the available space and budget for Buska Park.

Option One features a nature-themed design that rises to an 8-foot deck, incorporating a variety of climbers and slides that provide progressive challenges for children of different ages and abilities. The varying elevations and play elements create opportunities for both younger and older users, ensuring a well-balanced and engaging experience throughout the structure.

Option Two showcases our SkyBuilder Tower, reaching an impressive 14-foot maximum deck height with a tunnel slide that returns users to the ground. A diamond-shaped climbing system provides a challenging but safe and enclosed path to the top level, naturally guiding use toward the appropriate age group. Additional slides and climbing elements at lower elevations ensure that the structure remains accessible and enjoyable for a wide range of users.

Both designs incorporate NRG Freestyle overhead events, which extend play opportunities beyond the main structure and encourage dynamic, upper-body movement. In addition, each concept includes independent spinning elements, such as the Inclusive Revolution Spinner. These spinners are designed to accommodate multiple users and promote inclusive play, allowing children of all abilities to engage together. They support a range of motion experiences—from gentle, social spinning to more active play—while providing a welcoming and accessible component within the overall playground.

As the designer on this project, I am able to provide updated renderings, visuals, and marketing materials throughout the fundraising process. This allows the Village to clearly communicate the vision of the playground to the community and potential donors, helping to build excitement and support as the project progresses.

A key component of our approach is consistency and accountability throughout the entire process. From initial design and layout, through site preparation coordination and installation, and continuing into post-installation support, I will serve as the primary point of contact. This ensures clear communication and a seamless experience from start to finish. I will remain directly involved in design discussions, coordination, and follow-up, and will continue to be a resource for parts, maintenance, and long-term support after the project is complete.

While the concepts included in our proposal demonstrate the level of play value and excitement we can bring to Buska Park, these designs remain flexible and can be refined throughout the process to best match the vision and goals of the Village and its residents.

Northland Recreation takes pride in being a hands-on, reliable partner, and we are fully committed to supporting the Village of Kronenwetter every step of the way.

We appreciate your time and consideration and look forward to the opportunity to work together on the Buska Park Playground Project.

Wadewitz Elementary School- Racine, WI

2018 Project Wadewitz Elementary School is a large kindergarten through 5th grade school with more than 600 students in the Racine Unified School District. Because they currently have 12 children in wheelchairs and many other children with different physical and developmental disabilities, they had a great need for an inclusive playground. In fact, 22% of the school's students have special needs. Their old playground was not accessible at all, almost 20 years old, and in very bad shape.

The Wadewitz playground committee was a small group of 7 teachers/staff members plus the principal. They had a "big dream" of making their playground an area where all students could play side by side. Northland Recreation started working with the school on planning its playground in September of 2016, and the committee never stopped their fundraising efforts until they achieved their goal with installation in spring of 2018.

The new playground has two main areas. The first area is ramped up to 48" and features many inclusive components. It includes different sensory play panels and slides. This main structure is linked by the Little Tikes NRG Hoop Alley to a secondary area. This secondary structure features components that are a little taller and more challenging for the older children. In addition to the structures, there are many independent and ground level activities that are fun for everyone. Some of these include the revolution spinner, two of Little Tikes' new Concerto musical components, the wobble sphere, and more play panels.

Lisa Johnson with Wadewitz Elementary School stated, "The Wadewitz Dream Big Playground has been a dream come true for our school and community. After years of hard work, it is so heart warming to see our kids smile and play with all of their peers."

Universal Playground- Memorial Park, Appleton WI

2020 Project The new Universal Playground was installed of late summer of 2020. The new playground replaced an old existing inclusive structure. The new structure features a large ramped inclusive 5-12 playground that is ramped to 72" and features 7 wheelchair rest decks with lots of play panels and slides. The structure also features our Nu Edge tower and the inclusive Rock N Ship glider. The small 2-5 structure features a ramped wheelchair rest deck with climbers and slide. The playground features several different types of swings, a rope spinner, musical instruments and much more. Northland Recreation also provided the poured in place surfacing to make this inclusive playground truly easy for everyone to get around

Shade Fire Retardant Fabric Colors

Colors are subject to change without notice. The color swatches are for reference only, and are an approximation that do not reflect the properties of physical materials, and can vary when printed. For more information on color samples and the most up-to-date specifications consult your local representative. Little Tikes Commercial uses high quality materials and state of the art manufacturing processes. Commercial playgrounds and products are subjected to years of environmental and solar exposure. Such extreme exposure takes its toll on paints and pigments, and all colors will fade over time. Little Tikes Commercial does not warrant against color fading or discoloration. It is important to properly maintain your playground to ensure its longevity. Depending on environmental conditions at your location, the installation of fabric shade structures may help to delay fading and discoloration.
