

Report to Utility Committee

Agenda Item: Filtration Plant Maintenance

Meeting Date: March 3, 2026

Referring Body: Utility Committee

Committee Contact:

Staff Contact: Greg Ulman

Report Prepared by: Greg Ulman

AGENDA ITEM: Filtration Plant Maintenance

OBJECTIVE(S): To inform the committee on the yearly maintenance at the filtration plant.

HISTORY/BACKGROUND: Every year staff needs to chemically shock the each of the three cells of the horizontal filter tank. Since the plant was put in operation last year this will be the first time performing this operation. Staff reached out to Kurita for assistance for making sure we do this right the first time, what we received back from them are costs to do so:

I can work with our scheduling team to have someone out to observe the shock/charge, right now they are about 6wks out on the schedule.

There are no visits built into our original sales proposal for this, so it would a billed visit at \$1200 per day, plus travel and per diem costs for the rep scheduled.

Let me know if you want me to move forward with scheduling them to come out and observe.

RECOMMENDED ACTION: To discuss if we should have Kurita on hand or have staff do this ourselves.
