Greg –

Attached to this email are the PFAS analytical results completed by the general contractor all with ND results. This test represents the effluent from all 8 pressure vessels before it enters the clear well before distribution.

The Village Water Utility has also just taken our quarterly WDNR required PFAS tests at EP 300 (our distribution point) as of yesterday. We should have those results in about 2 weeks.

If you are interested in bulk water purchase, with the first PFAS test completed and passing, you should now consider getting the station completed.

Let me know your next course of action.

Thanks!

Joe,

Attached are the test results from our PFAS Test.

Thanks,
