Seller shall provide a pump test certificate for the Apparatus dated within 30 days prior to the release date with results satisfactory to BMFA, including proper operation of the pressure governor, relief valve, primer, and foam system if applicable.

The quote is contingent on the Seller providing NDT or ultrasound results confirming that any rusted frame and/or structural components meet OEM specifications. If such documentation is not provided, the quote will be considered invalid.

Seller represents and warrants that the description, condition, and specifications of the Apparatus provided to BMFA are true and correct. Any Apparatus with a light tower must be fully functional unless other provisions are agreed upon with BMFA.

To effectively drain the truck of water, remove all caps and plugs (store on the truck in a compartment), open all intake/discharge valves halfway, and open all drain valves to include the pump cooler and auxiliary cooler.
