December 1, 2023

TO: City Council  
FROM: Planning and Zoning Technician  
SUBJECT: Application No. Z 23-09 (OM Shanti Investment Group, LLC)

Concurrency Management Assessment  
Concerning an Amendment to the  
Official Zoning Atlas of the Land Development Regulations

Rezonings are ineligible to receive concurrency reservation because they are too conceptual and, consequently, do not allow an accurate assessment of public facility impacts. Therefore, the following information is provided which quantifies, for the purposes of a nonbinding concurrency determination, the demand and residual capacities for public facilities required to be addressed within the Concurrency Management System.

Z 23-09, an application by Carol Chadwick, as agent for OM Shanti investment Group, LLC, to amend the Official Zoning Atlas of the Land Development Regulations by changing the zoning district from RESIDENTIAL MULTI-FAMILY-1 (RMF-1) to COMMERCIAL INTENSIVE (CI) on property described, as follows:

PARCEL; 01-4S-16-02677-001

A parcel of land lying in Section 01, Township 4 South, Range 16 East, Columbia County, Florida. Being more particularly described, as follows:

Begin at the point of intersection of the Southeast right of way line of Troy Road and the East line of the Southeast 1/4 of the Northwest 1/4 of Section 1, Township 4 South, Range 16 East, Columbia County, Florida and run South 02 deg. 11 min. 15 sec. East along said East line of the Southeast 1/4 of the Northwest 1/4 a distance of 322.68 feet to a point on the Northerly line of a proposed 80 foot road, said point being on the arc of a curve concave to the North having a radius of 1105.92 feet and a central angle of 08 deg. 25 min. 19 sec., said curve also having a chord bearing and distance of North 70 deg. 14 min. 55 sec. West, 162.41 feet; thence Westerly along the arc of said curve, being also said Northerly line of a proposed 80 foot road, 162.56 feet to a point on the Southeasterly line of a 0.25 acre parcel of land; thence North 48 deg. 07 min. 32 sec. East along said Southeasterly line, 59.47 feet; thence North 49 deg. 38 min. 27 sec. West, along the Northeasterly line of said 0.25 acre parcel of land 105.04 feet to a point on the Southeasterly right of way line of Troy Road; thence North 47 deg. 48 min. 06 sec. East along said Southeasterly right of way line, 237.97 feet to the Point of Beginning.

205 NORTH MARION AVENUE  
LAKE CITY, FLORIDA 32055

TELEPHONE: (386) 752-2031  
FAX: (386) 752-4896

Containing 0.859 acres, more or less.

AND; to amend the Official Zoning Atlas of the Land Development Regulations by changing the zoning district from RESIDENTIAL OFFICE (RO) to COMMERCIAL INTENSIVE (CI) on property described, as follows:

PARCEL: 01-4S-16-02658-001

A parcel of land lying in the SE 1/4 of the NW 1/4 of Section 1, Township 4 South, Range 16 East, Columbia County, Florida, explicitly described as follows:

Commence at the Northeast corner of the SE 1/4 of the NW 1/4 of said Section 1; thence on the East boundary thereof S02°11'15"E, a distance of 342.35 feet to the North right of way line of S.W. Faith Road; thence continue on said East boundary S02°11'15"E, a distance of 65.81 feet to the South right of way line of S. W. Faith Road; thence on said South right of way line S47°48'06"W, a distance of 237.97 feet to the point of beginning; thence S49°38'27"E, a distance of 105.28 feet; thence S48°10'14"W, a distance of 59.47 feet to the North maintained right of way line of Bascom Norris Drive and a point on a curve concave Northeasterly having a radius of 410.57 feet and a central angle of 12°47'45"; thence on said right of way line and on the arc of said curve a distance of 91.68 feet, said arc subtended by a chord which bears N58°32'20"W, a distance of 91.50 feet to the curve's end and a point on a curve concave Southeasterly having a radius of 22.74 feet and a central angle of 71°53'16"; thence on the arc of said curve a distance of 28.53 feet, said arc subtended by a chord which bears N09°43'14"E, a distance of 26.70 feet to the South right of way line of aforesaid S.W. Faith Road; thence on said South right of way line N48°05'32"E, a distance of 50.56 feet to the point of beginning.

Containing 0.17 acres, more or less.

## Availability of and Demand on Public Facilities

### Potable Water Impact

The site is located within a community potable water system service area. The community potable water system is currently meeting or exceeding the adopted level of service standard for potable water established within the Comprehensive Plan.

The proposed amendment could potentially result in 40,510 square feet of shopping center use on the site (based upon averages for use intensities and compliance with offstreet parking requirements, drainage requirements and landscape buffer requirements).

An average specialty retail use is estimated to have 1.82 employees per 1,000 square feet gross floor area.

$40,510 \text{ (40,510 square feet gross floor area)} \times 35\% \text{ (35\% maximum lot coverage by all buildings)} \times 1.82 \text{ (employees per 1,000 square feet gross floor area)} = 26 \text{ (employees)} \times 45 \text{ (gallons of potable water usage per employee per day)} = 1,170 \text{ gallons of potable water usage per day.}$

Permitted capacity of the community potable water system = 4,100,000 gallons of potable water per day.

During calendar year 2022, the average daily potable water usage = 3,554,816 gallons of potable water per day.

Residual available capacity prior to reserved capacity for previously approved development = 545,184 gallons of potable water per day.

Less reserved capacity for previously approved development = 0 gallons of potable water per day.

Residual available capacity after reserved capacity for previously approved development = 749,000 gallons of potable water per day.

Less estimated gallons of potable water use as a result of this proposed amendment = 1,170 gallons of potable water per day.

Residual capacity after this proposed amendment = 544,014 gallons of potable water per day.

Based upon the above analysis, the potable water facilities are anticipated to continue to meet or exceed the adopted level of service standard for potable water facilities as provided in the Comprehensive Plan, after adding the potable water demand generated by the potential use of the site.

## Sanitary Sewer Impact -

The site is located within a community centralized sanitary sewer system service area. The centralized sanitary sewer system is currently meeting or exceeding the adopted level of service standard for sanitary sewer established within the Comprehensive Plan.

The proposed amendment could potentially result in 43,560 square feet of specialty retail use on the site (based upon averages for use intensities and compliance with offstreet parking requirements, drainage requirements and landscape buffer requirements).

An average shopping center use is estimated to have 1.82 employees per 1,000 square feet gross floor area.

40,510 (40,510 square feet gross floor area) x 35% (35% maximum lot coverage by all buildings) x 1.82 (employees per 1,000 square feet gross floor area) = 26 (employees x 34.5 (gallons of sanitary sewer effluent per employee per day) = 897 gallons of sanitary sewer effluent per day.

Permitted capacity of the community sanitary sewer system = 3,000,000 gallons of sanitary sewer effluent per day.

During calendar year 2022, the average sanitary sewer usage = 1,800,000 gallons of sanitary sewer effluent per day.

Residual available capacity prior to reserved capacity for previously approved development = 1,200,000 gallons of sanitary sewer effluent per day.

Less reserved capacity for previously approved development = 0 gallons of sanitary sewer effluent per day.

Residual available capacity after reserved capacity for previously approved development = 1,200,000 gallons of sanitary sewer effluent per day.

Less estimated gallons of sanitary sewer effluent per day as a result of this proposed amendment = 897 gallons of sanitary sewer effluent per day.

Residual capacity after this proposed amendment = 1,199,103 gallon of sanitary sewer effluent per day.

# City of Lake City

205 NORTH MARION AVENUE  
LAKE CITY, FLORIDA 32055

TELEPHONE: (386) 752-2031  
FAX: (386) 752-4896

Based upon the above analysis, the sanitary sewer facilities are anticipated to continue to meet or exceed the adopted level of service standard for sanitary sewer facilities as provided in the Comprehensive Plan, after adding the sanitary sewer effluent generated by the potential use of the site.

---

## Solid Waste Impact -

Solid waste disposal is provided for the use to be located on the site at the Winfield Solid Waste Facility. The level of service standard established within the Comprehensive Plan for the provision of solid waste disposal is currently being met or exceeded.

The proposed amendment could potentially result in 43,560 square feet of specialty retail use on the site (based upon averages for use intensities and compliance with offstreet parking requirements, drainage requirements and landscape buffer requirements).

An average shopping center use is estimated to generate 5.5 pounds of solid waste per 1,000 square feet gross floor area per day.

$40,510 \text{ (40,510 square feet gross floor area)} \times 35\% \text{ (maximum lot coverage by all buildings)} \times 5.5 \text{ (pounds of solid waste per 1,000 square feet gross floor area per day)} = 78 \text{ pounds of solid waste per day.}$

Based upon the annual projections of solid waste disposal at the sanitary landfill, solid waste facilities are anticipated to continue to meet or exceed the adopted level of service standard for solid waste facilities, as provided in the Comprehensive Plan, after adding the solid waste demand generated by the potential use of the site.

---

## Drainage Impact -

Drainage facilities will be required to be provided for on site for the management of stormwater. As stormwater will be retained on site, there are no additional impacts to drainage systems as a result of the proposed amendment. The retention of stormwater on site will meet or exceed the adopted level of service standard established within the Comprehensive Plan.

---

## Recreation Impact -

The level of service standards established within the Comprehensive Plan for the provision of recreation facilities are currently being met or exceeded.

As no population increase will result from the proposed amendment, there will be no need for additional recreational facilities as a result of the proposed amendment. Therefore, the proposed amendment is not anticipated to impact recreation facilities.

# City of Lake City

205 NORTH MARION AVENUE  
LAKE CITY, FLORIDA 32055

TELEPHONE: (386) 752-2031  
FAX: (386) 752-4896

Recreation facilities are anticipated to continue to operate at a level of service which meets or exceeds the level of service standards established within the Comprehensive Plan after the potential use of the site.

## Traffic Impact -

The road network serving the site is currently meeting or exceeding the level of service standards required for traffic circulation facilities as provided in the Comprehensive Plan.

The proposed amendment could potentially result in 40,510 square feet of shopping center use on the site (based upon averages for use intensities and compliance with offstreet parking requirements, drainage requirements and landscape buffer requirements).

## Summary of Trip Generation Calculations for a Shopping Center Use.

40,510 (40,510 feet gross floor area) x 35% (maximum lot coverage by all buildings) x 3.81 (trips per 1,000 square feet gross floor area) = 154 trips less 25 percent pass by trips (39) = 115 p.m. peak hour trips (154 - 39 = 115).

Existing p.m. peak hour trips = 3,420 p.m. peak hour trips.

The following table contains information concerning the assessment of the traffic impact on the surrounding road network by the proposed amendment.

Level of Service	Existing PM Peak Hour Trips	Existing Level of Service	Reserved Capacity PM Peak Hour Trips for Previously Approved	Development PM Peak Hour Trips	PM Peak Hour Trips With Development	Level of Service with Development
U.S. 90 (Duval St.) From S.R. 247 to Baya Ave.	3420	D	0	115	3535	D

a 2021 Annual Traffic Count Station Data, Florida Department of Transportation.

Sources: [Trip Generation](#), Institute of Transportation Engineers, 10th Edition, 2017.

[Multimodal Quality/Level of Service Handbook](#), Florida Department of Transportation, 2023.

Based upon the above analysis and an adopted level of service standard of "D" with a capacity of 6,240 p.m. peak hour trips, the road network serving the site is anticipated to continue to meet or exceed the

FAX: (386) 752-4896

level of service standard provided in the Comprehensive Plan after adding the potential number of trips associated with the proposed amendment.

---

## Affordable Housing

The change in land use is not anticipated to have a negative impact on the affordable housing stock.

## Surrounding Land Uses

Currently, the existing land use of the site is vacant land. The site is bounded on the north by commercial land use, on the east by commercial land use, on the south by commercial land use and on the west by residential medium/high Co land use.

## Historic Resources

According to the Florida Division of Historical Resources, Master Site File, dated 2021, there are no known historic resources on the site.

## Flood Prone Areas

According to the Federal Emergency Management Agency, Digital Flood Insurance Rate Map data layer, November 2, 2018, a portion of the site is located within a 100-year flood prone area.

## Wetlands

According to the Water Management District Geographic Information Systems wetlands data layer, dated 2007, the site is not located within a wetland.

## Minerals

According to Florida Department of Environmental Protection, Florida Geological Survey, Digital Environmental Geology Rock and Sediment Distribution Map data layer, dated November 28, 2018, the site is known to contain clayey sand.

## Soil Types

According to the U.S. Department of Agriculture, Soil Conservation Service, Soil Survey dated September 1, 2023, the site is comprised of Mascotte fine sand soils.

According to the Florida Department of Environmental Protection Soil Descriptions- Mascotte fine sand- This is a poorly drained, nearly level soil on the floodplains of rivers and streams. This soil is flooded occasionally as a result of heavy and prolonged rains. A sharp rise in the water level causes the rivers and streams to overflow. The lowlands remain flooded for approximately 30

FAX: (386) 752-4896

days and the depressions, which drain by percolation and seepage, for longer periods. This soil has been flooded in March or April in about 1 year out of every 10.

## High Aquifer Groundwater Recharge

According to the Areas of High Recharge Potential to the Floridan Aquifer, prepared by the Water Management District, dated July 17, 2001, the site is not located in high aquifer groundwater recharge area.

**Warning: Soil Map may not be valid at this scale.**

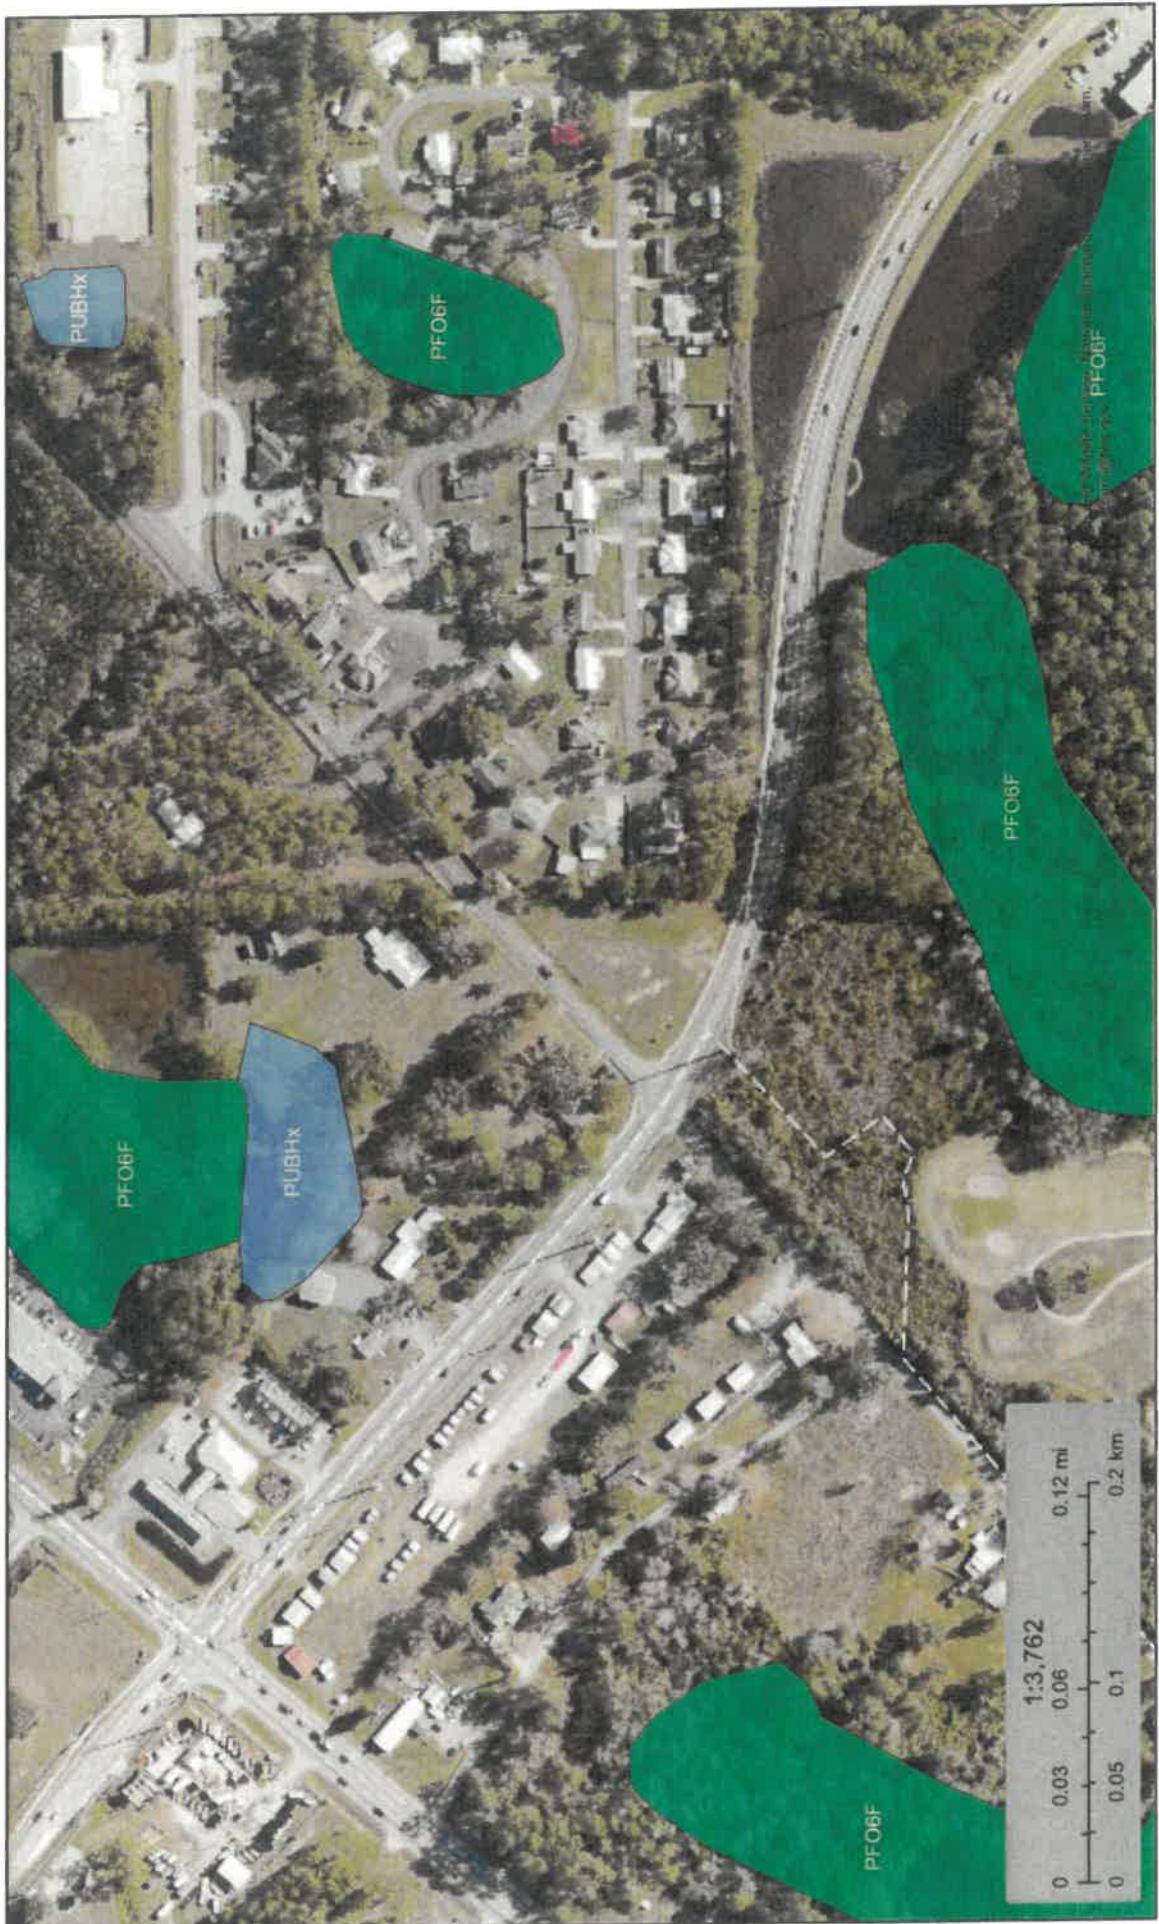

You have zoomed in beyond the scale at which the soil map for this area is intended to be used. Mapping of soils is done at a particular scale. The soil surveys that comprise your AOI were mapped at 1:24,000. The design of map units and the level of detail shown in the resulting soil map are dependent on that map scale. Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.
