More information about the Prestan AED UltraTrainer (4-pack included in this kit)

Prestan Professional, through their continuing commitment to innovation in the CPR training field, once again revolutionizes the market with the introduction of their AED trainer. The instructor and student friendly trainer feature a Pad Sensing System that senses when the AED pads are placed on the manikin's torso.

Clear, calm voice prompts guide students through proper usage while a chest compression metronome encourages students to compress at the ECC recommended rate. And just like with most modern field AEDs, once assembled, the pads stay pre-connected to the unit. This gives your students a good feel for what it's like using an actual defibrillator.

Are you worried that when ECC guidelines are updated, you'll need to buy an entirely new unit or send it out for costly re-programming? Not with this model – to upgrade to the newest guidelines all you have to do is replace the affordable plug-in module!

AED training unit includes:

- 4 Separate AED Trainers with their own zippered, heavy-gauge fabric carrying case with handle
- Larger nylon carrying case to store all 4 individual units
- 5 English and Spanish pre-programmed scenarios on each unit
- 1 set of adult/child pads and connector per each unit
- 3 'C' batteries **not included** in each unit
- Three-year warranty

This unit is for training purposes only and cannot be used for patient defibrillation.

More information about the 4-Pack of ManiVests

Keep your Adult CPR Training Manikin clean and looking stylish in this one of a kind red zip nylon vest. Our ManiVest comes equipped with a small pocket for you to put one of your business cards or a name tag for your manikin.

This vest was manufactured specifically for MCR Medical supply with custom measurements to fit most adult size manikins.

These vests will have you looking professional while helping keep your manikins clean.
