Summary Explanation/Background:

Staff has received feedback from both development partners and our consultant landscape architects that for our Mixed Use District Section 78-83, our street tree planting standards are difficult to adhere to for cost, availability, and long-term maintenance reasons. Specifically, the N220 project has experienced conflicts where the currently proposed landscaping specs for street tree plantings were too intense; the specimen trees required proved difficult to obtain at the required heights and furthermore created maintenance issues for both the property owner and

FDOT, as these large mature canopy trees create complications for both sidewalk and utility infrastructure upkeep. In order to address these issues and facilitate development along the US-1 corridor, staff has worked to create new regulations that allow for greater flexibility in street tree planting along the street while still retaining the intent of the street tree planting code by providing high quality shaded greenways throughout the Federal Highway Mixed Use Overlay District.

Planning & Zoning Board: This item was considered at the Monday, September 11, 2023 public meeting and the Board recommended **approval at a vote of (5-0)** with the recommendation that accommodation be made for utility conflicts, for which greater flexibility has been added to the text granting staff discretion to waive standards where conflicts with utilities can be documented. Additionally, language encouraging public drinking fountains as a street furnishing item has been removed on the board's recommendation and replaced with decorative fountains instead.

Recommended Motion: I MOVE TO **APPROVE** ORDINANCE NO. ____-2023 on first reading.
