

Exhibit E

HAPPY NEW YEAR, 2026

January 7, 2026

Mary Taylor, 209 Park Ave

COMMENTS

I'd like to take this opportunity to thank everyone for being here this evening. I love New Years, and this one has already brought changes to Lake Park. We have hundreds of new residents at the Nautilus. WELCOME, I hope you love your new home as much as the people that are here tonight supporting Lake Park.

Another noticeable change in town since Christmas are the increased number of motorized scooters, bikes, what looks like skateboards, and other interesting types of motorized people movers. They are fast, and I'm sure they are fun for ALL ages. Especially the Evel Knievel wannabes. He's been dead since 2007 but his spirit lives on in the young daredevils of Lake Park. The stunts, are impressive, gravity defying, heart stopping feats of courage and agility....But I don't believe they belong on the center line of Park Ave. or on the side streets of Lake Park. The more cautious, riders use the sidewalks, competing with the shiny, tiny, some motorized, bikes of young children, usually followed by a responsible adult mom or dad. These family parades travel on sidewalks, until they encounter a car parked across the sidewalk, then they must hit the street into traffic. At the same time and place, pedestrians and dog walkers and the slower moving handicapped are often forced off of the sidewalk. It's 2026, time to address our mobility needs. Taxpayers payed for a Mobility Plan, and A Road Diet Plan years ago, without money to implement them. *There is a simple, low cost solution.* I'm out of time, but I'll run it by you next time.¹

Lake Park Commission Comments

Good Evening Everyone,

As many of you know, I am a former LP Commissioner, and I am greatly saddened by the accusations that are being directed at the town and the former commissioners for having violated the Sunshine Law.

I stand here to say “I believe there was never any *intention* to violate the Sunshine Law.

But, lack of intention doesn't matter. The **Sunshine Law is No-Fault. It doesn't matter if the violation was done intentionally or by mistake, or by equipment failure.**

The **result** is still the same in that the residents and the public have no way of knowing how the decision to choose Forest was made.

If I were still a Commissioner, I would stand up and say “Commissioners **did not intend** to violate the Sunshine Law. It was not the Commissioner's fault.

BUT I would repudiate the agreement!

I would **not** continue to negotiate an agreement that I **know** was made in violation of the law. If I continued negotiating I would be condoning and perpetuating a violation of The Sunshine Law. If I knowingly continued, I would expose myself to criminal penalties.... And I would have **NO** Defense, for violating the oath I took as a Commissioner. Thank you very much. ~~I~~ think you know how much I care about You and this Town.
